filter output probability density with random sq. wave input
filtering operations using coherent optics 8090 [1736
French language, spectral analysis 1732
information capacity of networks 8097
instantaneous frequency of a signal 3714
integrated data systems compared 926
interchannel correlation, band of parallel filters 4398
integrator for slowly growing signals 8093

Communication theory - contd
linear distortion, on conversion of cont. sig. to pulses 5140
linear matched detection filters, design criteria 7646
narrow-band Gaussian noise, use of Laguerre polynomials
networks, synthesis 6880 [4392
noise stability, possibility of increase using "a priori" parameter probabilities 8102
noisy channels, cross-correlation 415
nonlinear filters, optimization 1493, 3508
predictor and simulator in self-teaching computer 5282
non-recurrent and periodic transient processes, errors 5736
optimum linear least-square smoothing and predicition 8098
periodic pulse-modulated time series, optimal filtering 409
piecewise linear nonlinearity, spectral output 2452
probability density of RC filter output 4399
pulse signals in noise, low-pass filter, analysis 2248
pulse transmission, ideal binary a.m. and f.m. 864
pulsed sigs., effects of p.r.f. instability on comb-filter design 4937
radar reception with jamming, appln. of games theory 497
random processes, mathematical applications 8415
real signals, uncertainty relation 5142
recurrent events in Bernoulli sequence 4400
sampling-theory generalization 5143
selectively fading multipath channels, error rates 8259
signal waveform estimation 925
sine wave with Gaussian noise, distribution 8104
smooth limiters, signal/noise ratios 416
space communication using solar energy 8089
speech transmission, extremal digital coding 4394
statistics and information theory 5731 [1758
symmetrical hybrid circuits, attenuation and phase constant
systems using orthogonal time functions 6884
system with random sigs. and noise optimization 5136
time-varying filter circuits, signal with minimum noise 7648
vocoder control sigs., analysis using correlator with Hall multipliers 6257
waveguides, use for long distances 262
weighted random processes, spectral properties 4393
Commutator motors (See Motors).
Commutators
brush noise in 1-ph. motors 56
brush wear in small machines 7150
contactless method of dimensional deviation meas. 1387
d.c. machines, current and losses relationship 2663
graphite—copper contact, thermal transients 3285, 5961-2
improvements using double brushes and thyratrons 1187
multiplexing switches, moulded plates 110
in multistage rotary amplifiers 33
polyphase motors, brush contact losses 3300, 5982
rectifier ripple effects 5972
sparking, analysis method 2656
steps in current in armature coil 647
Compandors
feedback instantaneous, distortionless 426
radio-link equipments 5182 [8149
telephone line transmission of broadcasting programmes
transistorized unit 1772
Computers (See Calculating apparatus).
Condensers, electric (See Capacitors).
Conducting materials (See also Semiconductors).
No entries this year
Conductivity
of oxide cathodes, current-dependent matrix dissociation
of soft solders 1966 [894, 5693
Conductivity measurement
of earth, from field-strength meas. 1842
of flooring for operating theatres 1454
fused fluorides, equipment 3443
photoconductive decay, use of filters 383
portable bridge app. 2844
powders, rotating mag. field method 723
semiconductors, automatic four-point probe 1406
microwave freq. 1390
SiC, 300° - 800° K, d.c. to 100 kc/s, nonlinear properties and ionic migration 7915
of solid electrolyte, silver iodide pellets 4905
thermal and electrical, Ni-Cr alloys 4776
Conductors (See also Bimetals; Overhead lines; Resistors; Wires).
A.A.A.C., high-tensile Al alloy 2789
Conductors - contd
anisotropic resistivity constant, meas. method 2797
carrying currents up to 12kA, temp. rise 4019
circular, skin effect due to current pulses 7072
copper metallurgy, review 1319
cryogenic circuits, critical current meas. 2304
cryotron current amp. factor, var. with temp. 4983
curved, total skin effect 4051
eccentric tubular conducting system 3324
in long-span river crossing, Hamburg 4696
sag and tension in outdoor switchgear 4709
superconductive devices, survey 323
analogue solution of London equations 8509
temperature rise, heating-curve determination 7080
380 kV lines, preference for single versus bundle conductors
very high-volt. lines, trends in development 2041 [4695
Conduits

generator windings, internal 7175
direct gas-cooling 2013
water pressures 4659
water-cooled stator, hydrogen-cooled rotor 5352
with hydrogen, increased pressure, modifications 7177
review 7170
shaft seal for hydrogen gas 47
duct resistance to flow, liquid-cooled 5966
machines, air flow calculations 7149
machines and transformers 3963 [8037
maximum size reduction of wound electronic equipment and miniaturization, design problems 5116
motors, effects and causes of overheating 3964
of photocond. i.r. detectors 4306, 4912
power cables, methods using water 7281
power station, economics 7131
semiconductor devices, design problems 4278
thermoelec. cells, transient response 7605
thermoelec. refrigeration devices 1475, 5588, 7601
transformers, survey of methods 60, 1215
transformers, use of SF_6 5369
oil-filled, temp. of air 3990
large power types 63
oil and air, permissible overloads 1214
using vapour 2691-2
transistors, heat-sink design 7927-9
heat transfer 882
thermal equivalent circuits 3034
use of thermoelectric refrigeration 3027
uniform air cooling for computers 1065 [3325-6
uninsulated tube in solid mass, zone of action, theory
of 2.5 MW amplifier for particle accelerator 7633
Cooling towers
concrete, U.S.S.R. design 3264
"dry", jet condensing plant 637
forced-draught, improvement in steam cycle 3274
Copper-oxide rectifiers (See Rectifiers, dry).
Cores (See also Electromagnets; Powder cores).
magnetic, bistable, switching charac. and impedance 1439
magnetic ring modulator, theory 1627
rectangular-loop, operation with sinusoidal l.f. voltages in telecontrol systems 8452
saturable mag., switching circuits using transistors 3577
stacked, joint factors 1211
ring, magnetic losses, calorimetric meas. 2833 [2852
toroidal, static magnetic props., effect of o.d./i.d. ratio
Corona (See also Breakdown; Discharges; Flashover).
concentric cylinders, surge discharges 7265
conductors and insulators, radio interference 1233
controlled discharge for energy stabilization of e.s. accelerator 7565
counter-emission suppression in compr. air 4127
d.c., electrode surface conditions and flashover 8024

Corona - contd
discharge and appln. to voltage stabilization 4365
effect on o.h. line travelling waves 2706
effects on polyethylene 2114
electrostatic, h.v. switchgear and insulator, meas. 5422
on fittings for 110 kV lines 4708
gas-filled cavities in solid-type cables 5396 [2102
initiation voltage on o.h. line conductors, rel. to diameter
negative pulsed, current–voltage characteristics 8025
point–plane with inhomogeneous field 2868
potential meas. in d.c. corona fields 6061
in slots of h.v. machine windings, prevention 2007, 5339
space-charge-limited current in electrostatic precipitation
streamer discharges and glow transition 6320 [6122
suppression in generators and precipitators with compressed air 2865
temp. dependence of d.c. losses in coaxial cylindrical electrodes 6321
in transformer insulation, testing 7410
transmission lines, effect on transient voltages 6612
work function of o.h. line conductors 4005
Corrosion
buried metallic pipes, by stray a.c. 5933
connectors for Al o.h. line conductors, marine areas 2721
deterioration of electronic equipment 8033
electrolytic, h.v. insulators, alkali-free semiconducting glaze 4706
lead-covered cables 944, 7285
tidal power station, St. Malo 5316
underwater steel structure of hydroelectric station, attack by aquatic larvae 8533
Corrosion protection
buried pipe lines, insulation of sections 5932
cathodic, in radioactive materials production and for reactor shell 5934
in h.v. cable network 7278
pipe-type cables 705
deep earth-rod installations 3235
ground-bed design 3912
climatic tests, standardization 1961 [5513
instruments, use of adsorbent C getter to protect contacts
metals in tropics 1962
potting and impregnating compounds, survey 715
semiconducting coatings, effects of d.c. 2612
silicon nitride films to prevent metal oxidation 2105
telephone apparatus in tropical areas 940
wood poles, Baltic redwood, creosoting practice 101
Counting circuits (See also Calculating apparatus; Pulse-amplitude analysers; Relays).
adder–subtractor, using tunnel-diode flip-flop 7789
anti-coincidence, using crystal diode 5639
autonomous sequential networks, state–logic relations 3860
autosynchronous, for digital-computer circuits 3857
beam-profile indicator for particle accelerator 752
binary–decimal convertor, up to 2^{24} 4986
binary h.s., frequency-script techniques 3560
charge-storage pulse ampl. analysers 7762
chronometer using oscillator and scaler 7751
chronotron for netron spectrometer 7750
coincidence, small pulse amplitudes 2306
for slow pulses 1545
transistorized, nsec resolution 3535
fast multiple pulses 7759
for cyclotron 7767
three-diode circuit 7754
transistor circuit 7755
Dicke circuit 6755
improved rejection ratio 7756
high count rate and resolution 7749
using cold-cathode tubes and with digital readout 4979
comparator circuits using semiconductor devices 828
cryotrons, characteristics and circuit applic. 7781
thin, properties 7780
ring oscillators, analysis 7782
crossed-film, digital-computer applications 6782
current integrator, digital output 7777
current meters, automatic digital recorder 6669
decade, using binary stages 2286
decade, transistor-driven with beam switching tube 2282
delay-line stores, magnetostrictive 6786
differential coincidence, use of two photomultipliers 7753
digital character-generator with c.r.t. display 7792
digital, for 1 Mc/s operation 1556

Counting circuits - contd
diode logic, using back-transient properties 6211
diode redundancy in encoding and decoding matrices 7785
directional fish counter for field use 3064
discriminator-scaler, transistorized 2306
disk encoder, non-ambiguity of output 6194
division-ratio increase 332
double-rank, gating logic 2287
electromech. counting, counting-rate increase 3475
electromech. registers, transistor operation 6113
electron-beam switching device and logic elements 6207
events per unit time meter 2284
frequency-dividers, high-resolution 7806
variable division ratios 7813
bistable multivibrator 841
gamma spectrometer, for 1 GeV 7769
with auto background subtraction 7768 [4981
gated staircase counters, in analogue–digital converter
high-speed, using E1T tubes 2283
using tunnel diodes 6209
using four-layer diodes 378
transistor operated 3558
hundred channel time-of-flight spectrometer 2944
interferometer, broad-band r.f. 747 [7796
ISABEL, logical decimal counter using bistable elements
letter-sorting machines, code translator 2591
light pulses from rotating mirror 6197
lightning-flash counting instruments 5638
linear non-overloading amplifier circuit 1546
linear ratemeter, auto. range-changing 6761
load-angle meas. in generator 1363
logarithmic integrator 830
logic circuits using tunnel diodes 7791
logic circuits using ferrite cores and no semiconductor diodes 7790
low-temp. digital storage elements 2302
matrices using printed diodes and resistors 4993, 7770
metallic-tape cores, nondestructive readout 6533
microwave techniques for computers 2291
moiré fringes, velocity meter on machine tool 6660
neutron spectroscopy 2000-channel analyser 4586
neutron time-of-flight, transistorized selector 4980 [5635
non-decimal counting systems, use of decade counter tubes
nor circuits, using diode–transistor logic 6775
nsec, discriminator circuit 1575
Nuclear Electronics Symposium, Paris (1958) 4975-6
number indication using miniature c.r.o. 4987
numerical phase-meter, analysis of errors 199
one-cycle magnetic shift-register 4213
parallel adder, synthesis using pattern recognition 1573
particle coincidence studies, multirange delay line 7819
for particle-size meas. by resistance method 5133
Persistor superconducting memory element 6213
photocell–light beam type, for fish egg counting 3710
proportional counter for X-rays 6762
pulse-amplit. analyser, logarithmic 7761
pulse-counting, binary scale factors 3557
pulse generator up to 3×10^8 pulses/s 4970 [7765
pulse-height discriminator with forward-biased shunt diode
pulse-height-to-digital signal convertor 2288
pulse timing circuit for fast coincidence 6747
radiation monitor, single-transistor instrument 6867
radiation monitor, transistor head and circuit 7763
use with radioactive tracers for fuel flow metering 3554
reversible, sign and magnitude display 313
binary 316
using emitter-follower steering circuits 2285
ring counter, for rates up to 1 Mc/s 7774
transistorized, design and performance 5636
ten-stage 50 kc/s 5637
cold-cathode, with numerical indicator 6193
road vehicles, weighing, classifying and counting 734
for satellite radiation-detector equipment 5530
scalers, rationalized circuits 7809
with 11 μs dead time 7771
basic h.f. circuits 7810
100 Mc/s 7773
with magnetic count indication 7775
scale-of-two, high-speed transistorized 7772
transistorized binary 1549
using tunnel diodes 5640
battery-powered, for radio-active tracer studies 6765
using Si transistors and diodes 6764

Counting circuits - contd
for 20 Mc/s operation 1548
with short resolving time 312 [6202
sequential switching circuits, internal variable assignments
shift register, transistor–capacitor 6779
using single-crystal $BaTiO_3$ capacitors 1547
for use with slow scintillation counter 1544
for small particles in suspension 7948
stability of gamma-ray detector counters 2943
superconducting computer elements 3870
ten-channel time analyser 5634
testing, transistor pulse-generator 4974
time analyser for half-life meas. 7439
time-correction in pulse-amplitude analysers 7758
time-delay and pulse-height analyser, 20-channel 2280
Time Encoder electronic timing equipment 7814
time-resolving scintillation counter output 8029
time sig. comparison, determination of delays 4818
time sorter, linear from 1 to 10 ns 6214
transistor applications in nuclear physics meas. 310
transistor-coupled, using Dekatrons 315
using transistors and mag. cores 3559, 3567
transistor multivibrator for time-interval meas. 1553
transistor-operated, using Dekatrons 314
transistor–resistor logic elements, propagation delay 3858
transistorized gate circuits 4217
transistorized, for G-M counter 4978, 6196
transistorized portable radiation monitor 2942
twistors and bit-wire components 6104
universal input stage 2290
Counting tubes (See also Radiation counters).
cold-cathode character display 2435
cold-cathode, counter with direct digital read-out 4979
decade, miniature gas-filled 3702
Dekatrons, transistor-operated 314-5
gas-filled, unsymmetrical cathodes, review 5111
glow-type, non-destructive read-out 2437
trochotron, use in time analyser for 9 channels 5633
Coupled circuits (See Circuits, coupled).
Crack detection (See Mechanical testing, non-destructive).
Cranes
a.c. motor drive, d.c. control system 7379
heavy-duty, electric drives, survey 712
operating time and conditions, meas. instrument 3413
speed control, a.c. motor drives 688
Crosstalk (See Interference, telephony; Reception quality).
Crystal detectors (See Detectors, radio).
Crystal diodes (See Semiconductor diodes).
Crystal receivers (See Receivers, radio).
Crystal resonators (See Resonators, crystal).
Crystal triodes (See Transistors).
Current (See also Eddy currents; Fault currents; Impulse currents; Leakage currents; Short-circuit currents; Skin effect).
No entries this year
Current collection, traction
elasticity and dynamics of contact wire and collector 707
lubrication materials 1315
resonance in rectifier-locomotive trolley systems 142
Current distribution
anode current dividers for Hg-arc rectifiers 81
Current fluctuations (See Noise, electrical).
Current-limiting reactors (See Reactors, current-limiting).
Current measurement (See also Ammeters; Electrometers; Galvanometers).
a.c. and d.c. instrument using thermocouple convertor 1397
a.c. accurate direct-reading instruments 7486
calibration of current transformers at up to 20 kc/s 5486
in commutation, aircraft generators 5344
coulometer, low-impedance electronic 1398
cryogenic circuits, meas. of critical current 2304
current density in electron beams 6313
d.c., transductors, 0.5 to 6 kA 4682
electrometer method, very low ion densities in gases 721
electron-beam current monitor for linear accelerator 1396
in gas-discharge tubes, c.r.o. method 8027
high values, use of magnetic amplifiers 1592
inductronic electrodynamometer 200
integrator instrument 5516
of lightning, survey of methods 2778
logarithmic micromicroammeter 7490 [4827
low-energy electron current, 10^{-12} A, photomultiplier method
Current measurement - contd
peak values in testing of surge diverters, errors 4790
photoelectric, d.c. amplifier 7401
pulse load testing of primary cells 4789
in range 10^{-14} to 10^{-18}A, and recording 5517
rectifier-type milliammeter, errors 6081
short-circuit, in photoelements 4787
small values, d.c. amplifier 1588
synchronous thermal detectors 7901
transductor methods, up to 150 kA d.c., survey 4681
transformer, balanced, for high direct currents 185
Current regulation
airfield lighting installations 4744
barretters, theory 2060
use of current-limiting transformers 1212
for d.c. using semiconductor devices 3353
of Ge rectifiers in electrochemical applic. 6608
high-precision regulator, 50A, 50V, transistorized 2747
ignitron convertors, using bias shift 7242
isolating transformer for max. regulation of Hg lamps 5556
lighting dimmer using Si controlled rectifier 2069
magnetic stabilizers for 50 c/s a.c. 7326
mains-derived current source with very small drift 4742
mains - derived a.c. and d.c. constant ct. sources 2059
pentode tube controlled by magnetic field, 7328
protection of meters with neon-lamp shunt 6634
short-circuit-testing generators 649 [7327, 7329
stabilizers for electromagnets 689, 1285-6, 3354, 6016,
stabilizers, LC circuits, for varying load resistance 7324
stabilizer using paramag. resonance 121
stabilizers using transistors 2746
stabilization of transistor amplifiers 7320
supply-compensated constant current source 6630
for wide range of load impedance 7325
Current transformers (See Transformers, current).
Cutting (See also Machining).

resin, theory 2199
rosin-wax, decay of internal field 2862
Electric drives (See Drives, electric).
Electric fences
No entries this year
Electric fields (See also Field plotting; Field-strength measurement).
changes, and design of lightning-flash counters 6033
charging of fine particles, theoret. analysis 217
contact electrification, semiconductors, metals and insulators 5669
distribution in dielectric-slab waveguide 4187
effect on gas-disch. breakdown in microwave cavities 1709
effect on mammalian sperm cell movements 2447
electric sandstorms and related phenomena 4128
extremely low frequency phenomena 5205
at ground plane of top-loaded monopole aerial 5199
liquid dielectrics, space charge effects, meas. 7396
and magnetic fields, determination by method of images [3926, 5299
non-potential, $\bar{E}$ and $\bar{H}$ vector relationship 1973
parallel-plane emitter, thermionic current 6839
potential gradient meas., aircraft instrument for meas. and vectorial presentation 6417
potential meas., in d.c. corona fields 6061
r.f. focusing of electron beams 8016
r.f. forced oscillations in non-uniform plasmas 7990
radial variations in trav.-wave tubes 4341
resonant modes in waveguide windows 4178
sign changes in cloud-cloud lightning discharges 3374
space-charge, use of analogue computer 7985
static charge, neutralizing by radioactive radiation 2203
transverse, in ferrite-loaded waveguides 288
in vicinity of generator stator, determination 2794
Electric furnaces (See also Electric heating; Heating).
auto-control, steel industry 4540
review of systems 4914
electron-bombardment, emission-stabilizer circuits 2562
for Si-ingot growing 2222
growing technique, 5 kg single crystals of Ge 2367
laboratory types, design 3492
lead-smelting, load regulation 128
linear voltage—temperature type 2223
power meas. using Hall effect 3452
survey 4917
transformer design 3310
Electric furnaces - contd
arc
bulk production of steel 770
chemical smelting processes 6703
circuit characteristics by combined methods 771
control of power by analogue computer 2879
design and construction 6702
elect. characteristics, determination 6132
electrode control system 3817, 4873
inductive stirring 2878
low shaft-type 4915
optimum current-range estimation 7606
performance, model study 235
silicon-smelting, load characteristics 2764
submerged-arc, crater resistance, electrolytic-trough model 6133
transformer design 3311
3ph., equivalent-circuit analysis 5590
induction
channel-type, design and construction 3491
coreless, design 6701
internal impedance at h.f., calculation 6135
low-frequency types compared 6705
for zone refining of copper 3493
resistance
graphite self-supporting for high temp. 2881
for heat treatment, design 6700
high-vacuum for 1400°C 2880
Kanthal-Super element material, applications 3494
multi-tunnel, ceramic industry 4916
vacuum oven, laboratory type, up to 2000°C 774
Electric heating (See also Domestic appliances, hotplates; Drying; Electric furnaces).
analogue for heat-flow in transistors 1651
atomic central district heating plant, Sweden 2877
busbars, carrying up to 12kA 4019 [5367
drying of transformer insulation, zero-sequence currents
electron bombardments, processing materials 776
heat-recovery plant for paper-making machines 2225
industrial applications, survey 3490
instrument heaters, design 6080
by mag. field for controlled fusion research 1711
microwave plasma torch app. 1520
ohmic heating for plasma physics 1519
of road surface on bridges 236, 4918, 6134
thermoelec. air conditioning, submarines 6696
warm air systems for railway coaches 7370
water heaters for hand washing, comparative tests 3495
dielectric
non-metallic strips and sheets, microwave generator 1476
oscillators, laminated tank-circuit design 2262
radial heat flow in hollow cylinder, theory 3497
sterilization of insect-infested wood 1250
at 12 cm using 200W magnetron 4919
induction
alt. mag. field near conducting sphere, analysis 3932
glue curing, applications 6704
generator, med. freq., transductor voltage-regulator 4867
h.f., destruction of wood-worm 7607
m.f. core-type transformer design 4678
manufacture of Ge single-crystal ingots 2368
microwave, industrial applic. 8088
power generated in rect. section channel 775
skin effect on curved conductor surfaces 4051
static a.c. voltage supplies 4686
tubular heaters, thermal processes and parameters 2224
zebra effect 3496
3-ph. heating coils, calcs. for uniform temp. 2883
Electric heating elements
Ni-Cr and Ni-Cr-Al heater alloys, oxidation studies 1320
Electric ignition
inflammable gases and vapours, spontaneous ignition temp.
transistorized system for road vehicles 4373 [4591
Electric strength (See Breakdown).
Electric vehicles (See also Motor-coaches; Tramcars; Trolleybuses).
battery charging, automatic control 4906
battery-operated, survey 7371
and traction motors, ratings 4765
Electrical engineering applications (See also Drives, electric).
No entries this year
Electrical engineering equipment
appln. of irradiation in industry 614, 4590

Electrical engineering equipment - contd
climatic test methods 722
use of epoxide resins 1340
faults and preventive maintenance (book) 4643
flame-proof, intrinsic-safety tests and standards 5293
flame-proof, spontaneous ignition temp. of gases 4591
glass fibre, use as insulation and construction element 1326
intrinsically safe, testing methods 7062
plant depreciation, theory 7091
safety regulations, U.S.A., Canada, and Europe 1128
Electrical engineering progress reports
B.T-H. (1959) 1972
G.E.C., (1959) 4593
light and lighting (1959) 4898
lighting, 1959 survey 4899
mining industry, progress review 8527
plant and equipment design, U.K. survey 2613
Switzerland, 1958-9 supply statistics 2631
U.S.A. (1959) 1127
Westinghouse Elec. Corpn. U.S.A., (1959) 4592
Electroacoustic transducers (See also Hearing aids; Loudspeakers; Microphones; Pick-ups).
$BaTiO_3$ types, 15-80 kc/s operation 6895
earphone, loudness-balance data standardization 5763
electrostrictive vibrators, coupled vibrations 6145
equivalent circuit for human ear 3079
headphones, transmission-constants meas. 1787
model for speech recognition and synthesis 947
piezoelectric, review of props. 2815
and magnetostrictive 1785
transistor oscillator in f.m. gramophone pick-up 1792
ultrasonic, applications of piezomagnetic ferrites 7539
in liquids, physical effects 949
underwater echo-ranging, research survey 4071
electronic sector scanning 2141, 3065
vibration pick-ups, calibration 8157
Electrochemistry (See also Electrolysis).
a.c. oxidation of electrolytic-capacitor foils 215
aluminium smelting, operating tests on large Hg-arc rectifiers 7241
anodizing, use of low-freq. supplies 2677
electrolytic interrupter using H_2SO_4 2733
electrometer for dielectric constant meas. on aqu. ionic solutions 2163
etching, review of technology 5122
fuel cells 2212, 4132, 5570-80, 6553, 7604
hydrogen peroxide, manufacture 768, 6693
interrupter, high-speed high-current 6115
Ovitron relay or modulator device 5540
semiconductor rectifier applications 3997, 5581
siting of plants near power sources, Italy 6547
Solion touch detector 7455
surface-barrier transistors, manufacture 3021
terminology 4907
electrodes
aluminium smelting, field due to d.c. in a parallelipiped 7079
pH glass electrode cell, equiv. circs. 7481
silver, for batteries, oxides formation 1469
Zr and Ti as primary-cell anodes 1470
Electro-deposition
Cr baths, review 4909
Cr, with self-regulating electrolyte 2215, 4908
cyanide—brass electrolyte, removal of carbonates by ion-exchange 4910
electroforming of waveguide components 230
Ge rectifier applications and control 6608
metal contacts on Ge and Si 1473
nickel, adhesion to Cr at elevated temp. 2214
brightness and structure 2213
nickel-iron films for nondestructive memory 3459
NiCo layers, as computer storage elements 6781 [5931
pinholes in plating, electrode-potential detection method
plating, mechanization and automation 7600
plating thickness meas., thermo-e.m.f. method 2821
production of Ni-Al alloy coatings using diffusion 4911
silvered plexiglass and appln. to h.f. problems 5582
twistors and bit-wire components 6104
ultrasonics, effects and potentialities 6695
vacuum deposition of thin films 231
Electrodes (See also Cathodes; Earth electrodes; Electrochemistry, electrodes).
arc-furnace, transductor control system 4873
contacts on semiconductors, photolitho. methods 5044
Electrodes - contd
contacts to titanate ceramics 5045
for ignition control of gas-discharge tubes 912
microelectrodes for fibre or cell potential meas. 5132
nine different metals, spark-discharge erosion tests 3342
potential distrib. between plane emitters 7983
single-electrode capacitor for moisture meter 3440
skin electrodes for medical recording 719
thermionic tubes, thermal emissivity meas. 2138
grids, power temperature relation 4328
grids, thermionic props. of thorium deposits 3679
grids, emitting props. of Ti 3678
anodes of Ag, Cu, Ni, Mo, Ta, Ti and W, gas evolution and ion emission 3675
voltage clamp for biological investigations 5134
Electroluminescence
cells, circuits and applications 1681
electrode resistance 2414
and photoconductors, applications 890
computer storage system 1571, 7778
digital indicator with SiC coding matrix 3036
electro-optical shift register 829
frequency-quadrupler circuits for 200 c/s supply 7807
light amplifiers, space-charge currents 1677
single-elements, using sintered CdSe 1678
dynamic operation 1679
with storage and optical feedback 1680
panels, preparation methods 6829
display devices, review 6830
ZnS:Cu, light patterns 4301 [1675
phosphors, voltage dependence and particle size distrib. 2413
applications
microscopic exam. 1674
effects of electrical pre-history 4302
ZnS, mechanism and efficiency 5079
ZnS, for lamps 6283
CaS:Cu,Eu, red-emission 5078
with square-wave excitation 5080
physical charact. and chem. composition 5081
photoelec. and luminescent phenomena and devices 1673
of polycrystallites 1676
review 384
spectral response of electro-optical materials 6828
typewriter with e.l. readout 8489
Electrolysis (See also Electro-deposition). [4910
cyanide—brass, removal of carbonates by ion-exchange
Ge rectifier applications and control 6608
Pt and Pt-plated metals as corrosion-resistant anodes 6694
terminology 4907
Electrolytic polishing
fine wires and tapes 4135
Electrolytic rectifiers (See Rectifiers, electrolytic).
Electrolytic trough
applns. earthing for o.h. line towers, meas. of volt grads. [3397
applied to ladder-filter design 3509
automatic plotter for equip. harmonic fields 187
crater resistance of submerged arc furnace 6133 [6079
focusing of b.w. tubes, use of turbine-type magnetometer
Laplacian fields, inversion principle 7404
unbounded domain problems 7403
Electromagnetic waves (See also Radiowave propagation).
absorbers, reflection and incidence angle 2884
bandwidth of thin layers 148
coatings of conducting objects, ineffectiveness 8308
walls, design and construction 4924
wideband, box type 2249
multilayer, of loss-free dielectric 779
absorption and reflection, from re-entry vehicles 489
aerials, radiation pattern with non-plane incident wave 5791
cylindrical, transient response 3096, 5790
slot, principle of complementarity, review 3108, 5793
along slot in cylindrical surface 8247
attenuation along helical wire line 2908
backscattering from a finite cone 6708
charact. and equations of electromag. field 5297
in coax. spiral line immersed in magneto-dielectric medium 4175
coherent electromag. pulses, indeterminacies in measurement 8319
communication methods, review 8091 [4144
conducting wedges, boundary conditions and ohmic losses
conference report, Toronto (1959) 6137
cylindrical wires, back-scattering cross-sections 6710

Electromagnetic waves - contd
dielectric-coated phase-corrected reflectors 987, 5796
dielectric image line and energy flux distr. 3499
diffraction, by ideally conducting sphere 2228
by circular aperature in plane conducting screen 6711
of plane waves by infinite slit for grazing incidence 6712
by smooth obstacles for grazing angles 2517
by wire grid in dielectric slab 2230 [7444
Doppler methods of velocity meas., review and bibliography
$\bar{E}$ and $\bar{H}$ field distribution meas., modulated scattering methods 6917
e.l.f. mode theory and propagation 5206
extremely low frequency phenomena 5205
fields, axially symmetric bounded by cone and sphere 4448
forward scattering of radar waves from coated objects 8307
ground constants meas. using balanced 2-wire transmission line 6942
guided, action of a progressive disturbance 4950
h.f. radio, attenuation, auroral ionization 6409
Heaviside theorem 6715 [4927
imperfectly conducting cylinders, electromag. cross-section
impulse excitation of conducting medium 6706
Kirchhoff's principle, appln. to diffraction patterns 5196-7
longitudinal, propagating in plasma, growth analysis 7610
longitudinally polarized, reflection from rectang. ridged structure 5620
Maxwell's equations, tensorial consequences 1131
criterion for uniqueness of solutions 6537
microwave, apparatus for diffraction studies 2226
microwave, medical effects in industry 8088
microwave, periodic and guiding structures 4140
mode transducers, design 4176
natural e.m. radiation, use for space navigation 5826
"near" magnetic field 237 [7695
non-periodic slow-wave and backward-wave structures
non-periodic fields, reciprocity theorem 7609
parametric amplification, nonlinear transmission lines 3616
physical classification 7667
plane transversely polarized, reflection from rectangular grid 3498
power relationships, slot-excited plane 4922
propagation, through hypersonically produced plasma 777
pulses, in homogeneous conducting earth 5800
speed and props. of medium 625
along h.v. unbalanced lines 1229
in a coaxial system 1460
along dielectric rods 7693
in semi-infinite conducting medium 7608
of quasi-circular waves 4167
progress review, microwave physics 6138
radiation from charged particles near conducting body 4923
radiation from vertical dipole over arbitrary surface impedance 5592
reciprocity and scattering by rough surfaces 6707
reciprocity theorems for fields with arbitrary time-dependence 6136
reflection and diffusion in tropo. scatter propagation 8263-5
reflection and transmission coefficients for reflecting surfaces 778
reflection coefficient from earth's surface 8256
reproduction of source systems in a surface 1132
retarding props. of helical guide in gyrotropic medium 4954
scattering from long magnetized cylindrical plasma 6714
by infinite array of thin dielectric sheets 6713
microwaves by thermal turbulence 997
space-charge, transmission-line analogy in microwave tubes 7986
superposition method, design of cavity resonators 781
surface, in ferrite-filled waveguide 794
launching by mag. line source 7671
definition 4139
excitation and propagation 4138
thermodynamic effects, theory and analysis 6539
thin cylindrical aerial conductor, current waves and impedance 3752
thin cylindrical aerial, current and radiation field 3753
three coupled waves, properties 6841
transients in conducting media 6709
transmission through wire gratings 238-9
transverse TEM fields 2227 [902
travelling-wave tubes, prop. constants in delay systems
wave propagation constant for long line 240

Electromagnetic waves - contd
in waveguide, spinning dipole meas. 188
classification of modes 3520
mode transducer 7691
Goubau surface 7611
tapers, theory 7678
dielectric-rod 6739
transients, rise-time and overshoot 7668
interaction impedance meas. 4792
attenuation, effect of slots and dielectric layers 4953
magneto-dielectric medium, resonance 4955
loaded spiral, power flow 5613
properties 263
negative wave impedance 804, 5612
curved, dielectric-filled 268
in weakly ionized dry air, propagation constants 6955

Electromagnetism
No entries this year

Electromagnets
a.c., detmn. of inductance from simple models 2192
improvements to attraction characteristics 6110
optimum core induction 7544
clutches, transients analysis 3387
analysis of characteristics 3385
reversing system and automatic speed control 5432
for servomechanisms 8429
torque calculation 3384
coaxial, for 7th order external field 4117
coils, optimum dimensions for high energy 7821
current regulation, stability of photoelec. regulators 1286
current stabilizer circuits 689, 3354, 6016, 7327
using transistors 1285
d.c., analysis and design 7543
eddy-current brake, design and applic. 2743
for sodium-cooled reactor 7549
field stabilization system 2071
figures of merit and performance 1433
high-field, with liquid N cooling 3470
with inhomogeneous field for thermionic-tube testing 6844
kilogauss fields, research applications 1432
kerosene-cooled, design 3471
laboratory model 205 [2143
magnetic field meas., using frequency of maser oscillator
power sensitivity of polarized v. non-polarized relays 206
power supply for particle-accelerator electromagnet 5536
for Pretoria 115 MeV cyclotron 7959
pulsed fields, 10^8J capacitor bank 7574
pulsed or steady fields 7726
pumps for liquid metals 4652, 6579
for Saclay cyclotron, focusing and analysing 7960 [7329
scanning current-regulator, magnetic resonance applic.
shutter for spectrograph 3063
single-phase, elimination of pulsations 2856
solenoid-operated mechanisms, analysis 8010
stabilized power supply, mass spectrometer 4747
superconducting, used at low temp. 3469
support device, 3-dimensional 1434-5
switch-holding, design 7547
synchrotron, field stabilization 7548
magnet assembly 7545 [4675
CERN, Scherbius set for motor-generator magnet set
CERN, magnet power-supply 4689
power metering of m.g. set input 4852
water-cooled, with 6kOe field, for r.f. spectroscopy 6680

Electrometers
battery-type thermionic tubes, characteristics 7987
cathode-follower circuit for large input voltages 7835
use of feedback, 10^{-11} to 10^{-15} amp. range 1401
industrial types, survey 2161
for l.f. dielectric constant of aqu. ionic solutions 2163
logarithmic micromicroammeter 7490
meas. of very high resis., solid dielectric 2795
meas. of very low ion densities in gases 721
using operational amplifiers 7491
portable voltmeters for max. 2V and 10^6ohms 5518
stable high-speed, for satellite use 5519
triodes, logarithmic charact. 1402
variable feedback d.c. transistor amplifier 2162

Electron beams
appln. of irradiation in industry 614, 4590
in axially symmetric crossed fields 2423
in bombardment of refractory materials 776

Electron beams - contd
- Brillouin flow, generalized solutions 8018
- r.f. current distribution 2430
- bunched circulating, for parametric amplification 6249
- cathode temp., meas. by retarding field technique 4309
- characteristics in radially varying periodic magnetic fields 4354
- computer switching device and logic elements 6207
- crossed-field, cyclotron resonance characteristics 8014
- current monitor for linear accelerator 1396
- cylindrical magnetically focused, laminar flow 2429
- deflection plates for c.r. tubes, design 6851
- dense, design criteria 2428
- diode, transient space-charge flow 7984
  - analogue study of electron motion 6297 [4321
  - parallel-plane, secondary and backscattered electrons
- display devices, panel type, review 6830

- in furnace heating for Si-ingot-growing 2222
- generators, calorimetric dosemeter 4855
- growing-wave amplifier 6301
- h.v. electron extraction from arc-discharge plasma 6318
- heating-wave amplification, general aspects 2987
- in helical waveguide, interaction with travelling waves 4956
- hollow, triode electron injection system 4355
- interactive power in travelling-wave tubes 4343
- investig. using 2-cavity klystron 390
- Langmuir vacuum diode theory, invalidity 2431
- large-signal bunching by standing-and travelling-wave systems 5092
- long magnetically focused, noise meas. 6311
- longitudinal waves propagating in plasma, growth analysis [7610
- modulated, nonlinear behaviour in presence of velocity distribution 6858
- multi-beam unidimensional flow, d.c. relations 3695
- multivelocity, nonconservation of noise parameters 3686
  - single-velocity equivalents 3050
- oscillations in an ion plasma 4353 [8006
- parametric amplifier, spatially varying quadrupole field characteristics 7874
  - pump freq., and phase velocity 4249
  - progress review 7875
  - electrostatic focusing 7873
- partition noise at microwave frequencies 5708
- periodic slow-wave structures, equivalent circuits 7613
- periodically varying vel., motion in lossy medium 4344
- plane cycloidal, space-charge defocusing 6862
- power flow, determination of sign 8017
- pulsed deflection system for linear accelerator 7954
- recording system for plastic film 958, 6354
- scanning device for infrared detection 7942
- scanning electron microscope, contrast and resolution 2558
- secondary emission, initial electron velocities and space charge 4352
- sheet, in periodic fields, focusing theory 1705
- sheet, focusing with tape ladder lines 6849
- sheet, magnetic deflection focusing 1706 [6859
- space-charge flow, in magnetic field, paraxial formulation
  - three-dimensional 6312 [1704
- space-charge waves, comments on paper by D.H. Travena
- synchrotron, focusing methods 7962
- thermal noise, reduction 8020
- thermal spreading in electron gun, effect of mag. field 5104
- thin, power flow and stored energy 5101
- travelling-wave tubes, e.m. wave propagation constants 902
- var. velocity, in lossy medium effects 4342 [5103
- velocity modulated with finite diameter, nonlinear theory

Electron guns
- aperture-type electron lenses with space charge 6856
- coaxial, in Iatron image-storage tube 8009
- electron microscope, resistance bias characteristics 3693
- electron trajectory tracings of electrostatic gun designs
- in furnace heating for growing Si ingots 2222 [6854
- grid-controlled, high-perveance, design and performance
- high transconductance wide-band for c.r.t. 3692 [4351
- low-noise, for klystrons 4334
- for low-noise X-band backward-wave tubes 3688
- O-type focusing, theoretical investigation methods 6305
- Pierce-Cauchy problem, stability of computation 8015
- Pierce, conversion to triode and multi-triode systems 6855
- Pierce electrodes for convergent strip beam 4356
- testing and recording of current density 6313
- thermal beam-spreading, effect of mag. field 5104
- for trav. wave tube, partially magnetically screened 8021
- for travelling-wave tube, 0.3μP 8019
- triode electron injection, for hollow beams 4355
- triode with beam former electrode 3049
- very high convergence design 8013

Electron lenses (See also Electron optics).
- aperture, spherical aberration due to path angle and lens curvature 3694
  - round and slit, in anodes of plane-parallel diodes 6856
- magnetic quadrupole, for particle accelerator 7963
- three-stage electrostatic analyser of electron velocities 6860
- unipotential, analysis by digital computer 6310

Electron microscopes (See also Electron optics).
- deflection focusing 6853
- gun, resistance bias characteristics 3693
- high-resolution Czech design 4357
- scanning, contrast and resolution 2558
- stabilized h.v.d.c. supplies 7339

Electron multipliers (See also Secondary emission; Thermionic tubes).
- meas. of spectral response of gas-discharge lamps 4817
- use as light-pulse generator 7941
- with grid control 7945

Electron optics (See also Electron beams; Electron guns; Electron lenses; Electron microscopes; Particle accelerators).
- e.s. analyser of electron velocities, three-electrode lens, and applic. 6860-1
- triode gun with beam former electrode 3049

Electron-wave tubes (See Thermionic tubes, u.h.f.; Travelling-wave tubes).
- No entries this year

Electronic equipment (See also Power supplies to apparatus; Printed circuits).

Equivalent circuits - contd
of transistors, with h.f. small signals 2395
hybrid pi, freq. dependence of y-parameters 6280
junction, frequency response 1656
large-signal, switching-time calculation 7932
as linear amplifiers 6229-30
mixer circuit 2313
modification due to base voltage-gradient 2401
output capacitance 883
physical parameters and geometry 2155
with resistive emitter load, equiv. Y parameters 1665
temperature dependence 1657
thermal processes 3658
visual system of mammals, Perceptron simulator 8524
Excavators
electric drive, low-inertia system 6045
Exciters
a.c. generator with perm. magnet excitation, external characteristics 43
brushless systems, analysis 7157-8
compensated circuit impedance and asynchr. torque 6588
d.c. motor, voltage control, transfer function 2664
fast excitation systems 4649
for low-speed water turbine-generators 4667
magnetic-amplifier systems 342, 2748, 7338
mercury-arc convertor sets for rolling-mill drives 5341
motor-driven, performance with voltage regulators 1291
regulation of group of generators in hydroelec. station 5437
shunt and separate excitation, improved eff., motor-generators 650
for small synchronous motor, stability of controller 5363
speed of response and load regulation problems 4749
synchronous excitation, variable-polarity 6592
sync. generators, control methods 5436, 6593
auxiliary equipment 7171
comparison of circuits 4648
rapid response 4655
grid-control rectifiers 1197, 6589
field suppression 46, 3970
self-excited, design 5348
stabilization surges or short-circuits 5351
sync. machines, model representation 2675
stability of auto. control systems 7321
frequency and 1st derivative 2744
transient behaviour fed by controlled rectifiers 5998
turbogenerators, automatic regulation 2745
for variable-frequency generators 7188
voltage regulated, response tests 2008
voltage regulation using semicond. diodes 1289
Explosions
exploding wires, sq.-wave pulse generator 2317
firedamp and explosion-proof motors 1185-6, 4672-3
flame-proof equipment, intrinsic safety tests 5293
hazardous situations, risk-free signalling 4757
intrinsically safe equipment, testing methods 7062
tracking-current predischarges on insulating materials 4778
underground nuclear, shock time-of-arrival meas. 7437

Facsimile transmission (See also Television).
bandwidth reduction, weather maps by teletype lines 423
high-speed multistylus recorder 4505
image simulation and interpretation 8322
meteor-scatter transmission over 900 mile path 4504
narrow-band image transmission system 5854 [2593
pattern detection and recognition, computer programmes
picture transmission from satellite 5830
Fading (See also Radiowave propagation; Reception quality, radio; Signal strength).
bearing and amplitude of fading wave 476
complex patterns, 16 and 19 metres, 900km path 990
correlation coefficient determination 1810
detection of binary signals, error probability 7909
fading-rate recorder 1422
f.m. binary-code transmissions, controlled by received field-strength 8187
l.f. waves reflected from ionsphere 8271
line-of-sight path at 36 Gc/s 6946 [1847
medium-wave, characteristics, night-time, 300 to 1000km
microwave, influence of atmospheric duct 996
moon-reflected 480 Mc/s signal 5219
multisection f.m. links, probability distrib. of noise 2511

Fading - contd
nonindependent, multiple diversity 2512
phase-shift keying in fading channels 446
polarization, use of satellite sigs. for ionosphere study 5220
post-sunset, on long-dist. h.f. networks 8278
potential noise stability of signal 1848, 8103
radio links, analysis of microwave fading 1846
automatic control of transmitter power 6361
statistical distribution 5772
rapid frequency analysis of fading signals 6945
rapid periodic, medium-wave transequatorial signal 8260
rapid, 3cm waves on line-of-sight paths 3120
rhythmic, on shortwave sigs, analysis 6389
s.w. transmissions, statistical analysis 2513
scatter propagation beyond-horizon, S- and X-band 8267
short-wave fadeouts with reported solar, flares 5811
telegraph signals on fading f.m. carrier, error probabilities 8258
u.h.f. tropo. scatter, selective, on overland paths 3764
10cm waves, as function of aerial azimuth 2514
Fault currents (See also Short-circuit currents).
arcing in l.v. distribution networks, protection 7360
deliberate faults to test carrier protection systems 131
double earth faults, generator protection 3372
double phase-to-earth faults, resistance calc. 89
earth conductor dimensions in power cables 4701
earth faults, limitation on o.h. lines by earth wires 138
"earth voltages" in directly earthed star-point systems 6038
interconnected networks, decrement calculation 14
network earth fault, transformer overvoltages 2016
transient recorder, magnetic-drum 1418
voltage gradients in earthing of a.c. substations 1305
on 25kV traction system, interference in telecomm. lines [6636
Fault location
automatic monitoring system for missile-detection radar
automatic system, electronic equipment 7413 [8304
power and telecom. lines, radar method 1352
power cables 2799
pipe-type o.f. 725
survey of methods 3399
use of echometer 4797
h.f. and pulse methods 4795-6
submarine-types 1353
pulse methods for small motor armatures 7415
slide-wire bridge apparatus 2843
transmission lines, pulse methods 2800
methods and equipment 1230
Feeders (See Transmission lines).
Fences (See Electric fences).
Ferrites (See Magnetic materials).
Ferroelectric substances
applns. in microwave region 4115
$BaTiO_3$ high dielectric constant mtls., characteristics 4056
$BaTiO_3$, switching current 2106
nonlinear capacitors, triple ferroelec. systems 7564
review, theory and applications 7392
voltage-variable varactors, optimum figure of merit 7918
Ferroelectricity

Field-plotting (See also Electrolytic trough).
automatic plotter for harmonic fields 187
flux in permeable sheet with edge hole 1974, 5298
Field strength measurement
controlling transmission of f.m. binary-code data 8187
in parallel-plate e.s. precipitators 1452
radiofrequency (See also Signal strength, r.f.).
calculation for effective earth radii, any aerial height and frequency 5819
daily variations of back-scatter f.s. 470
from earth-satellite transmissions, calc. 1875 [8251
at focal point of paraboloid aerial, to produce gas discharge
in h.f. fields, equipment and procedure 2806
interference, 30 to 225 Mc/s 4090
meas. of earth conductivity, long- and med.-wave 1842
meter for 1 to 10 Gc/s 190
in resonant cavities 6721
sky-wave propn. at broadcast frequencies 8262
Sputnik I and II, British radio observations 4501
television, propagation tests, Band IV, colour and b.a.w. 3803
correlation with picture quality 6488
u.h.f. transmissions, trees near receiving aerials 6486
v.h.f. and u.h.f. bands 6485

Field strength measurement - contd
radiofrequency measurements - contd
tropospheric v.h.f. propn. beyond-horizon 8266
v.h.f. over Irish Sea and mountains 3763
variations over long periods, 40-1000 Mc/s 6393 [3762
vertically polarized l.f. signal, radial paths from transmitter
Fields, electric (See Electric fields).
Fields, magnetic (See Magnetic fields).
Filters (See also Networks).
absorptive, for microwave harmonics 2923
analysis using digital computer 8473
applications of piezomagnetic ferrites 7539
auto-tuned, for panoramic receivers 1813
branching, for circular waveguide 4962
bridge-type T circuit, variable bandwidth 789
Chebyshev charact., method of approximation 1490
for chrominance sub-carrier freq. in N.T.S.C. colour television 1890
circuit for unshifted signal filtering of nonstationary random variable 8359
comb, analysis 788
effect of p.r.f. instability 4937
design, using analogue models 2243
for protection of carrier telephony equip. 4760
using approximation theory 5604
for dm-waves using periodic inhomogeneous cable 4936
tables 7642 7649
distributed bridged-T, semiconductor monolithic structure
effect of pulses with constant and varying amplitude 2279
electromechanical, using 1.6 kc/s tuning fork 7643
design 246
types 1492
torsional, theoretical analysis 1494
as narrow-band filter 7645
even-order monotonic response 2245 [5596
flexural piezo-elect. vibrator in form of balanced cantilevers
frequency correction of e.m. oscillograph characteristics
Gaussian-response, design 4935 [6096
generalized operational charac. 3511
image parameter square-frequency, design 6162
Kupfmuller transient formula 7815
LC in series with parallel-T 2242
l.f., transients during transmission of video pulses 2278
using thermistors 5605
ladder, insertion-loss equalization, computer analysis 7019
design by potential analogue in electrolytic tank 3509
signal flow graph method from function determination
maximally-flat amplitude-response 6169 [7651
maximally-flat time-delay 6170
linear matched detection, design criteria 7646
linear trans. systems, effects on wideband noise 7639
matched-filter communication system, delay lines 4223
mode, in helix waveguide design 278
multidimensional space filters, basic concepts 3512
n-cascaded, difference-equations solutions 7063
nonlinear, optimization 1493, 3508
for non-stationary random processes in linear control systems 8368 [409
optimal filtering of periodic pulse-modulated time series
optimum linear digital, mean-square output noise power [408
optimum linear least-square smoothing and prediction 8098
optimum to produce peak signal from noise 6808
output probability density with random sq. wave input 1736
parallel bank of RLC, interchannel correlation 4398
periodic with stationary random inputs, analysis 6163
phase correction in television transmission 8329
phase-equalization 2244
power transfer, analysis 1491
for prediction of stationary random signals 8101
prescribed characteristics, design methods 7640
pulse shaping, design 7638
pulsed sinusoid matched, output s.n.r. meas. 3406
RC, output probability-density 4399
for radar pulse-compression systems 3784
rational functions with constant imaginary part 6153
relay protection, for inverse-sequence symmetrical components 2078
for separation of signals and noise 3507, 6161
smooth limiters, signal/noise ratios 416
symmetrical quadripoles, sign of charac. parameters 7644
synchronous filter-generator for telemetering systems, effect of noise 8453
synthesis by potential analogues 3510

Filters - contd
synthesis from operating parameters 6164
synthesis using gyromagnetic coupling through single crystal garnets 1509
survey of h.f. types and circuits 7647
third-order Bessel, pulse signals in noise, analysis 2248
time varying, minimum noise output 7648
transistorized active l.p., for telemeter multiplexer 3830
transmission-line, multi-layer, analysis 5603
tunable waveguide types using yttrium iron garnet 7686
tuned pi-section, effect on rectang. h.f. pulse 787
for very low frequencies, without inductors, design 7641
waveguide rejection, using higher-order modes 2922
wideband, harmonic suppression in mixer circuits 2314
Wiener theory, partly sampled systems 6507
band-pass
Chebyshev characteristics, recurrence formulae 7653
Chebyshev tenth-order, design 790
coaxial resonator, loop-coupled 249
continuously variable audio-frequency 7652
coupled-resonator types, 880-2300 Mc/s 3513
for distributed amplifier, 300 Mc/s bandwidth 7827
electromechanical using PZT disks 1497
h.f. line traps, carrier transmission power lines 5158
low-pass, prescribed delay and amplitude charac. 7650
cascaded RC, sub-audio freq. 2246
with Chebyshev functions 2896
mean square value of random signal 7431
theoretical limitations of gain-bandwidth product 6166
optimum Chebyshev 3rd order 247
waveforms in digital data transmission 2247
narrow-band, for random signals 8094
output frequency with frequency-phase modulation 7903
quartz half-section, calculation 4156
RC, Butterworth low-pass transfer functions tabulation 6731
RC parallel-T, design and use 7632
for r.f. multiplexing of telemetering transmitters 3843
for seismic ghost reflections, elimination 2898
strip-line magic-T, wideband design 4183
symmetrical two-section, with equal ripple response, element coefficients 6165
three-pole, design 248
variable, use of ferrites 7654
for waveguides, design 286
band-pass, for radio-link switching 287
Fires
automatic protection, requirements and devices 1124
transformers, protection method 68
water sprays for transformer fires 619 [7272
water spraying near h.v. lines, recommended distances
Flashlamps (See Lamps, discharge).
Flashover (See also Discharges).
charac. of paper—oil insulation, d.c. apparatus 7394
on conductive surfaces 6066
electrode surface conditions and d.c. corona 8024
pin-type insulators, effect of predischarges 6618
rod gaps, spread of discharge voltage 5457
surge diverters, portable test equipment 700
Flaw detection (See Mechanical testing, non-destructive).
Fluctuations (See Fading; Noise, electrical; Signal strength).
Fluorescent lamps (See Lamps, discharge).
Fluorescent screens (See also Electroluminescence).
for c.r. tubes, surface brightness, influence of binders 6852
CdS photoconductive sintered layers, prep. and performance
Conference (Garmisch, 1956) 3001 [1683
display devices, panel type, review 6830
Flux, magnetic (See Magnetic fields).
Fluxmeters
exptl. flux-pattern detmn. in mag. cores 4084
meas. on synchrocyclotron 5512
recording type 2147
Foundry practice (See also Castings).
arc furnaces, design 6702
furnaces, coreless induction, design 6701
furnace for lead smelting, load regulation 128
inductive stirring for arc furnaces 2878
waveguide components, manufacture 2919
Frequency (See also Harmonics; Stability).
No entries this year
Frequency-changers (See also Frequency-dividers; Frequency-multipliers).
contactor type, for speed control of induction motor 5378
using magnetic amplifiers 2328

Frequency-changers - contd
med. freq., induction motor driving alternator with permanent-mag. rotor 3994
rotating, 50 to 400 c/s, transductor voltage-regulator 4868
for 400 c/s aricraft supplies 2672
for aircraft variable-speed generator 2673
servocontrolled switch for frequency regulation of variable-speed generator 3968
high-frequency
ferrimagnetic multiple signal conversion 1500
frequency-synthesizing networks, theory 4996
harmonics from neon discharge in waveguide 8022
use of klystrons 4338, 4340
mavar, time dependent series resistance of capacitance diode 3622
microwave freq., bunched circulating electron beam 6249
mixers, crystal, noise figure and operating temperature
transistor, equiv. circuit 2313 [975
for airborne radar 4949
sum and diff., design charts 2314
i.f., mixer current higher order components and choice of frequency 5193

negative feedback, active and passive elements 2951
parametric amplifier, energy relations 5031
parametric diode up-convertor 7882
parametric, symmetrical matrix analysis 7892
phase-locked maser divider using parametric diodes 4221
S-band doubler using garnet disk 3587
self-oscillating, transistor circuit 3089
transistors operated beyond cut-off 7925
tunnel diode, noise figure 5675
u.h.f. "down-convertor" 4997
Frequency-dividers (See also Frequency-changers; Multivibrators).
analysis and second-order equivalent circuits 7812
aperiodic, variable division ratios 7813
binary, use in transistor chronometer circuit 7734 [7740
cascode trigger circuit, using p-n-p and n-p-n transistor 4220
use of delay lines and anti-coincident circuits 4220
with direct synchronization 6785
electronic organs, divider circuits 6784
fractional bistable counter and calibrator 841
high-resolution, two circuits 7806 [842
pulse, using diode-storage integrator and blocking oscillator 1578
by semiconductor nonlinear capacitor diode 1578
series and parallel systems compared 6215
stabilized locked-oscillator, analysis 2315
Time Encoder electronic timing equipment 7814
with transistor blocking oscillator 334
velocity-modulated electron-beam tube 2420
Frequency measurement
a.f., frequency-multiplier circuit 4219
caesium freq. standards, comparison 1362, 2266
frequency drift 3534
complex instantaneous freq., definition and meas. 251
Doppler cancellation method applied to satellite transmissions gravitational red shift 5845
Doppler shift of satellite radio transmissions 5843-4
goniometer applic. 1357
on high-power s.w. transmitters 5779
instantaneous freq. of f.m. oscillations 1360
interferometer, broad-band r.f. 747
using l.f. standard-frequency radio transmission 1359
oscillator fluctuations, digital meas. of beat frequency 6069
photomech. wave analyser for seismic pulses 2847
quartz-crystal oscillator, stability meas. by NH_3 maser 4199
quartz-crystal standards, variations 1361
r.f. spectroscopy, phase-sensitive detector 7907
satellites, Doppler freq. shift and minimum range 8299
for time definition, elect. units and standards 3922
transistor characteristics meas., 20-1000 Mc/s range 4086
variation of quartz oscillators and earth rotations 4099
wavemeter, high-Q Q-band design 6098
450-8200 Mc/s, sweep-freq. equipments 3445
Frequency-meters (See also Wavemeters).
cavity type, 3.6 to 4.25 kMc/s 1415
for fluctuations in 29625 to 29635 Mc/s range 1414
logarithmic integrator, theoretical study 4849
using Zener diode 2848
Frequency modulation (See Modulation, frequency; Receivers, radio).
Frequency-multipliers
aperiodic, a.f., for freq. meas. 4219
combining of two frequencies 2950
doubler used as instrument transformer 663
using Hall effect 7808
harmonic generation, class-C circuit combined with distorting rectifier 3586
high-order, using klystron 4337
magnetic modulator, perpendicular fields 4267
phase stability and meas. 5648
quadrupler circuits for 50 to 200 c/s supplies to electroluminescent panels 7807
by semiconductor nonlinear capacitor diode 1578
semiconductor circuits, 1W output at 1 Gc/s 7811
short-gap mercury arc, millimetric wavel. 2260
static, for induction heating 4686
for variable frequencies, c.r.t.-photocell method 1576
Frequency regulation (See also Synchronization).
aircraft generators, automatic method 6631
direct compensation 3975
excitation regulation, sync. generators 2744
in large interconnected systems, load-frequency 7337
hydroelectric network 3349, 5429, 7322
load shedding and underfrequency protection 2767
Pelton turbine, governor optimization 3937-8
of rotating invertor 1292
speed of Kaplan turbine, efficiency and stability 2739
steam power stations, network requirements 3348
synchron. generator, stability of servo. control 5898
of transistor inverter circuits 4687
of variable-freq. induction generators 7188
of variable-speed generators, survey 2761
water turbines, speed-governing systems 7089
high-frequency
a.f.c. for l.s. radio telegraphy 6359
a.f.c. system in transistor waveform-analyser 7520
automatic Q-meter resonance peaking 2067
automatic, use of resonant cavity 3749
for c.w. Doppler radar systems 6435
carcinotron, sole voltage control 906
coaxial cavities, temperature compensation 4146
klystrons 7992
reflex, servo method 2760
transistorized synch. circuit 6846-7
transistor stabilizer 2422
of multivibrator, magnetically coupled 302
astable 7715
transistor 1538
oscillators, review of methods 7344
by n.m.r. 2263
stability, cathode impedance 2926
stable RC 2759
synch. at combination frequencies 4198
stability of crystal-controlled transistor 1537
use of delay line 813
phase-locked, effect of noise on operation 7697
quartz crystal, mechanical stress by bimetallic strip 3748
Rb gas-cell frequency-standard 4194
radio transmitters, common control 6915
spectrum-selection a.f.c. of pulse systems 1522 [4588
of swept-frequency acoustic testing equipment 1-60 kc/s
transient processes using ferrites 867
voltage tuning in tunnel-diode oscillator 7732
Fuel
coal, direct transport from pithead to power station 6569
high-efficiency use in power stations 7099
low-grade, effects on power station equipment 7132
natural gas, comparative costs of energy transport 7248
power stations, drying methods 3276
supply in Denmark 7081 [7249-51
transport costs compared with elec. power transmission
Fundamental concepts (See also Circuit theory).
common network theorems, general form 4947
determination of mag. and electric fields by method of images 3926, 5299
difference equations, and applications 7063
dimensionless physical quantities 5294
e.m. waves, physical classification 7667
electromag. field, forces and field strengths 3931
interpretation of equations 5297
energy stored in dispersive medium 2615
flux distr. in permeable sheet with edge hole 1974, 5298
flux through polyhedral surfaces 3929-30

Fundamental concepts - contd
Heaviside's expansion theorem, extension 6715
instantaneous frequency of signal 3714
iron-cored circuit with air gap, analysis 2858
magnetic moment and mag. charge, definitions 7076 [6537
Maxwell equations, criterion for uniqueness of solutions
operational calculus, trends 7066
permeability,apparent and intrinsic at cm wavelengths 4107
potential fields, new method of determination 2794
RL circuit with half-wave rectification 5070
skin effect, calc. of waveform with pulse input 3242
speed of electromag. wave and props. of medium 625
tensor form of Maxwell's equations 7067
transform techniques, graphical analysis 7073
transformer core, revised electromag. theory 5984
two-dimensional field round conductor, use of Biot—Savart law 3924
units, mutually independent quantities 7065
unit system interpreting 4π as solid angle 6538
volt-ampere, complex representation in a.c. circuits 7075
3 ph. systems, space vector and symmetrical components [7148

Furnaces (See Electric furnaces).

Fuses
exploding-wire, instrumentation 7532
expulsion type, thermal charact., calc. 4754
fused load-breaking isolators, stresses 4733
h.r.c., and miniature c.b's., discrimination 113, 2735
h.v. high rupturing-cap. new type 4752
high-cap., review 2076

l.v. high power, props., review 2075
protection of h.v. power transformers 694
protection of semiconductor rectifiers 76
semi-enclosed, analysis for perf. prediction 4753

Gain measurement (See also Attenuation measurement).
microwave, random-noise sources 4804
transistorized a.f. level generator 4836

Galactic noise (See Noise, electrical, extraterrestrial).

Galvanometers
amplifier design 6788
deflection micrometer for reflecting types 6082
errors when used as integrators 6670
feedback systems 2159 [4089
moving-coil and moving-magnet, sensitivity and performance
ribbon and taut suspensions, deflection and zero stability
tunable galvan. amplifier 3437 [2158
volt.-sensitive, design for moving-coil 4829

Gas-discharge tubes (See also Ignitrons; Lamps; Radiation counters, gas-filled; Rectifiers, metal vapour; Thyratrons).
anodes, luminous spot formation
arc. disch., microwave switch tube 7684
argon noise sources, S-band charact. 401
cathode fall theory, ionization in dark space 914
corona discharge and appln. to volt. stabilization 4365
corona stabilizer tubes, charac. and applic. 908
effect of magnetic fields on output 4361
excitation conditions, c.r.o. display method 8027
firing control with auxiliary electrodes 912
gas-discharge manometer, onset times of discharge 5712
Geiger-Muller, cathode work function and operating charact.
He—Ne mixtures, glow disch. charac. 3698 [3057
H_2 and D discharges below critical pressure, similitude and anode materials 4366
hot-cathode diode as h.f. switch 5108, 5709
hot-cathode, noise spectrum of a probe 2434
inert gas cleaning mechanism 4360
ion-sheath behaviour, Hg-arc rectifier 6323
l.p., cathode emission measurements 2433
l.p. Hg-vapour, anode oscillations 1708
l.p., production of X-rays 3700
microwave noise and effect of mag. field 5711
noise generators for 3.0 to 8.0 Gc/s 4202
microwave noise, temp. charact. 5112
reference tubes, impedance freq. charact. 3705
space charge below Paschen PD minimum 4363
stabilizers, operating characteristics 1712
survey of developments 6838
thermionic emission meas. 4788

Gas-discharge tubes - contd
three-electrode surge protector for telephone lines 6028
TR, self-contained low arc-loss design 4186
u.v. light sources 7576 [913
vapour or gas density meas., oscillations on small anode
cold-cathode
use in ACCESS electronic switching system 321
applications in photoelectric control circuits 7946
effect of argon content on charac. 3701
c.c. discharge in mag. field, ion energies 3058
for character and number display 2435
construction and gas-filling techniques 3703
counting tubes, non-destr. read-out 2437 [1457
electron-emitting cathodes, chem. and thermochem. studies
use in electronic register-translator for S.T.D. 1749
low-noise electron-beam plasma amplifier 660
microwave neon, harmonics 8022
negative glow plasma as cathode 6294
neon tubes as music generators 298
use in process timing control relay 915
tube circuits, survey of applns. 2436
voltage stabilizers for photomultipliers 8026

Gas discharges (See Discharges).

Gas-pressure cables (See Cables).

Generation (See Power stations; Supply).

Generators (See also Exciters; Surge generators).
a.c. and d.c. permanent-magnet, for road vehicles 7156
aircraft, reliability analysis 3967
ripple characteristics and meas. 3357 [2662
high-quality insulation and thermo-mechanical strength
magnetohydrodynamic 705, 3935, 7103, 7159
protection systems, recent developments 4037
silicone insulation, use up to 500°C 1343
thermionic, potential distrib. between electrodes 7983
thermomagnetic, using gadolinium 759
alternating-current
for aircraft use, review 40
high-temp. system, analogue study 3884
a.f.c. systems 3975, 8631
solid-rotor type 3977
design with field-form envelope control 39
direct liquid cooling, water pressures 4659
exciter voltage-regulation 1289
by mag. amplifiers, transients analysis 2748
excitation methods for motor-generator set 650
fast systems 4649
frequency-changer, with permanent-magnet rotor 3994
50 to 400 c/s, transductor voltage-regulator 4868
gas-turbine driven, barge-mounted 4666
high-power 3 ph., comparison of exciter and voltage-regulation circuits 4648
hydroelectric, efficiency measurements 7087
output limitations 7178
stator windings, drying method 5357
economic effects of various electric parameters 5979
without machine rooms 5358
insulation testing by manufacturers 5350
liquid-cooled, duct flow-resistance meas. 5966
low-frequency, charac. and industrial applic. 2677
medium-frequency, transductor voltage-regulator 4867
mica-type insulating materials, survey 7393
mobile sets, with voltage regulation 2653
motor-generator set for proton synchrotron, power metering equip. 4852
Scherbius control set 4675
no-break diesel generators for telecomm. supplies 3284
with permanent-magnet excitation, analysis of external characteristics 43
pole-face losses, laminated shoes, analysis 5960
potential field near stator 2794
power supply for synchrotron electromagnet 4689 [3292
premagnetizing windings for hysteresis-cycle correction
protection methods, review 4038, 5450
relay protection, review 7353
rotor binding ring using Al alloy 5347
rotors of turbo-alternator, centrifugal stresses 5978
self-excited 500 kVA design 7172
self-regulating, with variable-speed drive 41
ship auxiliaries, voltage regulators 7332
with Si rectifiers for motor-coach gen. system 2765
standby telephone-exchange supply, auto-starting system
static stability, equiv. generator 3947

Generators - contd
alternating-current - contd
for synchrotron-magnet supply, control system 4735
tachometer for speed meas. 2134
transistorized volt. regulator 3355
variable-frequency, excitation systems 7188
voltage regulation, use of transductors 4865
water-wheel, construction and testing of stators 4665
alternating-current, asynchronous
aircraft, functional cycling of control equip. for reliability 3232
field symmetry, 3 ph. operation in 1 ph. network 7190
induction, water-turbine-driven, advantages 51
two-pole induction, with solid rotor yoke 1202
alternating-current, synchronous
aircraft power supplies, voltage regulation 7336
constant-freq. variable-speed 2672-3
parallel systems, load transfer oscillations 5331
automatic regulator, stability of frequency and voltage control 5898
auxiliary winding to increase stability 1198
balanced 3 ph. loads, voltage harmonics 4664
compounding methods 7174
concrete stator frames, comparative study 5976
constant-frequency a.c. using variable speed 3968
with controlled compounding 4660
cooling, rotor with hydrogen, stator with water 5352
hydrogen, shaft seal design 47
hydrogen, modified for higher H_2 pressure 7177
internal, of windings 7175
direct gas methods 2013
coupled to induction motor, electromech. transients 3290
differential protection, current-transformer design 3367
division of reactive load between generators, loss calc. 2465
dynamic stability, computer studies 5349, 5921 5309
excitation, control systems 2745, 5436, 6593
brushless, analysis 7157-8
by d.c. generators, rapid response 4655
group regulation 5437
fast systems 7338
fast systems, magnetic amplifier type 6590
response speed and load regulation 4749
with grid-controlled rectifiers 1197, 6589
of low-speed hydroelec. turbine generators 4667
field suppression by discharge resistor 46, 3970
frequency regulation, power networks 2744
hydro-electric generator, repairs to cracked rotor spider 7182
insulation failures, survey 3295
load-angle meas. equipment 1363
loss measurements 1200, 7181
magnetic rotor end-bell, end field calculation 7173
meas. of rotor oscillations on load 2011
models for 3 ph. system, simulation 2012
non-salient-pole types, short-circuit torques 7179
output, future trends 7170
overspeed protective equipment 136
permanent-magnet, voltage stabilization 6019
theory 4663
phase-angle and synchronous reactance meas. 1364
protection, against double earth faults 3372
in base-load stations 4756
surge, unit-connected sets 5456
pump-turbine units 3952
rapid starting of 34 MW set 4737
resynchronization 5356, 6570
after loss of dynamic stability 6591
review, modern construction methods 5354
rotor spokes of umbrella-type turbo-generator, shearing due to airgap asymmetry 7176
self-excited, auxiliary equipment forstarting 7171
static stability of auto. control 2563
design of excitation systems 5348
self-synchronization 5444
sequence control of starting in power station 6567
short-circuit currents, calculation 1199
short-circuit oscillograms, analysis using computer 652
with sinusoidal output waveform 3294
stabilization during surges or short-circuits 5351
stator frame, model for vibration tests 44
synchronization, automatic method 4033
synchronizing and asynchronous torque calc. 2671
system disturbance and transient-torque and load angle 1366

Generators -contd
alternating-current, synchronous - contd
three-phase, transient reactances, meas. 2669
transient currents, self-synch. expts. 5977
umbrella type, for Ybbs-Persenbeug station 4661
55 MVA for hydroelectric station, Norway 5353
variable-speed, frequency-regulation systems, survey 2761
very large units, economic aspects 7180
voltage regulating systems 2063, 4606, 4743, 4866
characteristic curves 6018
60MW, controlled starting tests 3969
350 MW, for Drakelow power stations 45
direct-current (See also Rotating amplifiers).
in aircraft, observation of commutation, new method 5344
arc-welding, suitability tests 2010
commutator sparking 2658
compared with resonant transformer for industrial radiography 2432
exciter regulation by magnetic amplifier 342
field-current control, use of shunted rectifiers 6014
output voltage meas., capacitor-divider method 1348
radioactive "batteries", with double energy-conversion 5049
road vehicles, semiconductor voltage-regulator circuits 2752
self-excited, voltage regulation with additional external excitation 6585 649
for short-circuit testing, stability control of s.c. current
for very high voltages, survey of circuits 1453
voltage regulator, transistorized circuit 5435, 7343
electrostatic
calc. of current in circuits 2863, 5543
corona suppression with compressed air 2865
counter-emission suppression in compressed air 4127
ionic propulsion for space vehicles 2866 1446
rotating type with insulating conveyor and oblique field
secondary emission causing output reduction 1445
self-exciting, length of insulating caolumn 6686
survey and future trends 2200
collecting electrode, theory 7566
design for low retrograde electron current 7567
injector for electron synchrotron 7569
for irradiation of materials 1447
semiconductor research applic. 7568 212
2 MeV, with monoenergetic proton beam, design and applic.
thermo-electric
air-conditioning of submarines 6696
Cs diode, a.c. generation at 100 kc/s 6131
characteristics with constant heat flux operation 6130
cooling cells, transient response and ripple effects 7605
lumped parameter analysis 4912
for transistors 3027
d.c. operated thermoelec. heat pump, progress review 5583
figure of merit 2218-19, 5585
large-scale power by direct conversion 4641
measurement of materials characteristics 5587
oxide-cathodes, properties meas. 5690
PbTe, optimum parameters 4913
for power generation, review 1474, 6553
progress review 5584
refrigeration devices 5588
refrigeration system for submarines 5586
review, types and applic. 2217
semiconductors, review 3488, 7601
meas. of properties 743
figure-of-merit 7602
use up to 700°C 6809
operating properties 6697
solar-powered, design 2220 4136
solar-powered, optimum geometry of reflector-absorber
survey of possibilities 233
synthesis, design procedure 6698
thermal resistance of source and sink 7603
thermionic, figure-of-merit 3487
with close-spaced impregnated cathode, theory 4323
anode emission and space charge 5589
thermocouples, reducing response time-lag 175
low-noise amplifier 339
magnetic-amplifier voltage convertor circuit 2327
for temp. compensation of strain gauges 6658
commercial types compared 4106
use up to 2800°C 3489
multichannel recording of data on c.r.o. 5524

Generators - contd
thermo-electric - contd
thermo e.m.f. method for plating thickness meas. 2821
thermoelec. spot cooling, applic. 234
for voltage meas. in coaxial lines, up to 30 Mc/s 6671
with 100W output, design 6699
Glass (See also Ceramics; Insulating materials).
sealing, effects of leaching and silicones on surface conductivity 4780
television camera lenses, insensitive to gamma-rays 2556
for thermionic-tube manufacture, characteristics 7975
Glass-metal seals
ceramic-titanium sealing 7977
envelope design for semiconductor devices 370
epoxy-resin joints for h.v. tubes 4317
lead-in wires for thermionic tubes 1693
for submarine cables, reliability 2039
surface conductivity, effects of leaching and silicones 4780
terminal accessories gas-press. monitored telecom. cables [5755
Glossaries
No entries this year
Ground-fault neutralizers (See Arc-suppression coils).

Hardness testing (See Mechanical testing).
Harmonic analysis (See also Waveform analysis).
harmonic analyser, 0-50 kc/s 7521
spectrum analyser with 450-track paper record 6097
Harmonics (See also Distortion; Oscillations; Waveform).
alternator design for field-form envelope control 39
effect on mercury-arc rectifiers, analysis up to 5th 6611
even, effect on magnetic amplifiers 3597
in mag. ct. of testing transformers 2684
meas. bridge, interference in telecomm. lines 7501
meas. on high-power s.w. transmitters 5779
from neon discharge in waveguide 8022
salient-pole generators with balanced 3 ph. loads 4644

Heat pumps
progress review, U.K., thermoelectric designs 5583
Heat treatment
furnaces, elec. resistance, design 6700
and ion bombardment, effects on Si diodes 6270
Heating (See also Electric heating).
curves, measurement and evaluation in conductors 7080
junction temp. in transistor with pulsed input 1653 [7194
rotors of induction motors, direct-on starting, temp. rise
temperature rise, machines and transformers 7147
and current capacity of busbars 108
thermal stresses in dielectric of r.f. capacitors 7570
transformer windings, with natural oil circulation 5376
buildings
combined lighting—air conditioning 2207-8
district heating, from Hasselby Power Station, Sweden 7126
economic trends in U.S.S.R. 2630
domestic, exptl. investigation 2221
survey 4917
economic appraisal, Norway 2876
floor warming, survey 4137
principles and practice 2882
analysis 773
off-peak, for glasshouses 772
Stockholm, waste heat from nuclear station 7141
using transformer heat-losses 3983
High-frequency measurements (See also Q-factor measurement; Standing-wave indicators; Transmission lines, h.f.; The measurements of specific electrical quantities are listed separately, e.g. Power measurements, high-frequency).
apparatus, list of manufacturer's products, Germany 163
for wideband coaxial cable circuits 3446
for complex signal environment testing 6759

High-frequency measurements - contd
attenuation meas. on waveguide components 192
bandwidth meas. of microwave resonator 6651
dielectric constants, in waveguide, graphs of complex function 729
frequency fluctuations in 29625 to 29635 Mc/s range 1414
group-delay meas. at 4 Gc/s 1416
high-frequency measuring techniques (book) 162
high resolution Faby-Perot interferometer 4093
interferometer, broad-band r.f. 747
microwave, analysis by signal flow graphs 4064
microwave scattering—studies, apparatus 2226
noise and field-strength meter, 1 to 10 kMc/s 190 [191
nonlinearity meas. on transmission lines for broadcasting
permittivity meas. of liquids at u.h.f. 4799
phase-centre distribution of spiral aerials 8240
r.f. power and voltage, bridge design 7505
relative phase-shift at microwave frequencies 4102
resonance resistance of therm. tube oscillatory circuits at u.h.f. 4195
Russian equipment, exhibition review 4094
semiconductors, bulk lifetime, microwave method 2152
spectrometer, mm-wave, horn aerials 468
waveguide modes, by spinning dipole technique 186
spurious modes 166
Hotplates (See Domestic appliances).
Hunting (See Mechanical oscillations).
Hydraulic engineering (See also Dams; Water power).
electrification plan for N.E. Brazil 6554
pumped-storage plants, structural and planning 6574

Ignition (See Electric ignition).
Ignitrons
control circuit, bias shift method using variable d.c. 7242
use in elec. locomotive 7364
Empretron, with switching rates up to 5 kc/s 5999
firing characteristics 1224
switching of h.v. high-current discharges 1225
thyratron-controlled, pulse welding system 8537
transient behaviour, feeding exciters 5998
transients due to arc extinction 7243
Illumination (See Lighting).
Image convertors
CdS sintered layers, prep. and performance 1683
image-forming systems compared 7938
infrared, modern types 7939
Image storage tubes
for bright radar displays 1881
for data recording and storage 5705
electrostatic memory for computer 6534
Iatron, circuits for high-brightness radar display 8314
Iatron, two coaxial guns 8009
infrared data display 8012
in oscilloscopes for impulse testing 7515
R.C.A. 6866/Eng. Electric E 702A transient-storage oscilloscope 3048
for radar bandwidth compression 3783
targets, new designs 6309
Impedance (See also Admittance; Resistance).
No entries this year
Impedance matching (See Transmission-line theory, high-frequency).
Impedance measurement (See also Admittance measurement).
auto-balancing type instrument 6090
balanced circuits, correction of errors 6038
bridge instrument, new type 7496
a.c., accuracy 4091
a.f. 720
modification for higher voltage loading on sample 5489
of carbon film resistors 7384
of cathode interface 2117, 5490
characteristic, of split coaxial line 272
coaxial slotted line, 30 to 300 Mc/s 6088
of diode cartridge at microwave freq. 4276
of half-wave aerials for m.w. broadcasting 6923
impedance-diagram applications 7407
interaction impedance in waveguide by propagation-constant perturbation 4792
of lead-acid accumulators 1472
magnetostrictive toroids, theoretical investig. 5509
metre and dm. bands, slotted Lecher line 2170

Impedance measurement - contd
precise methods for dipoles 8216
quadripole, hyperfrequency charact. imp. by semi-graph. method 5599
Impulse currents
in earth electrodes, math. analysis 1309
Impulse voltages (See Insulation testing, impulse; Transient voltages).
Inductance
of eccentric tubular conducting system 3324
simulation of, high-Q method 6729
Inductance measurement
a.c. bridge using differential transformers, for creep-test meas. 2167
coils of low Q, constant-impedance method 5491
lead-in wires of u.h.f. miniature tubes 1692
Maxwell bridge, mechanical coupling for balance convergence 744
mutual, standards coils, Campbell type 2194
square-wave bridge instrument 5521
Induction accelerators (See Betatrons; Synchrotrons).
Induction heating (See Electric furnaces; Electric heating).
Induction motors (See Motors).
Induction regulators (See Transformers, regulating).
Inductors (See Coils; Reactors).
Industrial economics
depreciation of elec. plant, theory 7091 [5713
work factor of electronically controlled production line
Information theory (See also Communication theory).
applications in science 2450

optimum digital filter, mean-square output noise power 408
optimum noise stability parameters, telemetering systems [3196
optimum synthesis of multiple control systems in Weiner sense 253
optimum systems, general Bayes criterion 6329
polynomial signals in additive stationary noise 412
potential noise stability with fading signals 8103
power law nonlinearity, statistical spectral output 2451
quantizing for minimum distortion 6330
radar reception methods 1021 [4396
radar theory, invariant for ambiguity and distance functions
random signals, narrow-band filtering 8094
randomization of noise source combinations using delay lines 6327
real correlation processes, noise relationships 5737
recurrent events in Bernoulli sequence 4400
rectangular wave functions and sign correlation 410
Information theory - contd
and related electronic techniques 3715
Riemannian rate of information, paradox 419
run-length coding of pictures, probabilistic model 4508
semi-separable processes 6336
sequential detection, experiments 865
signal theory analysis 5736
signals in noise, comparison of detection methods 8100
sampling rates 6883 [1734
sinusoid plus Gaussian noise, cumulative distr. functions
speech intelligibility, meas. instrumentation 8096
stationary Gaussian signals, independent samples 8095
stationary random signals, prediction 8101
statistics and telecommunications 5731
Information theory - contd
television, information-content reduction by quantizing 508
redundancy and bandwidth compression 2542
time duration or uncertainty, and assoc. uncertainty relations 6882
unique decipherability 4391
Instrument bearings
No entries this year
Instruments (See also Measuring apparatus; Individual instruments are listed separately, e.g. Bridge instruments; Voltmeters).
aircraft types, new display systems 3172
atmospheric waveform recorder 2846 [6669
auto. digital recorder for impeller-type current-meters
auto. recording electromag. balance 4076
axis-crossing intervals, digital meas. 7438 [6663
axial accelerometers, trajectory data on re-entry missiles
b.f.o. for audio, ultrasonic and video frequencies 6744
ballistic reverberation meter 3424
brushless generating magnetometer, TIM 2148
calibration, apparatus and methods 4851
quantity-production types, rationalization 184
calorimetric dosemeter for electron-beam generators 4855
CERN conference, instrumentation for high energy physics
complex types, uncertainty of zero 2157 [7489
constant-resistance network with universal-shunt properties
contact failure, use of adsorbent C getter 5513 [3434
continuous-balance potentiometers, survey 2164
continuous sig. seismograph 2832
counting local lightning flashes 5638
current integrator 5516
d.c. moving-coil, 250° taut-suspended 1395
data recording on 35 mm magnetic film 8175
differential transformer transmitter, equiv. circuit 3987
digital instrumentation system for jet-engine testing 1095
direct-reading high-accuracy, a.c. current voltage and power 7486
for discomfort glare evaluation 224
echometer for cable-fault location 4797
effects of mechanical vibrations, review 2618
electrodynamometer power comparator for watthour and wattmeter testing 3454
exposure meters, comparative tests 4105
fluctuometer, meas. of 'wow' in recordings 1791
gamma spectrometer, up to 1 GeV 7769
with auto background subtraction 7768
Ge and Si wafer, thickness meas. 3642
heating units, design 6080 [4093
high resolution Faby-Perot interferometer, mm-waves
high-speed wide-chart recorders 1400
for homogeneous suspension reactor 5515
hysteresigraph, design 4080-1
inductronic electrodynamometer 200
insertion-loss meas., self-tuning equipment 6675
for inspection in industry, based on nuclear radiation, survey 4856
ion chambers at high fluxes, a.c. operation 3706
ionization-gauge control circuit 1423
l.f. generators, characteristics, recommendations 3435
linear ratemeter for G-M counter, auto-range-changing
load-curve recording 7526-7 [6761
magnetic balance, quartz-fibre system 7468
mass spectrometer, transistorized power supply 4748
meas. of dynamic sound-pressures in missile-launching pit 6661
meas. of internal d.c. resist., galvanic cells 4834
for meas. on coaxial-cable carrier circuits 3446
measuring operating parameters of cranes 3413
multipole, for a.c. measurements 2160

Instruments - contd
multipoint digital strain-gauge recorder 754
for nuclear power stations, survey 750
for control of nuclear reactors 2624, 3171
number indication using miniature c.r.o.s. 4987
optical digital, design 4853
PERCOS, performance coding system 3061
photoelectric meters, calibration 4854
photomicrometer, for c.r.t. line light-intensity profile meas. 7528
for plasma propulsion systems 7090
potentiometric, Zener diodes as voltage references 1405
potentiometer, step-by-step, as digitizer 6085
programme level meters for broadcasting 2176
protection method, neon-lamp shunt 6634
radiation monitor, for radar transmissions 5528
using single transistor 6867
rate gyros, cross-coupling errors 6662
recording, for strain-gauge output 1945
continuous, review 7531
wide-chart high-speed 7530
transistor amplifier circuit 6797
rectifier types, selectivity 7008
reflectometer, meas. analysis by sig. flow graphs 4064
ribbon suspensions, stability 2158
Russian audio and r.f., exhibition review 4094
in satellites, Pioneer I and II 4561
Explorer VI 4568
for screening of cytological smears 2830
sound-level meter, transistorized 7533
stray voltage or current pickup, elimination or compensation 7488
telephone-dial test apparatus 6078
test equip. for subjective tests, TV receivers 3155
transfer function analyser 4101
transient recorder for transmission lines 7246
transistor applications 3436, 6234
nuclear-reactor control and protection 751
transistor current-gain meas., 1-300 Mc/s 1388
for use in cardiac research 2448 [2901, 5608
variable-parameter networks, theory of steady forces
visual, for illumination meas. 7462
watthour meters, review 6677
wave analyser and distortion-factor meters, survey 7519
for wow and flutter meas. on tape recorders 8170
X-Y recorder, design 1403
yarn-speed meter for textile meas. 3420

Insulating materials (See also Dielectric characteristics; Dielectrics; Ferroelectric substances).
ageing, calculations 152
weather and storage compared with thermal 7390
CdS single crystals, pre-breakdown process 6641
coordination by functional testing of apparatus 4055
in d.c. cables, dielectric breakdown and thermal instability gaseous discharge phenomena 4006 [4009
digest of literature on dielectrics (1958) 1322
flashover on conductive surfaces 6066
intrinsic elect. breakdown, emission theory 4777
potting and impregnating, survey 715
organic, for tropicalized equipment, review 714
rutile, contact electrification 5669
sheet insulation, resist. to surface discharges 3401
silicon nitride thick films 2105
solid, surface charges after h.v. electric discharge 2104
in homogeneous medium, diel. behaviour 1324
solid-type power cables, gas-filled cavities 5396
thin sheets, resistance to surface discharges 4779 [4778
tracking currents, predischarges as cause of explosions
asbestos
electrical properties and iron content 5484
ceramic
electrets with ceramic dielectric 2198
flame-sprayed, as h.s. electromech. transducer 153
high dielectric constant, characteristics 4056 [7970
low-loss, characteristics for thermionic-tube construction dielectric props. at Q-band 5495
mica-glass, for high-temp. use 149
nuclear radiation effects 1325
porcelain insulators, mech. strength rel. to dimensions 98
ultrasonic testing 613
composite
mica-bitumen interface, voltage stress 7389

Insulating materials - contd
fibrous
capacitor dielectrics, internal discharges 1349 [2701
impregnated-paper bushings, "corette" model test method
Kraft pulp, thermal deterioration, study using mass spectrometer 2108
oil-impregnated paper in transformers, deterioration 150
paper h.v. d.c. cable, gaseous discharge, phenomena 91
paper for capacitors, i.r. spectroscopy studies 6052
paper-insulated wires in transformer oil, ageing tests 2792
paper-lapping in h.v. cable, theory of lapping 5397
paper, oil-impregnated, gas evolution when electrically stressed 6642
h.v. cables, impulse strength meas. 157
paper-oil, flashover charac. in d.c. apparatus 7394
Permalex, cyanoethylated kraft 7395
gaseous
air, breakdown voltage with gamma-radiation of rod gaps A.I.E.E. Subcommittee test cell, experience 2119 [6057
air, h.f. breakdown, up to 10 Gc/s 6056
breakdown in vacuum betw. graphite electrodes 6058
diel. constants meas. apparatus 2169
review, factors affecting electric strength 716
SF_6 in power transformers 5369
glass
glass-epoxy laminates, elec. and mech. props. 717 [1326
fibre, as insulation and construction material for l.v. equip.
sealing, surface conductivity, effects of leaching and silicones 4780
seals in submarine cables, reliability 2039
varnished glass cloth, thermal stability 5483
liquid
capacitor impregnants, ageing and dielectric losses 7573
non-draining compounds for cables 2109
oil, luminous spots on test-gap electrodes 1328
oil, survey of 1958 C.I.G.R.E. 1327
space charge effects, meas. 7396
transformer oils
ageing related to composition 154
behaviour with glow discharges 4057
ionization in large transformers 5375
meas. of properties 7418-19
passivated, tests in distribution transformers 6643
quality related to insulation resistance 2693
mica
composite, for large generators, survey 7393
thickness and resistivity relationships 713
plastics
air-styroflex cable insulation, elect. strength 2111
for cables, properties, reference list 1776
and accessories 2113
operating experience 1239
sheathing, rodent damage 7284
double insulation for hand drills 2100
effects of gamma radiation 6645
epoxy resins, breakdown in non-uniform fields 1342
developments in h.v. apparatus 1340
meas. of elec. props. 169
breakdown voltage tests 4782
joints in high-vacuum tubes 4317
insulators, effects of humidity and pollution 1248
films, mechanical testing apparatus 2610
foamed, props. and applns. in telecom. cables 1337
Formex-covered wires in transformer oil, ageing tests 2792
glass-epoxy laminates, elec. and mech. props. 717
h.v. engineering, survey 1334
laminated, heat and moisture effects 1338
for large generators 2662
non-draining compounds, physical props. 2790
organic materials, testing methods survey 1329
p.v.c., for cable insulation, voltage limits 7280
heat-resisting, survey 2110
plasticized p.v.c., breakdown strength 1335
polycarbonate foil manufacture and application 1331
polystyrene as capacitor dielectric 4880
polystyrene derivatives, characteristics 3391
polythene, for h.v.d.c. cables, discharges 91
effects of corona 2114
in power cables 4698
resin-bonded glass cloth metal-film resistors 3389
in submarine cable, pressure at interface of dielectric and inner conductor 6005

Insulating materials - contd
plastics - contd
switchgear applications 1268-9, 1330, 1341, 4058
epoxy resins 1271-2
synthetic resins, impregnation and bonding charac. 2791
thermosetting, assessment by dielectric and pressure tests
thin sheets, resistance to surface discharges 4779 [6644
Terylene, varnished, heat ageing 6055
foil, props. and applns. 1336
testing methods for h.v. applications 2118
rubber
butyl, props. and applns. in cable industry 1333
hard rubber, C-black compounded, resistor charac. 5481
silicone, accelerated ageing 7405
silicones
applications in machines and transformers 7399
effects of gamma radiation at 25°C 1323
effect of high temp. and nuclear radiation 1332
liquid, breakdown voltages, 1-10 Mc/s 6053
properties, survey 7398
properties and applications, review 7397, 7400
use in transformers 2112, 7217
for use up to 500°C in generators 1343
textiles
No entries this year
varnish
shellac, microwave dielectric loss 3392
solventless impregnating, use in electric machines 1180
wire coatings in transformer oil, ageing 5482
wire enamels, compatability with epoxy resins 6646
wood
No entries this year
Insulation (See also Transformer insulation; Wires, insulated).
ageing calculations 152 [4683
current transformers, type selection and standardization
h.v. equipment, coordination for surge protection 3364
machines
class A random-wound-motor insulation life and field tests 1181
corona prevention in slots 2007
corona suppression 5339
d.c. tests, effects of temperature 7414
enamelled wires, compatability with epoxy resins 6646
generator windings, insulation testing 158
use of glass and silicones 4781, 5980
impulse testing, reflection of pulses from windings 2121
life expectancy, A.I.E.E. Standard tests 1354
with varying load 2006, 5338 [7393
mica—resin combinations, for large generators, survey
moisture content meas. 5492
reconstructed mica 5967
silicone materials, applications 1179, 7399
effect of high temp. and nuclear radiation 1332
up to 500°C 1343
synthetic resins, h.v. applications 1339
turbo-alternators, drying of stator 5357
thermal ageing 151
Insulation testing (See also Fault location).
ageing tests, Formex and paper-insulated wires in transformer oil 2792
bushings, "corette" model method 2701
cables, 225 kV, methods 7277
under load 4060
capacitor dielectrics, internal discharges 1349
coordination with functional life tests of apparatus 4055
d.c. overpotential, preventive maintenance 4061
detection of internal breakdown of dielectrics 170
discharges, observation and detection 6064

Magnetic materials (See also Powder cores).
analogues of relay-contact logic networks 6212
for automatic control and computers, 1958 Russian literature survey 7542
for use in card-mounted telephone equipment 5157
conference summary, Sheffield (Sept. 1959) 6106
core—transistor circuits, multichann. p.p.m. system 6262
cores, hysteresis-loop display 7477
current steering in mag. core shift registers 6210
electrical sheets, props. and meas. 2187
electrical sheets, meas. in lab. and in manufacture 2142
ferromagnetic, Berlin conference 7537
core alloys, effects of high temp. on mag. props. 3467
rods, rectangular, eddy-ct. effects 3465, 5533
Ferroxdure, as d.c. motor rotor 59
flux distribution, effect on iron losses 3468
garnets and ferrites, X-band ferromag. resonance 4111
Hall-effect multiplier for r.f. use 6806
I.R.E. conference report (1959) 6794
for magnetic amplifiers 2328
characteristics and performance 2964
metallic-tape computer cores, nondestr. readout 6533
microwave applns. of ferromag. and ferroelectric mats.
mumetal, ferromagnetic after-effect 3463 [4115
Nico layers, as high-speed storage elements 6781 [3462
Ni—Fe alloy, reversible permeability and demagnetization
Ni—Fe and Co—Fe alloys, freq. dependence of permeability, 10^5-10^7 c/s 2188
permanent-magnet, review 204, 2190
sintered, of $Fe_{12}O_{19}Ba$ type 7546
permeability meas., detector for permeameter 7470
progress review, microwave applications 6138 [5173
recording tape, autoradiographic detmn. of Fe distribution
magnetic props. 959
effects of environment on characteristics 6352
residual stresses, ultrasonic detection 7058
solid-state switching and memory devices, Conference report 3869
square-loop cores, setting, use of transistor 6774
survey of types and applications 7534
thin-films, computer memory elements 757, 1565, 2298, bibliography 758 [6108
as balanced modulators 3632
flux measurement 5511
nsec reversal 4108
cylindrical, mag. excitation, theory 5532

Magnetic materials - contd
Permalloy, flux reversal-time meas. 6679, 7474
Permalloy, in parametron, 500 Mc/s 3619
square-loop oblate spheroid, magnetic fields 6103
hysteresis loops 7535
h.f. parametrons for computer logic 8460
parametric amplifiers 7893
transformer cores, shape and characteristics 1213
cold-rolled sheets, production and props. 2186
magnetostriction losses 4821
effects of high temp. on mag. props. 1430
voltage—area concept 203
twistors and bit wire components, electrodeposited 6104
twistor, for reversible diodeless shift register 1426
uses in telecommunications, review 2180
ferrites
barium-oxide, effect of manufacturing method on mag. props.
bibliography, digital magnetic circuits 758 [7538
conference summary, Sheffield (Sept. 1959) 6106
cores, losses for various shapes 7536
partial switching 3466
for television receiver l.o.p. transformers 5867
coincident-current computer store, operation 6678
dipolar modes of oscillation, theory and practice 3538
Faraday effect at mm. wavelengths, temp. and freq. dependence 5534
ferromagnetic amplifiers using yttrium iron garnet 2988
ferromag. resonance, at L-band and high peak-power levels
flux reversal, soft ferromagnetics 3457 [4110
inhomogeneous gyrotropic media, microwave model 2185
integrated circuits for synchronous sequential logic machines 4992
large samples, magnetostatic resonances 6109
line width and gyromagnetic ratio 7540
low-remanence, switching behaviour 4858
memory-cores, current-pulse generator for testing 2144
performance deterioration at high power-levels 2853
permeability and dielec. constant meas. at 3 Gc/s 7476
permeability, stability 2854
Perminvar, props. and charact. 2182
perturbation in resonant cavities, theory 2887
piezomagnetic, filter and ultrasonic applications 7539
properties as rod cores in inductors and transformers, 2-80 Mc/s 3464
properties meas., resonant cavity methods 3427
properties meas. in rectangular cavity resonator 742
sintering temp. and physical parameters 4112
soft, characteristics at microwave freq. 4113
spheres, grinding techniques 2184
temperature control in waveguide components 289
thick film toroids, effect of geometry 4109
in waveguides, surface e.m. waves 794 [7687
cylindrical, field components and energy-flow density of elliptical cross-section 803
resonant isolator, theory 4188
ferrites, applications
aerials for radio receivers, design 8230
attenuator for reduction of intermodulation 1819
of barium ferrite magnets 2183
control element in a.f.c. systems 867
core logic circuits using no diodes 7790
core—transistor switching circuits, applic. 3578
cores, equiv. circuits 2851
counter and decoder apparatus 3559
developments, review 2181
domain-wall cores for fast switching 3573
in double pump degenerate ferrite amplifier 3631
elastic switching properties, square-loop mats. 3576
Ferreed switching device 4878
ferromagnetic amplifiers, garnet in microwave cavity 1610
parametric, 5930 Mc/s 1611
films, logic and storage devices, new design 3458
filter with variable tuning 7654
garnet disk, S-band doubling 3587
gyromagnetic coupling and filter synthesis 1509
magnetic after-effect in engineering materials 2179
microwave applns., study 4114
props. and applns., review 3456
realizability of Boolean functions 7798
in square-wave modulator, mm-range 868
storage systems for computers 755, 1427
addressing and shift registers 322

Magnetic materials - contd

review 3426
mechanical quantities (See also Transducers, electro-mechanical).
accelerometer and pressure meas., variable reluctance transducer 3838
aircraft runways, profile variations 6659
angle or linear displacement transducers, survey 2819
angular-position digital disks, manufacture 7028 [6663
axial accelerometers, trajectory data of re-entry missiles
biological flow and process tracing using n.m.r. and e.p.r. [4381
capacitive transducers, sensitivity and linearity improvement 7454
checking cylindrical shape of rotating machine parts 1367
counting fish in dam passes 3064
crystal oscillator as transducer 812
digital angle-measuring transducers 1371 [6194
disk encoder for angular position, non-ambiguity of output
drift meas. on single-axis floated gyro, automatic method [735
dynamometer balance for induction-motor torque 2174
dynamometer, meas. of angular deflection 3418
eddy-current methods, meas. of size of large objects 7482
eccentricity in metal tubes 7451
electrolytic potentiometer 2165
electromag. balance, auto. recording type 4076
flow resistance of acoustic insulation 2130
pre-balance transducer in process control 2814
force—current transducers, design and applic. 2132
instruments for cardiac research 2448
jet-engine testing, digital instrumentation system 1095
liquid level and slosh in rocket fuel tanks 5505
liquid level and temp., oil-refinery tanks 1369
moving machinery parts, speed, velocity and momentum meas. 1376
of muscle under servocontrol 3193
operating time and conditions of cranes 3413
optical shaft-position encoders 1049
oscillator equip. for vibrating-wire strain gauges 3414
particle size, resistance counting method 5133
multichannel photoelec. scanner 2175
piezoelectric transducers, review 2815
plethysmograph for blood volume meas. 172
rate gyros, cross-coupling errors 6662
recording of size changes in pupil of eye 178
screening micrometer, meas. of small movements 4812
semiconductor strain gauges 4810
static strains in vehicles 1370
strain gauge signals, multiway bridge 3410, 6071
strain gauges, creep under static tensile load 4809
stroboscopic vibration analyser 1375
torque transients in synch. machines 1365 [5500
torsion and bending, railway axles, strain-gauge applic.
transducers, using inverse-Wiedemann effect 4077
for small movements or capacitances 3423 [2137
transmission dynamometers, using sine-wave oscillators
turbine efficiency, sod. bichromate dilution method 2831
turbine rotor blade, damping decrement meas. 3416
turbine speed, eccentricity, expansion, vibration, instrumentation 5506
vector principles of inertial navigation 4068
vibrations, Mc/s range, capacitive detector 2818, 6654
integrating and differentiating amplifier 6798
piezoelectric transducers 2133
weight, carrier-frequency system, weights up to 1g 7865
review of elect. and electronic methods 4813
classifying and counting road vehicles 734
of food packages 1050
elect. and mech. methods 171
recording meter 2823

Measurement by electrical methods - contd
mechanical quantities, distance
airborne profile recorder 498
altitude meas. from aircraft, survey 4806
auto. dist. meas. equip., transient and steady-state phenomena 4808
denier recorder for synthetic textile yarns 6076
dynamic strain calculator 6656
echo-sounder, miniature 4070, 4807
electronic, atmospheric limitations 6073
conference, Washington (May 1959) 6072
electro-optical distance meters 6074-5
filter for elimination of ghosts, seismograph trace 2898
Ge wafer thickness in transistor production 2820
geodesy systems 738
i.r. detector controlling automobile braking system 6997
inductive transducer for movement registration 732
internal dimensions of waveguide, capacitance method 7450
level-sensitive electronic switch 835
liquid-level, capacitance bridge 7456
mechanical separation of two liquids, phase method using v.h.f. radio waves 7457
microwave thickness detector 2822
plating thickness, thermal e.m.f. method 2821
position meas. system using optical gratings 7452
radio-isotope thickness gauge 5507 [3417
relative displacement meter, using slidewire transmitter
resistance of metal layer on deformable substrate 8528
road deflection under load 2131
seismograph using continuous signals 2832 [1368
small displacements at 50 c/s to 2 Mc/s, capacitive method
strip steel, meas. of length by pulse recording 4072
surface roughness, microwave method 4811
surveying, electro-optical method 1372
transducer using divided circle and coded scale 3419 [7442
ultrasonic method, applications in under-water television
underwater echo-location systems 2817, 3065, 4071
electronics sector scanning 2141
wire diameter, continuous gauging 3409
mechanical quantities, pressure
acoustic, electrostatic squarer 8155
ballistic reverberation meter 3424
blood-pressure, continuous automatic system 5726
differential-pressure transducer, design 2129
dynamic sound-pressure level meas. in missile-launching pit 6661
intracardiac catheter, tip pressure gauge 6877 [6878
intra-ocular press. meas. for glaucoma diagnosis 4383,
in ionization chamber, using isotope source 177
lathe-tool cutting-force meas. equipment 733
liquids, diaphragm capacitance gauge 7453
pneumatic system, digital, with core memory 3556
recording manometer using photocell 2813
thermistors as manometer, 1 to 10^{-4} mm Hg 737
mechanical quantities, velocity
accelerometer, high-current pulse generator 7804
angular acceleration transducer, induction tachometer 7447
binary gas mixtures, auto-separation 5273
blood flow, ultrasonic 8058-9
pulsed ultrasonic method 8060

gated sine-wave electromag. method 8062
chopper-operated electromagnetic method 8063 [8064-6
square-wave electromag. meter, theory and probe design
d.c. electromag., design 8067
Potter electroturbinometer 8074
auto-recording bubble type 8075
isothermal probe using thermistors 8078
probe using temp. sensitive coils and heater wire 8079
Doppler methods, review and bibliography 7444
flowmeter, for low conductivity liquids 2150
fuel, correction of dynamic errors 4104
frequency-to-period-to-analogue computer 7049
gas flow rate, and turbulence meas. 3422
auto. control 5272
impeller type current-meters, auto. digital recorder 6669
linear tachometry for machine tools 4069
liquids, bulk flow rate, elec. conductivity method 1377
moiré fringe methods, counter circuit and phototransistor [6660
passing road vehicles, two light-beam methods 2829
pneumatically transported grains, isotope method 7449
of projectiles, photoelectric method 2136

Measurement by electrical methods - contd
mechanical quantities, velocity - contd
relation between two wind speeds 7445
space vehicles, use of radio star emission 7446
stroboscopic methods, electron-multiplier light-pulse generator 7941
tachometer, for induction-motor speed meas. 7448
electronic, for automobile engine 176
for attenuator speed meas. 2134
tracer method of fuel flow metering in aircraft 3554
water flow rates, electromagnetic nozzle 2135
in hydroelec. station pipeline 2828
wind velocity, telemetering instrument 8440
yarn-speed meter for textile industry 3420 [3421
zero-speed monitors, appln. in sequence circuit schemes
moisture
resistance meas. instrument, 10^3 to 10^7 ohms range 7495
wood poles, probe electrode design 4814
optical quantities
absorption, photomultiplier bridge circuit 3408
c.r.t. line light-intensity profiles, photomicrometer 7528
daylight factor meter 6077
exposure meters, comparative tests 4105
flaw detector for paper manufacture, photoelec. app. 3415
illumination, visual instruments 7462
infrared detectors, survey 7459
light-intensity-telemetry 1381
luminance and lux meter 753
luminance meas., instruments and methods 7461
luminous intensity diagrams, auto. recording 179
optical digital instruments, design 4853 [2593
pattern detection and recognition, computer programmes
recording oximeter 4384
screening of cytological smears 2830
smoke-density, photocell system 7460 [4817
spectral meas. on lamps, secondary electron multiplier app.
thermal quantities (See also Bolometers).
arc temperature in welding, recording spectrophotometer method 7466
infrared detection of aircraft and missiles 8293
resistance-thermometer 2140, 2824-5, 6666, 7506 [7464
rotor temperature of asynchr. machines, slip meas. method
satellite telemeter system for earth's thermal radiation meas. 8445
shielded coaxial leads for low-temp. meas. 4088
surface temperature, up to 500°C, non-contact method 1378
current-carrying objects 4067
film-resistor thermometer 3425
temperature meas., use of nuclear resonance 7483
detector time lag 7465
precise methods, survey 4815
of fuel injection nozzles 7463
cathode-ray tube cathodes 2139
survey 1380
on rectifiers and machines 173
of frozen foods, telemetry methods 8446
of water, capacitor thermometer 174
grain silos, use of flexible pendant 4816
ambient air, transformer tests 2827
temp. monitoring in nuclear reactors 736
thermal charac. of semiconductor devices 1379
thermal emissivity of therm. tube electrode materials 2138
thermal radiation detectors, commercial types 4106
thermistor, portable bridge instrument 2844
temp. control circuit 7349
transmission of temp. data 6527
simple circuit with low thermal lag 5502
thermocouples, for use up to 2800°C 3489
reducing time lag of response 175
transient temp. in solid body 2826
time
clocks, electrodynamic regulation 7441
synchronization of widely separated devices using Loran-C nav. system 7440
movements, rate and amplitude recording 7436
fault-analysis instruments 3411
coincidence circuit with time analyser 4073
counter chronometer, using oscillator and scaler 7751
digital meas. at axis-crossing intervals 7438
fast photomultiplier and coincidence system 7944
flight tests of "atomic" clock 5623
nine-channel analyser using trochotron and crystal oscillator 5633

Measurement by electrical methods - contd
time - contd
radio time-signal recording circuit 3412
radioactivity, levels meas. 4074 [7437
shock time-of-arrival meas. underground nuclear explosions
slave indicator clock with seconds indication 7435
switching time in semiconductors, sampling oscilloscope method 7429
time analyser, for half-life metastable states 7439
design improvements 4075
Time Encoder electronic timing equipment 7814
time sig. comparison, delays, exptl. and theoretical determination 4818
warm-up time of thermionic cathodes, instrument 7443
Measurement by magnetic methods
eddy-current inspection, progress in techniques, equip.
flowmeter for recording cardiac output 2836 [3233
fluid flow, servo-operated null-balance method 5503
surface hardness of flame-hardened steel 3234, 5927
winding ropes, electromag. testing methods 2611
mechanical quantities (See also Mechanical testing, non-destructive).
No entries this year
Measurement principles
galvanometers used as integrators, errors 6670
nonlinearity of pulse circuits by comparison method 4977
uncertainty, accuracy and sensitivity problems 3393
Measuring apparatus (See also Electrolytic trough; Instruments, Network analysers; Oscillographs; Standing-wave indicators; Transducers, electromechanical).
a.c. precision voltmeters and ammeters, error determ. up to 20 kc/s 5485
autographic recorders, time signal recording 3412
automatic processing of analogue data 4587
auto. electron-tube testing equipment 4822
auto. recording, magnetic meas. in hot cell 1385
beam-profile indicator for particle accelerator 752
camera, intermittent-action with absol. time calibration
circuit-breaker arc-energy meas. 6099 [201
control and calibration level standard 2116
direct metering for transformer analogue computer 4583
effects of nuclear radiation, satellites and missiles 4554
electrometers, use of feedback 1401
for exploding-wire fuse research 7532
fading-rate recorder, radiowave propagation 1422
for field strength meas. in h.f. fields 2806
goniometers for h.f. meas. of phase angle, frequency, admittance 1357
high-frequency measuring techniques (book) 162
high-frequency techniques, list of manufacturer's equip. Germany 163
instrumentation of weapon trials, APAR data acquisition system 3889
l.f. signal generators and oscillators, survey of types 1525
level meas. equip., 35 kc/s-15 Mc/s 4097
luminance and lux meter 753
for meas. in acoustics 1373
meas. in elect. model techniques 6060
multichannel photoelectric scanner for particle-size analysis 2175
multiple types, for a.c. measurements 2160
noise meters for 0.15 to 20 Mc/s, input impedance 6962
nuclear physics app., transistor applications 310
nuclear power stations, survey 750
PERCOS system of performance coding 3061
phonocardiographic, standardized and calibrated 4376
photoelectric, for luminance meas. 7461
programmed test set for electronic equipment 749
pulse generators, detector and indicator for computer circuit testing 6652 [7048
recording, photoelectric reader of ink lines on strip charts
recording weight meter, servo-controlled 2823
in short-circuit testing laboratory 4783
signal amplitude distribution meter 195
for speech intelligibility meas. 6096
sweep-freq. equipment, 450-8200 Mc/s 3445
sweep generators, British types, survey 5628
transformer for d.c. meas. up to 100 kA 185
ultramicrometer, for meas. of magnetostriction in steel sheets 4821
ultra-short lifetime meas., photo-injected carriers 183
v.s.w.r. indicator with automatic read-out 193
for weighing, mechanical and elect. methods 171 [1964
for weld current, weld force and time, resistance welders

Mechanical engineering
mail-sorting machines 2592
code translator 1955
Mechanical measurements (See Measurement by electrical methods; Measurement by magnetic methods; Transducer, electromechanical).
Mechanical oscillations
aerial towers, guyed and self-supporting, wind-induced vibrations 4710
amplitude or phase modulation devices 863
build-up during acceleration of rotating machines 2656
electronic equipment, forced oscill. of spring—mass system with damping 8045
space requirements 921
h.f. vibrations in plates, tuned detector 6654
induction motor, self-oscillating, survey 6598 [3082
loudspeaker diaphragms, meas. of amp. and phase distr.
in machine construction, investigation methods 8530
machine stators, determination of natural frequencies 2655
magnetostrictive transducer, equivalent circuit 7708
measuring, damping, effects on instruments, review 2618
megacycle range, by electrostatic drive and freq.-mod. detection 2818
nonlinear vibrations, graphical analysis 3805
o.h. line conductors, damping tests 672
mobile lab. for vibration meas. 6647
causes and cure 7253
vibratory stresses near point of support 2710
optimum damping 673
vibration tests, 345 kV line, single and double 1235
penstocks, vibration 22
quartz plates, contour vibrations 6720
rotor balancing, synchronous condensers 3296
single-phase electromagnets, elimination of chatter 2856
stability in induction-motor synchronous tie 4668
stroboscopic vibration analyser 1375 [2674
synchron. motors, torsional vibrations, computer analysis
transients in sync. generator—induction motor system 3290
transformer windings, response to applied surges 6604
turbogenerator stator frame, model tests 44
ultrasonic pulses from piezoelectric vibrators 8531
vibration in synchronous-machine bearings 7184 [6798
vibration meas., integrating and differentiating amplifier
Mechanical regulation (See Regulation, mechanical quantities).
Mechanical testing (See also Quality control)
displacement meas. over long periods, inductance bridge
domestic switches, automatic testing app. 7305 [2167
dynamic strain calibrator 6656 [3331
impact strength of insulator strings for bundle conductors
missile electronic app., loudspeaker noise gen. 5167
plastic films, pneumatic machine 2610
strain gauges, temperature compensation using thermocouples 8529
stresses in turbo-alternator rotors 5978
swept-frequency acoustic tests, 1-60 kc/s equipment 4588
vehicle performance measurements 1370
vibration tests, automatic control 1120
vibrations in machines, investigation methods 8530
non-destructive (See also Radiography, industrial).
detector cars for railway track fault detection 1314
eddy-current, pulsed-field method 8532
bolt holes, flaw detector 7055
of metal tubes, choice of freq. 4589
review 3233 [5931
electrode potential testing for surface inclusions in metals
electromagnetic, fault detection on non-ferrous pipes 7056
mine winding ropes, electromag. methods 2611
surface hardness of flame-hardened steels 3234, 5927
turbine rotor blade, vibration damping 3416
ultrasonic, pulses from piezoelec. vibrators 8531
residual stresses in ferromag. materials 7058
irradiated fuel elements 5929
of wires 5930
bond quality in honeycomb sandwich panels 7057
reference blocks for checking apparatus 3911
cavitation erosion of transducers 1122
porcelain insulators 613
of welds 612, 1965
X-ray, of welds, radiation exposure control 6536
hot ingots in rolling mill, continuous method 5928
image-intensifiers 5107
Mechanical transmission (See also Bearings).
magnetic fluid clutches, torque calculation 3384

Medical science
acoustic impedance of human ear and P.O. standards 5762
active bioelectric membranes, electronic control 3229
artificial larynx, transistorized 819
audiometer, transistorized, for children 3066
betatron, 35 MeV, radiology applic. 387
biological tracing using paramagnetic resonance 4381
blood flow estimation by pressure sensing techniques 8072
blood flow meas., ultrasonic method 8058
Potter electroturbinometer for use in dogs 8074
injection of indicating fluid, concentration curves 8077
frequency-band requirements 8076
isothermal velocity probe 8078
blood flow meas., probe for pulsatile flow 8079
radioisotope methods 8080
bristle methods, review 8081

time-redundancy instrumentation system 1059 [6663
trajectory data on re-entry, capability of axial accelerometer
Mixers (See Frequency-changers, high frequency).
Modulation (See also Velocity-modulation tubes).
amplitude or phase, electromech. methods 863
anode-modulated grounded-grid circuit 6261
asymmetric signals, optimum operation 862 [5801
binary code transmission, error rate for a.m. and f.s. mod.
chopper, transfer function using servo-motor as demodulator 6255
d.c. to a.c., survey of types 2993
Modulation - contd
transistor, for d.c. amplifiers 2992
photocell, d.c. amplifier drift correction 2994
circuit analysis, application of sampling function 5032
circuits with periodically operated switch, steady-state analysis 2357 [3641
combined amplitude and phase mod., for one-sided spectrum
comparison of systems, speech communication 7895
for telemetering 4565
d.c., drift correction in amplifiers 359, 3634
distrib. function, signal plus noise 1734
efficiency comparison for space communications 5836
frequency distribution of power in broadcasting 357
intermod. reduction by pre-receiver attentuation 1819
mm-wavelength, semicond. diode 1620
noise level in case of envelope demodulation 5034
Ovitron electrochemical device 5540 [3196
optimum transmission parameters for given noise level
range and grid current in grid-controlled tube 5090
recovery of band-limited signal after companding and band-limiting 5663
rectifier type, analysis by successive approximations 4259
input impedance calc. 361, 4264
with freq.-selective terminations 358, 4260
ring modulators, characteristics and design 6256
magnetic, theory 1627
use of Si diodes 3633
telemetering, methods for noisy channels 3195
tests on ionospheric-scatter link 972
vocoder control sigs., analysis using correlator with Hall multipliers 6257
amplitude
amplitude-phase, spectral analysis 7896
chopper type, for d.c. amplifier 2991
contact modulation, amplifier input circuits 2990
data-transmission system, computer simulation 5285
excitation of linear systems 4258
germanium p-i-n structure in waveguide, mm-wave 6742
using ground-base junction transistor 887
Hall-effect multiplier, for r.f. use 6806
design and perf. 870
limits for distortion on carrier systems 6254
mμsec logic circuits at X-band 2292 [5033
narrow-band speech transmission, time–frequency scanning
ring-type, for direct currents 2995
single-sideband methods, for radio 456
compatibility 6910
peak power calculation 2989
suppressed carrier, new technique 5035
signal generator using synchros. 3822
using symmetrical Si transistor, for low-level d.c. 5664
synchronous, of d.s.b. a.m. signals 1619
transistor square-wave, in analogue multiplier 3455
using thin ferromagnetic film 3632
transductor circuits with series capacitors 2196
in waveguide, using klystron 4336
frequency (See also Discriminators; Receivers, radio; Transmitters, radio).
carrier of p.t.m. radio system 5038
compatible stereo. broadcasting system 5037
detectors, theory 1623
discriminator-detector, Snyder circuit for telemetering receiver 7905
distortion, with white-noise modulation 866, 2997, 7902
caused by tandem-connected filters 2361
relation to transfer function 2998
calculation 5665
fundamental and harmonic 3636
double f.m. telemetering, performance and component charac.
distortion and accuracy 4552 [4551
accuracy and reliability 4553
energy spectrum of system with low beta, high dev. ratio and m.f. approaching carrier freq. 6260
excitation of linear systems 4258
f.m. subcarrier system, threshold improvement 6523
"feed forward" across limiter, and dynamic trapping 2362
frequency-phase, frequency at output of narrow-band ideal filter 7903
gramophone pick-up using transistor oscillator 1792
ideal binary pulse transmission 864
instantaneous freq. meas. with c.r.t. display 1360
klystrons for multichannel radio links 3637
low-distortion methods for f.m. transmitters 8192

Modulation - contd
frequency - contd
magnetic modulators, perpendicular fields 4267
minimum bandwidth digital f.m. systems using Gaussian filtering 4265
modulation meters, calibration 4063
phase-locked loop, linear design and analysis 4544
of pound stabilized oscillator 5039
r.f. spectra, signals and white noise 3635, 5666
regulation of signal output from klystron 2070
use of relaxation oscillators 2933
telemetering, deviation standard 3836
transient f.m. input, network response 4266
transistor as variable-reactance element 3638
ultralinear f.m. transmitter 3844
variable capacitance diode as modulator 2363
variable-inductance mod. of transistor sub-carrier oscillator 4555
wide-band magnetic recording 8177
phase
audio communication with orthogonal time functions 7906
using Hall-effect device 7914
microphony in rectangular waveguide 6737 [3896
phase mod. and synchronous detection, data transmission
phase-sensitive demodulation with interpolation 6807
phase-shift keying of digital data 446
polyphase, generation of s.s.b. channels 935
pulse
bothway-gate switch for electronic teleph. exchanges 1774
carrier-telephony 60 channel system 8145
comparison of various types for telemetering 4550
conversion of pulse to d.c. voltage proportional to pulse width 6757 [3559
counter and decoder, using transistors and magnetic cores
decommutator for telemetry information, TRA-DECOM circuits 3835
delta modulation, using transistors 362
digital speech transmission, use of transistors 1624
diode quantizing circuits 308 [5999
Empretron Hg-arc tube, for switching rates up to 5 kc/s
ferrite square-wave modulator, mm-range 868
ideal binary pulse transmission 864
linear f.m., for chirp radar systems 6436
low-power thyratron sub-modulators 4203
for missile-tracking radar transponder, semiconductor circuit 7908
multichannel telemetering systems 3194 [550
multiplex errors in f.m./f.m. and p.a.m./f.m. systems
nonlinear pulse elements, periodic states 6253
optimum decoding methods with non-additive noise 7912
p.a.m. for stereo-broadcasting 3739, 5042
p.a.m. system 1626
p.a.m./f.m. telemetry system, design 8432
p.a.m./p.d.m. commutation system, 100-channel 6524
p.w.m., digital recorder apparatus 3555
periodic p.m. time series, optimal filtering 409
pulse-freq. telemetering, noise stability 4564
pulse-width modulator using transistors 3639
radar modulator, transistor-driven 363
using Si controlled rectifiers 5041
satellite telemetering, signal-to-noise comparisons 5905
use of semiconductor diodes 2338
seven-digit, video transmission over seven-pair telephone cable 8324
use of Si gated diodes 7910 [6759
simulator circuits for testing receivers and similar app.
spectrum-selection a.f.c. of pulse systems 1522
transistorized chopper circuit 3000
transistorized receiver, prototype 3744
transition-rate discriminator for telegraph signals 5667
pulse-code
design of modulator using junction transistors 869
phase-shift p.c.m. telemetering system 3832
review of system characteristics 7911
for telemetering, recent improvements 3833
telephone systems, applications of transistors 3722
transistor circuits for 160 Mc/s clock rates 6200
20 channel telemetering encoder 4556
pulse-phase
multichannel miniature, using transistor–core circuits
45-channel multiplexer 364 [6262
60-channel transistorized equip. using plug-in modules [3640

Moisture (See Measurement by electrical methods).
Motor-coaches
electroluminescent sources for lighting 5569
heating systems using warm air 7370
high-cap. maintenance-free gen. system 2785
3 kV d.c., for Calcutta service 6043
Motors (See also Drives, electric).
for chemical industry applications 7154 [7155
drives for pumps and compressors, transient conditions
electric braking, math. analysis and circle diagrams 4027
insulation life, standards and correlation with field tests
iron losses, meas. 4085 [1181
for locomotives, transients in automatic control systems
low-speed, for reactor control-rods 3381 [5473
miniature types, survey 848
optimum transient response with independent excitation and armature-current control 8389
overheating, causes and effects 3964
reversible drives, magnetic-amplifier circuits 5010
for rolling-mill drives, analysis 34
small armatures, pulse method of fault location 7415
starting rheostats, design 4025
universal, brush wear studies 7150
commutation analysis 57
supply through thyratrons, theory 5343
variable-speed drives, matching of characteristics 7381
Motors, alternating-current
auto. production, winding machine design 4774
reactor static control methods 2049
fire-damp and explosion-proof 1185-6, 4672-3
h.v., protection using V-connected ct. transfomers 4761
loading of three-ph. distrib. networks 6621
open-phase protection systems 211
with printed winding on disk rotor 6577
reluctance type, very low speed operation 5362
single-phase capacitor, with three-phase stator windings, reactive power 7193
slip-ring, analogue computer simulation 595
speed control of crane drives 688
speed stabilization using 3-winding transformer 2740
suitable types for use in ships 7187 [6586
synchronous reactance, circle diagram and equiv. circuit
2-ph. servomotors, operation from unbalanced sources 3821
commutator
brush losses 7200
due to transformer e.m.f. 651
due to load and parasitics 3300, 5982
brush noise reduction 56
N-S type, stator-fed, developments review 58
rotor-fed 3-ph. shunt, design 5981
secondary phases and size of commutator 5364
series types for domestic appliances 3976
stator-fed polyphase, meas. of resistance 2682
induction
airgap, effect of length on performance 6596
angular acceleration meas., induction-tachometer transducer 7447
asymmetric stator circuit 52, 7186
circuit representation of 3-ph. motor on 1-ph. supply 3298
computer design, programmes 1091, 1094
synthesis 5975
analogue 596
controlled by volt. regulation, detmn. of rating 653 [3290
coupled to synchron. generator, electromech. transients
double-cage, design 1207
starting torque and current 3973
drives for ship's deck auxiliaries 6047
drives with impact loads, analysis 7373
dynamic braking, use of d.c. excitation 2679
economics of cost and running costs 7192
eddy-current coupling device for speed regulation 7383
end-winding leakage reactance, theory 656
meas. 1205
equivalent-circuit realization 6597
fractional h.p., standard range 4670
linear, application to conveyors 4773
logmotor, brushless var. speed 54
losses, rotational iron and surface drag 1203
magnetic potential in rotor back-iron 53 [3972
magnetization variation with speed, meas. by computer
"micromotor" with hollow rotor 3299
miniature precision types 5342

Motors, alternating-current - contd
induction - contd
pole-amplitude modulation, two-speed single-winding 2678
pole-changing, in crane-hoist control 2101
protection, survey 6024
relay system 4035 [2762
reactive power compensation, effect on system stability
rotors, run-up time and temperature rise with direct-on starting 7194
self-oscillating, survey 6598
shaded-pole, calc. of performance by dig. computer 5361
single-phase, switching transients 657
cross-field theory 2681
slip, equations for calculation 7196
slip-ring, ext. rotor-resistance, analysis 4674
small types for domestic appliances 4671
speed meas., electronic tachometer 7448 [7318
speed regulation systems, calculation of characteristics
sat. reactor characteristics 6682
using synchronous switch and semiconductor diode 7317
reactor controlled, analysis for crane drive 3382
contactor-type frequency-changer 5378
spherical, design and perf. 55, 6595
squirrel-cage, acceleration characteristics 7197
coil chording and rotor slot numbers 7199
problems of application 4669
torque-speed charac. and magnetic noise 5359
and slip-ring, crane drives 6046
starter motor for industrial gas turbine 6594
starting, resistance calculation 117
for submersible pumping plant 608, 3939
synchronous tie, stability of oscillations 4668
tape-recorder drives, stability of motor speed-control systems 3085
three-phase, simulation of 1 ph. operation 7191
slip-ring, transient behaviour 7198
compensated, type with two separate stator windings 7195
torque charact., dynamic measurement 655
transient torques with blocked rotor 654
two-phase, transfer-function determination 8428
cup-shaped rotor, theory 2680
squirrel-cage, starting conditions 1204
use as servo motor 5360
variable-speed, reversible controller 4740
phase-shift control 3974
electronic regulation system 2741
wound-rotor, rotor impedance control 1206
repulsion
No entries this year
synchronous
brushless d.c. excited rotating-field design 7183 [2674
compressor drives, torsional vibrations, computer analysis
computer design programmes 1091
excitation controller, stability 5363
high-speed restarting and protection 2768
miniature self-starting, as step motor 48
salient-pole, armature-current locus derivation 1201
s.c. impedance of damping winding 2014
self-oscillations of control system 3350
Motors, direct-current
controlled by excitation voltage, transfer function 2664
direct supply through magnetic amp. 2738
drives, characteristics with saturable-reactor speed control 7315
using Ferroxdure p.m. rotors 59
low-inertia drive for excavator 6045
for machine-tool drive 144
pulse-operated stepping motor 1189
rectifier-fed, effects of ripple 2009, 5972, 7161
speed characteristics 2742
armature-current form factor 1190
for reversing rolling-mill drive 2058
reversing drives, connection methods 2096
series, increase of applied voltage 7162
shunt, variable-speed drive for strip shearing machine 7382
silicone-insulated for rolling-mill drives 35
for slip-power recovery system 2099
speed regulation 119-20
current-controlled 1280
synchronized type 1188
torque control by push-pull mag. amplifier 6022
torque, oscillography using Hall-effect probes 4805
transductor-controlled, 25 kW output 4768

Motors, traction
circuit-breaker, design 7311
d.c., transients, analysis 5468
d.c. and rectified a.c. types compared 139
single-phase 50 c/s 2782, 3379
regenerative braking system 3352
temperature rise with sustained load 7151
Multipliers (See Electron multipliers; Photomultipliers).
Multipoles (See Networks).
Multivibrators (See also Pulse generators).
astable, frequency variations and control 7715
bistable negative-resistance 7716
colour-bar generator for N.T.S.C. system 3152
definitions and terminology 7712-13
using El cells and photoconductors 890
fractional bistable counter 841
monostable, stabilization of pulse length 1529
10 μs to 10 ms, 50 c/s to 50 kc/s 1539
for television line time-base, design 2931
time-delay, stability improvement using diodes 3549
transistor, switching of diode matrix commutator 6783
astable, frequency stability 1538
bistable 1528
in linear delay circuit 1582
magnetic-coupled circuits for use up to 100 kc/s 6192
magnetically coupled, frequency control 302
monostable, choice of transistors 2272
with neon-indicator readout 7717
pulse counter for time interval meas. 1553
scaler using diodes 6764
Royer circuit, operation in telemetering devices 7738
saturating and current clamped, performance comparison
temperature compensation 824 [3551
transfluxor combination 3543
transition process, analysis 7714
tunnel-diode, adder–subtractor unit 7789
Network analysers
a.c., with constant-current generator and loads 7029
resistance, exact representation of impedances 8523
survey of operation and applns. 601
applications
use on Amsterdam supply network 4715
appln. to mutual induction problems 2043
restriking voltages in 33 kV network 7358
Networks (See also Attenuation equalizers; Attenuators; Distribution networks; Filters; Telegraph networks; Telephone networks).
a.c., topological synthesis 4941
active, admittance matrix analysis 2256
active RC, optimum negative-impedance conversion 2892
admittance models based on node equations 6160 [5600
all-pass, classification and equivalence in lattice networks
analogue method of approximation 7046
analysis using connection matrices 4150
analysis using digital computer 8473
approximation method 7662 [2253
asymmetrical narrow-band, envelope and angle response
biquadratic minimum function, minimal realizations 6152
complex instantaneous frequency, definition and meas. 251
constrained, matrix analysis 6732
cycles in logical nets 7786
demodulator lead, for carrier-freq. servomechanisms 6508
detuned resonator-type class-C, analysis 7824
dissipative, decomposition of impedances into ideal vector products 4944
duality, and torsion and linkage characteristics 4943
elect. machines, new form of tensor equations 3285, 5969
equivalent, of nerve cell 3067
ferroresonant circuits, step function analysis 7664 [7650
filters, low-pass, prescribed delay and amplitude charac.
flow graph, optimum formula for gain 4932
flow graph solutions of linear algebraic equations 6140
frequency-synthesizing, theory 4996
general form, common theorems 4947
impedance models, physical realization 6159 [6156
impulse response in presence of noise, optimum estimation
inductance matrix, criteria and tests 4163
induction-motor equiv. circuits, realization 6597
integrator for slowly growing signals 8093
Kron method of tearing, dual method of identification 7637
LCR, demonstration pulse circuits 2941 [7629
linear, periodically varying, matrix analysis and synthesis
passive reciprocal, I.R.E. standard definitions 7630

Networks - contd
with single time-varying element, steady-state transmission 2232
conditions for monotonic response 2255
solution of problems in phase plane 2252
synthesis, graphical method for approximation 2891
design from teaching angle 4946
linear algebraic matrix equations, computer synthesis 5291
linear graph theory 6718
synthesis of switching functions 6734
linear-phase transistor amplifier, analysis 2968
linear servomechanisms, standard transfer functions 8423
matching, bandwidth calculation 7659
matrices and topographical relationships 7628 [253
multiple control systems, optimum synthesis in Weiner sense
multiple matrix products, calculation 1485
mutual and active elements, mesh-basis analysis 2235
negative resistance elements, noise factor definition 2239
nonlinear, generalization of a Heaviside theorem 1484
output correlation function 3505
analysis, approximation to partition method 7064
transients and steady-state behaviour 3504
recurrence relations 4162
maximum power 6173
passive, waveform shaping using inductance and diodes 4929
path matrix 2236
with periodically operated switch steady-state analysis 2357
phase delay meas., new method 2812
phase-space concept, optimum nonlinear control theory 6993
pole-zero patterns by derivative adjustment 1487
polynomial coefficients in network functions 6155
polynomials, detmn. of character of zeros 2251, 5609
positive real function, generalization 6154
prescribed phase characteristics, computer design 7018
prescribed time programme, approximation 6506
pulse shaping, design 7638
R.A.A.G. Memoirs, topological networks Vol. II 3918
RC, phase-error correction 2890
rational functions with constant imaginary part 6153
response-curve determination, automatic system 7625
response to f.m. transients 4266
response to step-function input from transfer function 1495
ring-type transmission-line, impedance 4933
signal-flow graphs, review 1481
application using non-touching loops 7636
linear, I.R.E. standard definitions 7631
microwave meas. techniques 4064
simulation, amplifier economies by transfer-function manipulation 8517
simulation of inductance, high-Q method 6729
single contact switching function, realizability 7801
static circuit characteristic, linearization 7068
step response function, calc. from modulus of transfer function 8373
synthesis, review 4945
three-terminal, potentiometer, zeros and poles of output voltage 7616
limitations of gain—bandw. product 6166

transfer functions on analogue computer 1105
triode networks, topology 6141

bipoles
analogue with active bioelectric membranes 3229 [6724
approximation and synthesis using Stieltjes transformation
line-shaping, principles 1550
linear passive, theorems 5595
partial equivalence, Cocci-Cauer theorem 7615 [2886
passive RCL in series, oscillating with one variable element
RC lumped linear, analysis 3502, 6144
stability with negative resistance 2889 [3363
thermistor with series resistor, d.c. transient performance

delay
in analogue difference analyser 3227
broadband closed-loop r.f. storage systems using fused-silica delay lines 7817
in colour television system 3786, 8323
compensation in automatic control systems 8353

Networks, delay - contd
control of feedback amplifier 7831
distortion and equalization in waveguides 258
distributed parameter line, anistropic planes model 843
envelope delay equalizers, design method 785
equalization in television transmitters 5251
filters in spectrum analyser 197
in frequency dividers applied to arithmetic coding 4220
for frequency stabilization of oscillator 813
helical waveguide, behaviour 4174
Kupfmuller transient formula 7815
linear time-delay circuit 826
linear, using transistor multivibrator 1582
long time, using single mag. storage core 1567
magnetic-tape, servo-controlled 7816
magnetostrictive, for computer and telephone-exchange applic. 3591, 6786, 8121
applic. and types 845
for matched-filter communication system 4223 [7819
multirange delay-line, for particle coincidence studies
noise sources, randomization 6327
phase equalization, on radio link 4939
pulses, delay up to 10^3 μs 2318
quadrature network for generating vestigial - sideband sigs. [4157
ripple type time-delay, use of elliptic functions 4575
secondary response, a.m. and f.m. sweep integrators 3782
spiral, theory 844
var. electronic, microsec. region 4224
variable ultrasonic, using water 6216

multipoles
active, transformations 7665
regenerative modes, gyrator network for pentode 6172
analysis and synthesis, review 5610
direct single-frequency synthesis from prescribed scattering matrix 6175
equivalent circuits 2250
general interconnection, scattering matrix 7658

irredundant Boolean, realizability problems 1498
isolation networks, audio frequency circuits 5606
large systems, new approach to Kron's diakoptics 6733
linear dissipative, impedance and Lagrange function 792
linear systems, topological props. and appln. to feedback systems 1499
matrix of equivalent fourpole 7623
n-port, transmission and hybrid parameters 7663
synthesis with negative resistors 7661
realizability theory, algebraic structure 2903
linear non-reciprocal, stability 2902
n-tuple, isolated-input, with common output 7511
node system of equations 7660
polynomial, invest. of charact. of zeros 252, 3517
reactive octopoles, design in terms of distr. matrices 4160
realizability in the time domain, unit-impulse response matrix 2237
representation of equivalent cardiac generator 308
resistive, synthesis 4159 [1046, 3808
saturating devices, approximation to harmonic response
signal flow-graph analysis and feedback theory 4161
synthesis with digital computers 1090
three-pole narrow-band interstages, synthesis 7666
torque-limited control systems, effect of additional non-linearity 1925, 5894
types of symmetry of contacts of (l,k)-poles 3516
variable-parameter, theory of steady forces 2901, 5608
volt. and ct. transformation matrices 791, 5607

quadripoles
a.c. bridges, graphical analysis 7504
active, constant-resistance lattice 7655
theory, applic. to distributed amplifier 7656
small-signal analysis with Y-matrix 250
RC, synthesis 790, 6171
audio, meas. of dynamic response characteristics 6728
balanced circuits, attenuation and impedance meas. errors [6068
for bell-shaped pulses, math. analysis and design 7744
bridged-T, for magnetic-loss meas. 739
for servo compensation 786
cascaded, element tolerances 7635
lossless two-terminal pairs 2238
constant-resistance, with universal-shunt properties 3434

Networks - contd
quadripoles - contd
cross-symmetrical, wave matrix analysis 4155
crystal resonators, analysis 7620
decimal attenuator network 6727
dissipative, with 3rd order max. flat amplitude charac. 782
with distributed constants, analysis 254
efficiency of power transfer by geometrical method 4154
electromechanical filters 7645
electromech. transducers, duality of network equation and equiv. circuits 6725
equivalent, for electromechanical transducers 5510
for common circuits by conformal transformation 2895
evaluation using matrix interpretation of node-voltage
feedback, analysis 3506 [2240
heuristic classification 3503 559
hyperfrequency charact. impedance by graphical method
ladder, coupling networks in oscillators 1496
iterative method for characteristics determ. 2897
maximally flat amplitude-response 6169
with nonlinear resistances, analysis 6167
coupling element for oscillator circuits 4930
RC, maximum gain 6168
RC, analysis using Fibonacci numbers 2893

passive, dynamic freq. charact. 784
phase-shift, physical realizability 4940
phase-shift, unit step response limitations 1488
noise meas., I.R.E. standards 2808
lossless two-ports, impedance transformations 1489
mechanical, wave-parameter theory for oscillations 5601
negative impedance convertors, transistorized, analysis 2462
nonlinear resistive d.c., analogy with linear a.c. network [6158
nonlinear transfer charact. and linear impedance 244
nonreciprocal, immittance props. 2894
iterated circuits, propagation constant 7626
output capacitance of transistors 883
parallel circuit with iron-cored coil, analysis 4153
phase-meas. in range 41-1000 Mc/s 3404
phase-shift standard for 400 c/s 7522
power gain and bandwidth, transistor amp. stages 855
power transfer analysis 1491
prescribed insertion characteristics, design 7627
pulse charact. in amplifiers, analysis 4998
pulse-forming 245
quad-to-quad transformations with invariant charact. impedance 6726
RC constant-argument driving-point admittances 2241
RC parallel-T, design and use 7632
response shapes, wideband bandpass amplifiers 6217
Schouten's method of alternation, topological treatments
symmetrical, sign of charact. parameters 7644 [4931
television, differential phase charact., oscillographic recording 4517
theory applied to transistor circuit design 3606
transient synthesizer with adjustable transfer function 1486
transistor equiv. circuits, analysis 5068-9
transistors as linear amplifiers 6229-30
two ports, stability, power theorem 6149
two-state and non-reciprocal, optimum performance 6148
two-terminal pair, synthesis 6157
variable, characteristics 783
variable transmission, for audio-freq. signals 6730

Noise, acoustic
brush noise in 1-ph. commutator motors 56
sound-level meas. instrument 7533
transformer noise, audibility criteria 7213
calculation for 3 ph. core-types 3985
reduction 3306

Noise, electrical (See also Atmospherics Interference; Microphony).
in cables, due to flexing 92
capacitor memory unit for signal detection 2996
combination sources, randomization 6327
in compensated recorders 7003
contact noise, suppression using saturated transistors 6754
relays, reduction by gilding 4122
current noise in resistors, proposed units 6650
distortion products with white-noise modulation 7902
error rate in binary code transmission 5801

Noise, electrical - contd
due to fading on radio links, probability distrib. 2511
filters for separation of signals and noise 3507
in freq. div. multiplex radio links, compandor loading 3068
Gaussian, and random-phase sine wave, distrib. 8104
narrow-band, use of Laguerre polynomials 4392
generator for testing missile electronic units 5167
low-noise aerial-maser combination radio receiver 6200
in magnetic recording, as function of tape charact. 1809
measured noise power, statistical props. 5822
in negative-capacitance amplifiers 2955
nonstationary, detector performance 2359
optimum pulse shape and filter for peak signal 6808
in oscillators, effects 7701
on synchronization 7705
regenerative 7703
operation of phase-locked osc. 7697
performance of complete communication system 3743
polynomial signals, derivative prediction 412
precipitation static, aircraft at high altitudes 480
probability density, sampling method of meas. 7426
radar signals, detection in noise and random reflections
detection of fluctuating target 1002-3 [6972
optimum detection 2358
detector output on f.m. signal 7904
radio noise, spectrum meas. from 50 to 100 c/s 5225
meas. on h.v. devices 4803
random, cause of television interference 1038
random-noise generator, signal spectrum analysis 7711
s.c. motors, torque-speed charac. 5359
s.n. ratios, in N.T.S.C. colour television 6347
in smooth limiters 416 [6161
separation of signals from noise, use of feedback amplifiers
signal detection by polarity coincidence 4401
stability of multichannel programme-controlled systems with magnetic recording 8370
sources preceding low-noise amplifier of receiver 4478
effect on synchronous filter-generator device 8453
telemetering, modulation methods, using channels 3195
effects in various systems 4565
in telephone message circuits 6418
trunk noise calcul. in multi-trunk systems 428
vocoder control signals, analysis 6257 [6067
waveform analysis of fluctuation records, photoelec. method
weighted random processes, spectral properties 4393
wideband, effects of linear transmission systems 7639

due to electrons
in Adler-type tubes, noise sources 3615
in amplifiers, pulse-wise representation 3592
anode-current variations in therm. tubes 3680
argon noise sources, S-band charact. 401
backward-wave tube, minimum noise figure 3045
in carbon-film resistors 4052
in electron beams, reduction 8020
related to quadripole networks 1696
partition noise at microwave frequencies 5708
multivelocity, nonconservation of noise parameters 3686
emission meas. on Ba_2WO_5 5086
flicker noise, spectrum 6837 [4202
in gas-disch. tubes, noise generators for 3.0 to 8.0 Gc/s
effect of mag. field 5711
temp. charact. 5112 [7699
in klystron, spectrum with 10 Gc/s oscillator operation in reflex types 6845
l.f. noise generator 6743
limitations to resolving power of image orthicons 5243
in linear two-port devices 2899
in masers and parametric amplifiers 5025
in microwave triode, analysis 6296
in microwave tubes, historical review 4330
of negative-conductance amplifiers 6250
in oscillators, effects 7701
background noise in nonlinear types 7702
and amplifiers, analysis 897
increase of spectral width 1517
parameters in v.h.f.-u.h.f. circ. design 895
parametric amplifiers, noise temp. meas. 2983
low-noise design 4246
and t.w.t. performance 2353
optimum value in one-port type 7891
variable-cap. diode type 2984
noise temp. prediction 8246
r.f. interference by semiconductor rectifier diodes 1633

Noise,electrical - contd
due to electrons - contd
r.f. spectra of waves modulated with white-noise 3635, 5666
reduction in mixer crystals by cooling 975
in semiconductors, transitions between valleys 4271
shot, amplitude-distribution analysis 5694
probability distrib., uncertainty relations 6882
integrated, 2nd order distrib. 414
spectra of probe in hot-cathode discharge 2434
temp. dependence in Ge point-contact diode 3644
transistors, at high emitter currents 3025
noise figure 2398, 3035, 3405
processes in emitter depletion layer 3662
as amplifiers 3502
frequency dependence and current amplification 3661
effect of external base and emitter resistors 5686
transport through space-charge limited diode 4322
travelling-wave tube, calculation 903
minimum noise figure 1699
cooling of slow space-charge wave 8001
in tunnel diodes, shot noise 6821
optimum performance 3648
noise figure as mixer 5675
extra-terrestrial (See also Radioastronomy).
amplitude-probability distrib., from statistical moments
atmospherics, measured charact. 8283 [3775
effects of high-altitude nuclear explosions 3774
effects on space communications 5838
rel. to optimum frequency 2586
interference in 30-1000 Mc/s range 5821
l.f. interference, observations in Greenland 2528
low values of C.C.I.R. predictions for India 2529
meas. equipment, 15 kc/s to 20 Mc/s 4839
radioastronomy signals, detection circuit 2537
solar, for plotting aerial radiation patterns 3098-100, [8235
Noise measurement
acoustic, dynamic-response noise meters 1374
sound and loudness meas. and analysis 3730
from large sync. generators 4631
of amplifiers, tunnel-diode types 7860
of negative-resistance types 728
atmospheric, equipment for 15 kc/s to 20 Mc/s 4839
low and v.l. frequency meas. 6415
by aural comparison method 443
tape recording 6961
in cables, due to flexing 92
current noise, ohmic contacts on CdS 6265
digital meas. at axis-crossing intervals 7438
on f.m. radio links 4800
in h.f. radio band, India 8281
l.f. noise generator 6743, 8622
linear two-port networks, I.R.E. standards 2808
in long mag.-focused electron beams 6311
on M-type backward-wave tube 6307
machines, acoustic-intensity integrating method 5501
in magnetic recorders, comparison of methods 6902
on maser and horn reflector receiver system 1613
message circuits, meas. apparatus 6092, 6418
noise meters, for 0.15 to 20 Mc/s, input impedance 6962
with square-law detection 1409, 4837
for 1 to 10 Gc/s range 190
direct-reading instrument 7529
noise power meas., approximate distributions 1358
noise thermometer amplifier, equiv. noise resistance 2122
of parametric amplifier 2983
photodiodes, 2×10^{-3} to 2×10^{-4} c/s 879
including photon noise 4307
pulse generator, constant amplitude, 0.1-30 Mc/s 2316
r.f., suggested standard parameters 481 [3400
rel. to internal ionization in h.v. power transformers
r.i.v. meas., on h.v. supply-network apparatus 4803
surface imperfections on single and bundle conductors
radar receivers, in service 6199 [4693
radio noise spectrum, 50 to 100 c/s 5225
in resistors, proposed units 6650
s.n.r. of pulsed matched filter 3406 [7426
sampling method for probability density of noise voltage
in systems with neg. resistance elements 2239
in t.w. maser pre-amp. 4065
tape modulation noise, sound recording 4420
television camera tubes 5497
transistor noise figure, noise diode technique 3405

Oscillators (See also Circuits, oscillatory; Magnetostriction oscillators; Masers; Multivibrators; Pulse generators; Resonators; Spark generators; Square-wave generators; Thermionic tubes; Time bases; Transmitters).
amplitude-stable, with a.g.c. 6182 [6181
amplitudes, analysis with modified Van Der Pol equation
"atomic" clock, flight tests 5623
automatic Q-meter peaking circuit 2067 [6744
beat-frequency, for audio, ultrasonic and video frequencies using biased junction diode 1533
blocking, for nsec pulses 7719
graphical analysis 4968

Oscillators - contd
monostable, design 3539
for television frame time-base 2932
stability with low synch. ratio 1530 [1362, 2266
caesium atomic-beam frequency standards, comparison drift due to vacuum loss 3534
carrier-freq., for 3.8 to 4.2 Gc/s 1527
combining of two frequencies 2950
use in continuous meas. of fine-wire diameters 3409
e.m. vibrators, drive systems analysis 6684
electromechanical systems with variable inductance 7696
electromechanical transformers using PZT ceramics 7214
electronic organs, frequency-divider circuits 6784
f.m., using variable capacitance diode 2363
frequency-dividers with direct synchronization 6785
frequency fluctuations meas., digital method 6069
frequency jumps and pulling effects 296
frequency stability, rel. to cathode impedance 2926
using delay line 813
stabilization methods 7344
new stable circuit, analysis 6180
control for Doppler radar applications 6435
control by n.m.r. 2263
gas-discharge noise generators for 3.0 to 8.0 Gc/s 4202
generation of the sound of rain 957
use of Hall effect in InSb 352
harmonic, using Si diodes 7729
from neon discharge in waveguide 8022
short-gap mercury arc, mm-wavel. 2260, 5626 [2269
and subharmonic, microwave, using p-n junction diode two-crystal design 2268
impulse-governed 5624-5
industrial r.f. heating, laminated tank-circuit design 2262
klystron 10 Gc/s, noise spectrum 7699
LC, generalization of quasi-linear theory 4197
l.f. noise generator 5622, 6743
l.f., expression of characteristics, recommendations 3435
l.f. and signal generators, survey of types 1525
ladder networks as coupling elements 1496, 4930
line-width increase due to thermal noise 1517
linear systems, f.m. and a.m. excitation 4258
locking range for different nonlinearities 6183
loss meas. on dielectrics at microwave freq. 7422
low-distortion sine-wave, 10 c/s to 100 kc/s 2264 [7700
magnetoresistive flip-flops, resolving and flipping time
maser, eight-pole focuser, analysis 5657
mavar, theoretical power output 3621
Meacham bridge, microwave 6186
tuning, theory 2928
microwave plasma torch 1520
music generators, using neon tubes 298
noise, effects of 7701
nonlinear, background noise 7702
non-sinusoidal, definitions and terminology 7712-13
notch filter, semiconductor monolithic structure 7649
optimum design for given anode losses 4966
oscillistor, semiconductor oscillator 6812
parametric, subharmonic 34 Gc/s pumping 7733
point-contact diodes 3627
phase-locked, digital system applic. 2297
oscillations in damped circuit 4967
parasitic resonance at u.h.f. in therm. tubes 5692
passive systems with one variable element 2886
periodic waveforms, homodyne detector 2265 [7698
phase-shift, design for predetermined harmonic distortion
phase variation due injection of varying e.m.f. 4193
Pound stabilized, frequency-modulation 5039
precision variable, using digital input control 1554
quartz-crystal, precision thermostat 7347
effects of X- and gamma radiation 7709
effect of resonator loading on freq. stability 2930
high-precision using parallel-field excitation 4200
stability 297
freq. variations and earth's rotation 4099
bridge-type, tuning procedure 2929
short-time stability, measured by maser 4199
LC anode circuit, for diel. constant meas. 6187
Rb gas-cell frequency standard 4194
RC, stable, frequency regulation 2759
feedback, amplitude stability 7707
voltage-tuned 2261
optimization for max. output 6185
r.f. system for 115 MeV cyclotron 7959

Oscillators - contd
random-noise generator, signal spectrum analysis 7711
regenerative, monochromaticity and noise 7703
relaxation, for frequency modulation 2933
resonance resistance meas. on oscill. circuits at u.h.f. 4195
using ring of cryotrons, analysis 7782
self-oscill. systems, theory of asynchronous states 814-15
signal generator, with n.f.b. stabilization 7706
artificial aerials for receiver meas. 6202
swept-frequency acoustic test equipment, 1-60 kc/s 4588
sweep, British types, survey 5628
sine-wave, as transmission dynamometers 2137
single-tube oscillator-mixer for TV tuners 2500
spectrum broadening due to noise 1516
spectrum-selection a.f.c. of pulse systems 1522
stabilized locked-oscill., as frequency divider 2315
stable states and topological methods 816
for Stellarator project, 10 kW 250 kc/s 1518
synchronization, with interference and noise 7705
phase-lock, for transfer-function meas. 6184
stability with modulated signals 7704
television time-base, using two oscillators 5254
third-order nonlinear system, analysis 1524
three-coupled wideband, stability 4198
thyratron circuits, higher frequency operation 6179
use as transducer 812
using triodes, effects of grid current 3536
tunnel-diode, voltage tuning 7732
for 3 Gc/s operation 1534
bias methods 7920
microwave, with mW power output 7731
applications 5052
crystal calibrator 6751
ultrasonic, applications 1121, 1718, 3533
v.l.f. pulse generator, 2-40 c/s, stimulator 2927 [4965
v.l.f., using thermal relaxation of temp.-dependent resistors
Van der Pol, with forcing signal, analysis 6188
for vibrating-wire strain gauges 3414
voltage sensitivity 1521
Wien bridge, analysis and design 1526
decade, incremental tuning 4196
transistor
a.f. push-pull, for severe environmental conditions 7735
artificial larynx 819
bistable, power dissipation 7718
blocking, as frequency-divider 334
driving Dekatron counter 314
stray inductance effects 2273
characteristics and design 2274
characteristics at low freq. from -75° to +75° C 821
chopper circuit for photomultiplier 5083
chronometer circuit, crystal-controlled with frequency dividers 7734
crystal controlled, 10-50 Mc/s, stability 1537
d.c. convertors, up to 100 W output 6753
with magnetic stabilization 7736
review 1536
using single transistor and diode 1535
design 72, 303, 3540, 3544, 3547, 5379
for fluorescent supplies 2939, 3542
and d.c./a.c. convertors 3548, 7224
for h.v. low-current d.c. 3546
drift-free circuit using transfluxor 3543
echo-sounder, miniature 4807
frequency multiplier with 1W output and 1 Gc/s 7811
gramophone pick-up using freq. modulation 1792
harmonic generator, nonlinear analysis 7730
Si transistor, at 8 Gc/s 7728
with semicond. diode, 2 Gc/s output 304
l.f. low-power, design 2271
miniature f.m. transmitter 457
monostable circuits 6750
multi-range radar sweep generator 2275
multivibrator, with output freq. related to input voltage, telemetering operation analysis 7738
magnetic-coupled, circuits for use up to 100 kc/s 6192
operation beyond transistor cut-off 7925
oscillations, analysis 823
phase-shift, analysis 7727
point-contact, relaxation, starting conditions for avalanche processes 7739
portable a.f. level generator 4836
pulse frequency-divider circuit 842

Oscillators - contd
transistor - contd
RC, using one transistor 6752
uses in radio-link equipment 4423

transistorized 2934
stability 2281
volt. waves, charact. and representation by exponential curves 1543
waveform solutions for semicond. diodes 309
Pulse generators (See also Multivibrators; Pulse circuits; Square-wave generators; Time bases).
use of avalanche transistors 2267
blocking oscillator for nsec pulses 7719
for cardiac pacing and stimulation 301 [7740
cascode trigger circuit, using p-n-p and n-p-n transistor
coaxial line—switching circuit type, analysis 2952
computer-circuit testing 300, 6652
with constant amplitude output, 0.1 to 30 Mc/s 2316
current-pulse, testing of ferrite memory cores 2144
pressurized spark-gap 6749
ferromagnetic explosively shocked 1438 [1579
decimal-coded time markers on magnetic-tape recordings
ferrimagnetic microwave 4969
high-current transistor 7804
light-pulse, use of electron multiplier 7941
low-level pulse-height standard 4204
low-power, for radar sub-modulators 4203
magnetic, with phase-shift bridge circuit 3439
for magnetic-field production 7726
meas. of discharges in dielectrics 726
Pulse generators - contd [7722
megawatt output, synthetic lightning-atmospheric generator
monostable, driving mechanism analysis 3552
multi-waveform transistorized circuit 1531 [7712-13
non-sinusoidal oscillators, definitions and terminology
pairs of pulses, p.r.f. 100 to 1000 c/s and variable rise-time, duration and separation 7724
ns pulses, separated by variable interval 2936
pulse rise-time calcul. 817
random binary process generation 1581
rectang. pulses, up to 100 kV, for insulation testing 6123
reflex klystron, for nsec pulses 2953
Rosenblum counter 7720
Schmitt, using transistors, applic. 825
secondary emission, shaping circuit 7747
simulator for orbital synchrocyclotron 7957
solid-state, for 2×10^{-10} sec pulses 6191
spark-gap, measuring oscillograph 4971
square-wave, for exploding-wire studies 2317
using rectifier bridge circuit 4201
stimulator circuits 2927, 4380
stroboflash pulse sequence generator 3588
stroke calibration, sinusoidal movement recording 1580
subaudio swept signal gen. 6189
using switching transistor, sawtooth and pulses 1540 [6983
sync. signal gen. for transistorized television camera unit
for testing electro-explosive devices 7723
thyratron circuit, 1 c/s to 12 kc/s 6190
time-interval meas., up to 3×10^{5} p/sec 4970
timing, for synchrotron 7721
timing pulse, standard-frequency controlled 2935
transformerless, for spark-gap triggering 3589 [4519
transistorized, television-signal generator and distributor for counting-equipment testing 4974
for digital computer 1583
voltage-controlled bootstrap, transistorized 4206
voltage-modulated variable pulse-rate 4222
waveforms for nuclear research 6748
for wide range of acoustic pulses 3590 [7479
2-axis marker for c.r.o. use in bandpass circuit alignment
Pulse modulation (See Modulation, pulse).
Pulses (See also Impulse currents; Modulation, pulse; Waveform, pulse).
electromag., propagation in homogeneous conducting earth [5800
integration of pulse varying in amplitude and frequency 2445
magnetic recording, analysis 438, 440
high-density on tape 1796
non-recurrent, peak voltage meas. instrument 1404
radio pulse spectra, stationary phase principle 964
rectangular h.f., spectrum after passing through tuned filter and clipper 787
$\sin^2$, for television system testing 6461
skin effect in circular conductors 7072
stroboscopic oscilloscope for display of short-rise-time pulses 5525
time-domain analysis of trans. line networks 6716
transmission through l.f. filters, transients 2278
voltmeter, peak-reading, up to 50 kV 186
waveform-shaping circuit 4929
Pumping plant
cooling water for p. stations, economics 7131
electromagnetic induction, thermal processes 4652
linear, characteristics 4653
for liquid metals 5973, 6579
potential distr. in boundary zone 3297
irrigation and drainage, Bulgaria 3245
Netherlands, Veulo 5330
outdoor substations for water supply system 31 [7108-9
pumped-storage stations 1161, 2643, 3268, 3270, 6546, capacity correlated to base-load elec. generation 18
electrical braking 4622
submersible, design and testing 608, 3939
supervisory and auto. control pumping action 5901
Pylons (See Poles and towers).

Q-factor measurement
of high-Q electromag. resonators 161
resonant cavities, dynamic method, 9 Gc/s 7423
phase-shift method 7424
Quadripoles (See Networks).

Quality control
- aircraft generators, reliability analysis 3967
- component screening, multiparameter measurements 4367
- computer manufacture, programmed system 1957
- electromagnetic mechanisms, operational reliability 1441
- electronic equipment, engineering approach 8042
- fixed resistors, long-term stability 5480
- graphical method 609 [1117
- group testing to eliminate defectives in binomial sample
- initial production reliability of devices 8031
- instruments based on nuclear radiation, survey 4856
- mean time of failure-free operation, calc. 5127
- mica capacitor failures, improvement studies 5544
- PERCOS system of equipment performance coding 3061
- reliability appraisal of semiconductor devices 2373
- rubber gloves, factory tests 159
- television picture-tube manufacture 510
- thermionic tubes, automatic testing system 5088
- transformers for electronic equip., reliability 62

Quartz (See Filters; Resonators, crystal).

Radar
- absorbers, reflection and incidence angle 2884
- comparison of radar and i.r. detection systems in fog and rain 3781
- health hazards of high-power transmissions 5841
- thermal balance in mammals, microwave radiation 922
- ring angels and bird movements 4497

Radar apparatus (See also Interference suppression, radar; Receivers, radar; Transmitters, radar).
- a.m. and f.m. sweep integrators, delay-line secondary resp.
- aerials, design for scanning 8232 [3782
  - and scanners, survey 8233
  - cylindrical surface-wave 4458
  - bearing calibration using solar noise 2539
  - auto. tracking of radio theodolite 8447
- in aircraft, collision warning system 495
  - automatic g.c.a. system 1016
  - magnetic-tape data recorder 439
  - transistorized power regulators 893
  - 32 a/c track simulator 1113
  - automatic landing system 1014
  - automatic landing aids for carriers 1011
  - terrain profile recorder 498
- automatic fault-monitoring system 8304
- beacons for guided missiles, design 4498
- in Boeing 707 aircraft 6912 [2541
- c.w., pulse and pulse Doppler, range performance analysis
- coherent bistatic, ground clutter isodops 494
- computer for sequence tracking of 50 aircraft 555
- detection of weak signals 8318
- dig. correlator for data processing 839
- Doppler c.w., frequency stabilization 6435
- duplexer, circularly polarized, mm-wave 4185
  - with pre-TR cells, analysis 7685
- echo-measuring, time-gate circuit 4216
- elevation-search system, test apparatus 8315
- g.c.i., use in flight simulator 6963
- high-resolution 8mm equipment 3144
- land-mass radar simulator 1020
- long-dist. transmission of bearing angles 1883
- low-power pulse generators for sub-modulation 4203
- marine, battery-powered 8311
- military, for battlefield movement detection 5235
- missile miss-distance indicator 500, 503
- mixer circuits 461, 4949 [6380
- monopulse, four-horn feed with high-speed lobe switching
- mortar-position locator 499
- multipurpose target simulator for m.t.i. systems 6428
- multirange transistor sweep generator 2275
- noise measurements in service 8199
- p.p.i. display tubes, deflection yokes 2426
- parametric amplifiers in L-band receiver 2965
- radiation monitor for radar transmissions 5528
- real-time data transmission system, missile range safety control 2584
- REGAL aircraft approach and landing system 1015
- satellite tracking, portable station 6457
- signal recording on Ampex videotape apparatus 8168
- simulated airborne display, terrain features 1019
- simulator for countermeasures 8300
- tracking of lunar-probe satellites 5840
- transceiver, high-power self-contained 493
- transponder for missile tracking, semiconductor modulator circuit 7908

Radar apparatus - contd
- waveguides, components and meas. methods 6434
- X-band, ferrite duplexer for ruby maser 2918
- 5 MW peak-output electron tube 4325

Radar applications
- air-traffic control, future trends 8474
  - and data handling 3139, 3203, 6425
- aircraft navigation, survey 6430
- auto. target detection and plot extraction 3140, 6426
- data extraction for auto. processing 3142, 6442
- extraterrestrial metrology, radio interferometry 4489
- fault location on overhead lines 1352
- microwave, review 4164
- mortar-position location 499
- radar astronomy conference, San Diego (October 1959) 6448
- range-finding using infrared 8291 [4488
- satellites, orbit determination, 4-station Doppler meas.
- semi-auto. flight control 3143, 6431
- storm warning, Indian networks 5848
- survey, ships and aircraft 6431
- tracking for Tiros weather satellite 4499
- velocity-inertial navigation systems, synthesis 8303

Radar measurements (See also Reception quality, radar).
- aerial calibration using solar noise sources 3098-100
- angular accuracy of radio-star tracking by lobe comparison
- auroral reflections, statistical props. 3146 [6429
  - associated with visible aurorae 3145
  - echo occurrence rate 4490
- backscatter from sea surface at X-band 5606
- cross-section of cylindrical bodies 1882
- distance-meas., transient and steady states 4808
- echoes from birds 1880
- internal reflections in travelling-wave tubes 2809
- meteor counting, accuracy of measurement and radar parameters 6971
- meteor echoes at 200 Mc/s 6392
- moon surface, roughness as reflector 6444-5, 8305-6
  - echoes at 106 Mc/s 6446
  - 488 Mc/s signal echoes 5219
- noise and field-strength meas., 1 to 10 Gc/s 190
- nomogram for jamming chart 2536
- position estimation, multiple simultaneous range meas. 4483
- rain attenuation at 8.6 mm wavels. 5802
- reflection of microwaves from earth's surface 6399 [4488
- satellites, orbit determination, 4-station Doppler meas.
  - on 1957 beta 501
  - tracking, Doploc system 1026
  - tracking, receiving station 502
- sub-horizon echoes by scatter propagation 4496
- super refraction over South Arabian Sea 6951
- tracking of space vehicles, accuracy 4500

Radar presentation methods
- amplitude-modulated video integrator 1023
- c.r.t. display of satellite orbit 5847
- c.r.t., intensity-modulated, detection threshold 8317
- cathode-ray-labelled plan display 3135, 6420
- display transmission by line storage 8316
- eye movements during simulated radar research 6438
- fixed-coil display system for data extraction 3141, 6439
- Iatron display tube and circuits 8314
- scanning of p.p.i. screens, luminance levels 6440
- reflected-beam cathode-ray tube 8326
- resolution, improvement by p.p.i. shading 1024
- storage tubes for brighter data display 1881

Radar stations (See also Transmitters, radar).
- air traffic control, data processing system 7024
- in Elbe—Weser estuaries 5849 [605-7
- SAGE system, data transmission methods and apparatus
- satellite-tracking, portable type 6457
- weather radar, Indian networks 5848

Radar systems (See also Interference, radar; Radio navigation systems; Radiowave propagation).
- auto-following, with intermittent input 496
- bandwidth compression using storage tube 3783
- "chirp", theory and design 6436
- comb filters, analysis and appln. 788
- f.m.c.w., analysis 5846
- frequency-scanning, broadband with phase-path display 8312
- noise reduction using magnetostriction filters 1056
- pulse compression 3784
- range—velocity determination, pulse signals 6437
- satellite detection and tracking 5852

Radar theory (See also Interference, radar; Reception quality, radar).
absorbing coatings on conducting objects, ineffectiveness [8308
ambiguity and distance functions, invariant relations 4396
aperture aerials, transient behaviour 6373 [4538
automatic target tracking, prediction on statistical basis
backscattering from a finite cone 6708
chirp systems, theory and design 6436
coated objects, forward scattering 8307
correlation methods 6432
detection, of astronautical vehicles, optimization 5851
range prediction 1022 [777
e.m. waves, propn. through hypersonically produced plasma
electronic and optical display gain, rel. to system perform.
fluctuating targets, detection probability 1002-3,8302 [4495
ground clutter isodops for coherent bistatic radar 404
indeterminacies of measurement of position and velocity [4492
information theory criteria of reception methods 1021
integration of low-level signals, optimum integ. time 6963
interchannel correlation in bank of parallel filters 4398
monopulse and scanning systems, multiple target resolution characteristics 8313
near-field back-scattering, geometric-optics approx. 4491
optimum detection of signals in noise 2358, 6972
operation, human factors 4386
radar echoes from sun 2540 [6992
range-tracking loops with two integrators, dynamic stability
reception with jamming, appln. of games theory 497
s./n. ratio and effect of time-gate width 1625
scintillation spectra of aircraft 6965
semi-infinite body, radar cross-section 1878
side-looking airborne, pattern calc. 1025
signals with high range - and velocity - resolution 6437
statistics of signal after linear and nonlinear mixing 8310
target classification by polarization properties 6433
target scintillation, echo signal distortion 8309
terrain returns, statistical models 6968
two-dimensional tracking, quickening of one coordinate 4494
vector position and velocity 8319

Radiation counters (See also Counting tubes).
counting-equipment testing, transistor pulse-generator 4974
fast-and slow-neutron dosimeter using semiconductors 871
Ge diodes and transistors 6814
Ge surface-barrier, large area 5531
gold-germanium junction as particle spectrometer 876
meas. of radioactivity levels 4074
neutron detectors, review of types 2442
Nuclear Electronics Symposium, Paris (1958) 4975-6
for Pioneer III and IV satellites 5530
portable scaler for tracer studies 6765
pulse integrator, 300 to 10^3 counts/min 6758
radiation monitor, transistorized 5529
radiation within human body, use of fluorescence in glass rod 5135
use of Si p-n junctions 7922
survey meter, single-transistor circuit 6867
with transistor head and circuit 7763
transistorized monitor 5529
gas-filled
G-M, ratemeter with auto. range-changing 6761
transistorized counter circuit 4978, 6196
plateau slope 4362
tubes, cathode work-function and charact. 3057
halogen-quenched, reduction of deadtime 6325
gas fillings 8028
ion chambers at high fluxes, a.c. operation 3706
proportional, X-ray crystallography apparatus 6762
review of developments 6866
for synchrotron studies 6865
telemetering system using gamma rays 8439
scintillation
beam-profile indicator for particle accelerator 752
counting circuit design 1544
enriched boron, for slow neutrons 6872
fast coincidence counter 7755
I.R.E. standards 6873
phosphor decay-time variation 6870
photomultipliers, effects of temperature 6871
plastics, improvements 6869
progress review and bibliography 6868

frequency allocations 6458
and system performance 6467
hum interference on video coaxial cables 531
information-content reduction by quantizing 508
long-distance, C.C.I.R. recommendations 8343
Milan–Palermo, test and maintenance meas. 5191
phase equalization 4939
min. transmitter spacing for non-interference 5262-3
mobile relay link for outside broadcasts 3156
network planning, theory 5240, 5870
and frequency channels 5869
in Germany 5239
and siting, Band IV and V 4524-5
networks with nonlinear channel distributions 5241, 6981
Nyquist flank, optimum shape, transient resp. of s.s.b. transmissions 6976 [3763
over Irish Sea and mountains, channel-sharing problem
programme delay centre using tape recording 528 [4157
quadrature network for gen. of vestigial-sideband sigs.
redundancy and bandwidth compression 2542, 3788
re-transmission, experience with radio links 2543
signal propagation at u.h.f. 6279
slow-scan image by telephone or radio links 5245
station network communication system 527 [5871
statistical fluctuations of channels, spectral composition
sync. separators for b. and w. transmitters 6469
telemetering of video signals from space vehicles 507
over telephone cable pairs, using p.c.m. 8324
Television Allocations Study Organization 6459
test line system, automatic white level 4512
testing of systems with $\sin^2$ pulses 6461
by transatlantic cable 1889
troposcatter communication, intercontinental 4507
comparison tests, 800 and 4000 Mc/s 3787
v.h.f. propagation, ghosts and reflections 5823
vertical aperture equalizer 6979 [2550
waveform centres synchronization, survey of techniques
waveform distortion in links 1888, 3802
wire broadcasting, survey 5859, 8189
multichannel common-carrier system 6483
Temperature measurement (See Measurement by electrical methods, thermal quantities).
Testing (See also Insulation testing; Mechanical testing).
aircraft gen. control equip., functional cycling 3232
circuit-breakers, methods and equipment 6059
synchronization of test current and meas. circuits 3344
climate test methods 722
and mechanical, standardization 1961
and component selection machine 3168
contacts for use at low voltages 6683
electronic equipment, programmed test set 749
accelerated tropical 7391

Testing - contd
generators, loss meas., by calorimetric methods 1200
h.v. research laboratories, Bechovice, Czechoslovakia 4786
and s.c., CERDA laboratories, France 4785
laminated plastics, effects of heat and moisture 1338
lamp ballasts, improved method 2873
large boilers, inspection 1118
locating dry joints in telecom. cables 168
magnetic amplifiers, proposed standards 343
rectifiers, silicon, operational and storage life 1631
relay circuits, by machine 7557
reliability of airborne Tacan equipment 485
semiconductor devices, operation with pulsed nuclear radiation 3848
short-circuits, low power transformers 2017
stability and ageing of organic materials 1329
thermal stability, varnished glass cloth 5483
thermionic tubes, reliability in use 4318
auto. test equipment 4822
transistors, life tests on various a.f. types 4289
accelerated ageing expt. 2402
water turbines, acceptance-test codes compared 9
model tests 1146
Tetrodes
high-peformance, for radio link operation 5698
u.h.f., analysis of operation 898
for v.h.f. television transmitters 1694
Textile industry
looms, power requirements and resilient couplings 5477
Textiles (See also Insulating materials).
synthetic yarns, auto. cont. denier recorder 6076
Thermal measurements (See Measurement by electrical methods).
Thermal regulation (See Regulation, thermal quantities).
Thermionic emission (See Cathodes).
Thermionic tubes (Specific types are indexed separately, e.g. Diodes. See also Cathodes, thermionic; Electron-wave tubes; Gas-discharge tubes; Rectifiers, thermionic; Secondary emission; Space charge).
anode current, variations, theoretical probability 3680
beam-deflection control 6299
anodes, of Ag, Cu, Ni, Mo, Ta, Ti, and W, gas evolution and ion emission 3675
of oxide-cathode receiving valves, luminescence 6295
cooling in vacuum 4320
auto. testing equipment 4822
barretters, theory 2060
battery types, use as electrometers 7987
cathode, use of negative glow plasma 6294
impedance and oscillator stability 2926
interface impedance meas. 2117
MgO, operation and applic. 2418
ceramics, low-loss, characteristics and applications 7970
characteristics plotting, c.r.t. display instrument 7516
choice of therm. tube or semiconductor device 7972
circuit design on semilog. paper 6221
comparison with transistors 7971
for deepwater submarine-cable repeaters 3724
double magic-eye for stereo recording level indication 8010
effects of encapsulation 5115
electrokinetic power theorem, relativistic conditions 1690
electron multiplier with grid control 7945
flicker-noise spectrum 6837
fused alumina heater coatings, leakage currents 1689
getters, CO sorption by Ba films 5084
glass envelopes, passage of current through 6292
grid-current and modulation range 5090
grids, emitting props. of Ti 3678
thorium deposits, thermionic props. 3679
power—temperature relation 4328
indirectly heated, in miniaturized circuits 5116
Langmuir vacuum diode theory, invalidity 2431
life data, math. and statistical methods 4319
magnetic-field types, inhomogeneous field production 6844
multi-electrode, general relation among parameters 4326
nomographs for design 5691
nuclear radiation effects 388
potential distrib. between plane emitting electrodes 7983
quality-control testing, automatic system 5088
radioactive tracers for migration, degreasing and sodium-content studies 7976
reliability, calculation 6840
in use 4318
and life tests 4313
Thermionic tubes - contd
reliability, parallel connection 4886
rhenium, behavious as filament material 1691
with screen undecoupled, negative resistance 3043
survey of developments 6838
thermionic convertors, review 6553
anode emission and space charge 5589
effect of mag. fields 7982
UC, emission measurement 5085
vacuum and semiconductor devices, modern theory 2387
vacuum equipment for demonstration tubes 3676
X-ray production and hazards 6293
manufacturing processes
all-metal bakeable tap for high-vacuum 896
argon arc welds 5089
ceramics, for envelope material 3677
high-alumina, for power types 4314
sealing to titanium 7977 [7974
distillates from components, detection and identification
epoxy-resin joints for sealed-off h.v. tubes 4317
gettering processes 7979
glass, characteristics of materials 7975
for high-temperature operation up to 500° C 7973
L-cathodes, impregnated type for microwaves 4310
sealing glass, surface conductivity 4780
silica glass seals for lead-in wires 1693
titanium pump, miniature design 6302
vacuum technology, survey 7978
ultra-high-frequency
Amplitron, theory 4349
beam focusing with periodic magnetic fields 6863
beam noise, related to quadripole networks 1696
circuit parameters for design 895
collector for beam-type tube with axial focusing field 2419
cyclotron resonance detector tube 5093
disk-seal triode, 6 Gc/s operation 5697 [7874
electron-beam parametric amplifiers, characteristics 4251,
fast-cyclotron wave parametric amplification, theory 2981
frame-grid types for wideband television apparatus 7980
growing-wave amplifier 6301
Helitron, small-signal analysis 4347
design, theory and charact. 1695 [7999
helix buncher tube, with trav. wave synchronous bunching
helix tubes, increase of power output 6303 [3044
hybrid types, klystron gun and trav. wave output section
impregnated L-cathodes, manufacture 4310
lead-in wire, inductance meas. 1692
microwave, survey 6842
proposed graphical symbols 5091
review with bibliography 897, 6843
periodic and guiding structures, review 4140
noise, historical review 4330
parasitic resonance of cathode and heater 5692
plane-electrode, admittance meas. 4066
quadrupole amplifier, low-noise parametric 2355
review of types and characteristics 7989
sheet electron beams, magnetic deflection focusing 1706
space-charge waves, properties 7988
steady laminar flow in magnetic fields 4329
strophotron, electrons and r.f. oscillations 899
tetrodes, analysis of operation 898
triodes, distortion due to electron transit-time 7986
velocity-mod. frequency-divider 2420
wide-band, self-contained distributed amplifier 5087
Thermistors
application in l.f. filter circuits 5805 [3363
d.c. circuit with series resistance, transient performance
use as d.c. to a.c. convertor 2026
error integration in carrier-type servomechanisms 7001
indirectly heated, temperature stabilization 5445
isothermal probe for blood flow velocity meas. 8078
use as manometer, 1 to 10^{-4} mm Hg 737
portable temp.-meas. bridge instrument 2844
synchronous thermal detectors 7901
temp. meas. and control 7349
for small oven 5447
theory, manufacture and application 147, 6049
time-constant meas. 7386
use in time-delay relay 210
for use at up to 300° C 7388
VA characteristics, calculation 7387
use in v.l.f. oscillator 4965
wideband mount for use in waveguide 4850

Thermo-electricity (See Generators, thermo-electric).
Thermostats (See Regulation, thermal quantities).

transients, study using analogue computers 5290
transients, recorder 1418, 7246
transient stability calcn. by digital computer 589
transmitted power increase, use of auxiliary generator winding 1198
U.S.S.R., 330 kV, survey 87
d.c., Stalingrad–Donbass, model of system 4001
unbalanced h.v., wave propagation 1229
voltage-drop compensation 7334
voltages above 380 kV, economics 6613
zero-sequence current density in the earth 5390
110 kV, uprating to 154 kV 3322
650 kV, 2000 MW for 800 miles, project plan 2707

Transmitters, radar
duplexer with pre-TR cells, analysis 7685
high-power, health hazards of transmissions 5841
modulator using Si controlled rectifiers 5041
pulse compression methods 3784
transistor–magnetic core pulse modulator 363

Transmitters, radio (See also Oscillators; Radio transmission systems).
aerials, switching up to 50 kW level 4464
for simult. v.h.f. transmission and reception 465
"exchange", 300 ohm line type 3759
feeding layout 6926
aircraft, altitude encoders, air traffic control 8296
in Boeing 707 6912
distress beacon, type TH.C 985/986 1811
automatic recording of station parameters 5189
Bisamberg med.-wave broadcast, power supplies 6913
broadcasting system, Greenland 5237
common-frequency control system 6915
controlled carrier operation, analysis 449
d.s.b. s.c. multiplex equip., cable and microwave applic. 973
digital remote-control system 3847
distortion and crosstalk, single and d.s.b. types 2496
distress, ferromagnetic aerials 2505
DOVAP transponder, narrow-band circuit 8195 [1840
ganging of 4 transmitters, combining network for aerial feed
high-power short-wave, characteristics measurement 5779
inductive-loop system, 135 kc/s 8186
intermodulation interference 1870
in land mobile service 1005
for meas. of tropospheric-scatter path losses 6360
mobile 10 kW trans./receiver app. 454
Motala, 600 kW 191 kc/s station 8191
for multiplex a.m. stereo broadcasting 2493

Transmitters, radio - contd
oscillator test circuit for disk-seal triodes 4327
oscillator valve charact., effect on sig. spectrum 1739
parasites and their suppression 5780 [8193
personal miniature v.h.f. transceiver, modular construction
personal paging system, v.h.f. band 8194
power control in two-way systems susceptible to fading 6361
pulse generator for producing synthetic lightning atmospherics 7722
r.f. radiation, safety precautions 5234
radio links, results of tests 5190
2700 Mc/s, over 2 W output 5186
for satellite communications, world-wide network 8298
single sideband equipment 456
solar-cell power supply 1686
supervising equipment, Bisamberg station 6366
suppressed-carrier modulation technique 5035
for telemetering, r.f. multiplexing 3843
from inside human body 1936, 5730, 6362
for satellite 5778 [6527
for temp. data transmission using thermistor in a.f. crt. 'translator' satellite stations for B.B.C. 1884
transportable 750 to 1000 Mc/s tropo. scatter equip. 455
tropo. scatter, low-noise techniques 4474
u.h.f. military transceiver equipment 2947
wind-generated power supply 646

frequency-modulation
miniature type 457
modulation methods for low distortion 8192 [5037
stereo. broadcasting using f.m. sig. and a.m. aux. carrier
ultralinear 3844

Transmitters, television (See also Aerials, television; Television stations).
aerials, pattern determination 6372
performance meas., pulse methods 5783
feeder characteristics 3118
bands IV - V, using tetrode tubes, up to 20 kW output 8332
in Bermuda, studios and equipment 526
boundary contours, calculation methods 6475
characteristics, performance and cost 6474
coverage forecasting 6473
delay equalization techniques 5251
design for Band IV and V 518 [8266
field strength meas., of v.h.f. beyond-horizon propagation
v.h.f. and u.h.f. bands 6485
filters for phase correction 8329 [1032
four-stage, Band III, 275 W output exciter or transmitter
frequency allocation and system performance 6467
Haardtkopf, Band IV - V 4516
lightweight pack type, for hand-held camera equip. 515
minimum geographical spacing for interference 5262-3
network planning, theory 5870
networks with nonlinear channel distributions 6981
operation with carrier-frequency offset 4515
planning and siting, Band IV and V networks 4524
portable, outside-broadcast unit 3793
transistorized camera unit 6982
precision offset with varying field freq. 1894
remote-control pulses in blanking interval 6468
slotted-tube hybrid junction, theory 4957
sound power reduction, receiver performance 6480
supervisory and control app. 3154
sync. separator stage 6469
test-line signals for 819 line transmission 8333
translators, with powers up to 500 W 1033
and transmitters 525
300 mW and 3W designs 517
planning and siting 1901
sync. signal regeneration 6470
u.h.f. air-cooled tetrodes, description 1694

Transport organization (See also Signalling).
ice melting on bridges by resistance heating 236
motorway, emergency telephone system 6887
study and prediction of vehicular traffic 584

Travelling-wave tubes (See also Backward-wave tubes; Parametric amplifiers).
analogue apparatus, design and construction 1698
beam-modulated, analysis 7998
beating-wave amplification 2987
c.w. for 5-6 mm band, 0.5W output 3687
chain of coupled cavity-resonators 6722
clover-leaf c.w., for X-band, design improvements 6848

Travelling-wave tubes - contd
collector, low-potential, in axially symmetric. mag. field
cooling of slow space-charge waves 8001 [2419
delay systems, propagation constants 902
electron beams, motion in lossy medium 4344
var.-velocity in lossy medium 4342
focusing, with periodic mag. field 5102
focusing with tape ladder lines 6849
focusing, input waveguide region 5105
electron guns, partially magnetically screened 8021
Muller type, 0.3μ P 8019
probe-gridded high-perveance 4351
electrostatically focused, L - and S - band 1700, 8004
balanced acceleration 6857
electrokinetic power theorem, relativistic conditions 1690
helically slotted waveguides, oscillation modes 2906
helix buncher type, with synchronous bunching 7999
helix structures, for pulsed tubes 393
helix waveguide, efficiency, 150 to 600 Mc/s 3524
hollow beams in radial electric fields 2423
interactive power, beam and slow-wave-structure field 4343
internal reflections meas., using m μ s pulse radar 2809
low-noise types 2353, 8002
4 Gc/s operation 8005
design 905
meas. of relative phase-shift 4102
minimum noise figure 1699
modified spiral with reverse winding, theory 8000
noise-figure calculation 903 [3686
nonconservation of noise parameters in multivelocity beams
non-reciprocal iterated circuit, propagation constant 7626
one-dimensional analysis, radial electric-field variations
oscillation freq. with phase shifter 4345 [4341
parametric amplifier, static field 8006
parametrically pumped, fundamental equations 4246
periodic slow-wave structures, equivalent circuits 7613
pertubation of complex propagation constant, interaction impedance 4792
power output and bandwidth calculations 6304
propagating structures, periodic coupling 2257
radially varying periodic mag. fields, beam charact. 4354
in radio links 4428, 5096
gain limitations 1701
review with bibliography 897
space-charge waves, properties 7988
survey of evolution, principles, characteristics 6842
tape structures, prediction of characteristics 4173
theory, mean values 5094
three-coupled waves, properties 6841
transistorized power supplies 3541
two types for 3.8 to 5 Gc/s, medium-power 5095
type LFB1, Polish manufacture, S-band 8003
very low noise, octave bandwidth 7997
10W for 7.5 cm band 904

Triodes
analogy with junction transistor 5684
dielectric, space-charge-limited 6050
distortion, nonlinear, due to electron transit-time 7986
electrometer circuits, logarithmic charact. 1402
limit of amplification factor, general relation among parameters 4326
network topology 6141
as oscillator, grid-current effects 3536
planar, cross-wound grids, technique 5695
transmitting valves for broadcasting, use of thoriated filaments 3683
ultra-high-frequency
disk-seal, for 6 Gc/s operation 5697
7 Gc/s, design 5696
2C 39, oscillator test circuit 4327
metal—ceramic, use up to 6 Gc/s 3042
EC59, in 10W 4 Gc/s amplifier 2956
peak output 5 MW, design for radar system 4325
small-signal performance and noise properties 6298

Trolleybuses [5466
3-wire supply system, for "up" and "down" service, investig.

Tuning (See also Radio apparatus).
circuits of bridge-type piezo-oscillator 2929
h.f. line traps, carrier transmission, power lines 5158
linear method for u.h.f. trans. line resonator 4148
Meacham-bridge oscillator, theory 2928
of multi-resonator magnetrons 2425
quartz-crystal resonators, parallel-feed excitation 8210

Tuning - contd
receivers, interchannel noise suppression, Zener diode circuit 8208 [5193
choice of i.f. and mixer current higher order components
reflex klystrons, use of ferrites 4335
semiconductor inductive effects, applic. 5782

Turbines
gas-steam cycle with free piston gen. for improved efficiency 2005
for large power stations, world survey 1998
speed-control, servomechanism system 3191
tests, complete instrumentation 5506
gas (See also Locomotives, gas-turbine electric; Power stations, gas-turbine).
automatic control system, using static equipment 7314
blade stresses, strain gauge for use up to 750° C 1959
generator drives, survey 1167
integration in hydroelectric systems, Canada 3282 [1166
open-cycle, for power generator, operation and applications
for peak load plus air storage power station 3957
starter-motor design 6594
100 MW power station, Brit. Columbia 2650
hydraulic
acceptance tests, Swiss and German compared 9
applications 4600
British equipment, survey 3269
Canada, Beauharnois No.3, St. Lawrence 633
cavitation and erosion tests, various materials 4601
cross-flow, for small power stations 2627
design coordination with alternator 5953
efficiency meas., sodium bichromate dilution apparatus 2831
Francis, freq.-control data 3951
spiral, pumped-storage station 3270
governor optimization, load—freq. control 3936
governing systems 7089
electrohydraulic 5315
optimum setting 6628
electric types 1281-3
Kaplan, blade profile meas. 1146
speed regulation and stability 2739
and Deriaz, comparative studies 1145, 7088
losses, calculation 1147
model tests 1148
pivoted-pad thrust bearings, performance tests 2626
power measurement and efficiency determination 7087
pumped-storage, survey 627, 3267
economics of 6544
pump—turbine units 3256
for Lower Vistula project 6546
without natural inflow 6564
mixed-flow var.-pitch units 3940
regulation properties, effects of pressure surges 1144
separate network freq.-control by Pelton turbine 3937-8
Spain, Eume hydro. station 7104
steam (See also Locomotives, steam-turbine electric).
condensing, large units, vacuum calculations 3252
economic cooling-water flow 4599
data for 200 largest power stations in world (book) 2647
displacement governors under steady-state conditions 687
exhaust stage and condenser design 3253
at Ferrybridge "B" power station 7122
large turbogenerators, economic aspects 7180
modern trends, evaluation 1142
overspeed, protective equipment 136
peak-load operation, tests 3955
pressure and passage sections of final stages 3251
pressure-oil shaft-turning gear for floating the rotor 3255
rotor blade, damping decrement meas. app. 3416
STAL types, survey of developments 1143, 2625
in Willington 'A' power station 1155
80 MW unit, Hamburg power station 3956
100 MW unit at Hattingen, Germany 4630
100 MW, Czechoslovakia, design 3254
wind (See also Power stations, wind).

Voltage
standardization of supply voltages 5411
240V as recommended supply volts. for U.S.A. domestic load 106
Voltage distribution (See also Breakdown; Overvoltage; Surface discharges; Transient voltages).
over string of suspension insulators, calculation 7292-3
Voltage dividers (See also Voltage regulation).
capacitor type, for Van de Graaff gen. output meas. 1348
constant-resistance decimal attenuator 6727
for h.v. pulses, meas. and errors 7493
Kelvin—Varley, design 7494
surge voltage meas. 6083
Voltage measurement (See also Electrolytic trough; Voltmeters).
a.c., accurate direct-reading instruments 7486
multiple instruments 2160
high values, sphere-gap accuracy 1347
a.c. and d.c. instrument using thermocouple convertor 1397
audio freq., high-precision amplifier 6791
biological, voltage clamp circuit 5134
bridge method from small changes in alt. voltage 2115
and calibration, primary level standard 2116 [1348
capacitor-divider method, Van de Graaff accelerator output
constant-resistance network as universal shunt 3434
electrolytic tank, auto. plotting in Laplacian field 5487
fibre or cell meas., microelectrode techniques 5132
h.s. voltage comparator using Si capacitor bridge 745
h.v. voltage dividers, errors 7493
heart potentials, multichannel analyser 4377
inductronic electrodynamometer 200
industrial recorders, continuous volt. reference 1399
Kelvin—Varley divider, design 7494
multipoint electrocardiographic recording, cross-correlation analysis 4375
oscillography using H-form volt. dividers 5523
peak values in testing of surge diverters, errors 4790
phase-shift of two voltages based on sum and diff. method
photo-resistor device for small voltages 7402 [2811
physiological potential meas., skin electrodes 719
potentials in d.c. corona fields 6061
r.f., bridge instrument design 7505
ripple in aircraft generator systems 3357 [2842
spark-gap with crossed cylinder electrodes, 140 kV peak
stress distribution in composite insulation 7389
thermoelec. voltage convertors for use up to 30 Mc/s 6671
vector-electrocardiography techniques 5131
voltage transformers, determination of errors 2793
wave-front response of surge diverters 4042
X-Y recorder, design 1403

Voltage regulation (See also Voltage dividers: For inherent regulation see under Voltage.).
a.c. regulator with reactor and diode control 2756
aircraft power supplies, generators 7336
generator ripple charac. and meas. 3357
use of transistors 3439
automatic, ship auxiliary systems 7332
capacitors, in med. volt. networks 690
prefabricated banks, l.v. networks 1255
at consumer's end 1254 [6018
characteristic curves for sync. generators and transformers
Cockcroft—Walton generator 6015
and corona discharge 4365 [6585
d.c. generator, self-excited, additional external excitation transistorized regulator 5435
d.c. transistor convertor 3540, 7736
dynamic, exciter response tests 2008 [691
fast-response static regulators for hydroelectric stations
of generator for rolling-mill drive 2754
generators and exciters, semicond. rectifier applic. 1289
line-drop compensation 7334
by linear circuits in solid-state inverter 4013
magnetic amplifiers, self-balancing, applic. 116
primary feeder control, computer solutions 2061
pumped-storage station, Happurg, Germany 3270
"quality" of voltage 2753
rectifiers, use of series capacitors 7230
induction regulators 7331
semiconductor, in elec. locos. 7365
in sync. machines 7167
road vehicles, use of semiconductor devices 2752
permanent-magnet generators 7156
of motor coach generating system 2785
lamps, life 1455
of rotating invertor 1292
self-regulating alternator for variable-speed drive 41
in supply networks 3440, 4029
losses 105
use of transformers 5438
basic problems 4606
random fluctuations 2749
economics of various methods 1287
deviation factor and economics 7330
sync. generators, stability of servo. controller 5898
excitation regulators 4648-9, 5436-7, 6593, 7338
for large types 2063, 4032, 4743
compounded 7174
compound, use of 3ph. transductors 4866
of exciter, by magnetic amplifier 342
transistorized circuit 3355
time-controlled unit-function voltage generator 2065
Tirrill regulators, load capacity extension 3441
transductors, applied to rotating freq.-changer 4868
applic. of sine-wave magnetic amplifiers 4869
in exciterless generators 4865
of med. freq. generator 4867
transformers, transductor-controlled tap-changer 4876
technology 4746
on-load tap-changers, resistance type 7335
o.l.t. changers, operation under short circuit 3984
stabilizers
a.c. variable impedance, design 2755
a.c. and d.c., mains-fed 2059
analysis by flow diagram 4745
automatic a.c., using electrostatic comparator 127
using capacitance of p-n junction as nonlinear element 6017
circuits for 45 and 250V output, 0.01% stability 7342
corona tubes, charac. and applic. 908
d.c., using semiconductor devices 3353
equivalent circuits 2751
high-stability 2750
thyratron stabilized 2758
h.t., for X-ray diffraction app. 3360
h.v., for electron microscopes 7339 [2562
emission stabilizers for electron-bombardment furnaces
ferroresonance type, with compensating capacitor 2066
gas-disch. tubes, operating characteristics 1712
glow-disch., for photomultipliers 8026
for klystron supplies in radio links 3358
linear bridge, for photomultiplier control 3408
magnetic-amplifier circuits 2328
for d.c. busbar system 7340
for mobile a.c. generators 2653

Voltage regulation - contd
stabilizers - contd
performance with motor-driven exciters 1291
for permanent-magnet sync. generators 6019
photomultiplier gain 4303
programme-controlled, positive feedback 4747
protection circuit against overloads 4034
reference standards and long-term stability 1288
series thermionic-tube type, 2.7 kV at 16 mA output 124

world survey 1139
Water supply
compression distillers, drives 710
Watthour-meters
change of characteristics in service 3453
connection to 3ph. 4w. loads 1420
driving-torque determination 7523
electrodynamometer power comparator 3454
impulse summation metering 7524
integrating intermittent load, errors and testing 2850
load-curve recording instrument 7526-7
load surges with alternating directions of flow 7525
progress review 6677 [4103
statistical methods applied to tests and calibration 1421,
testing, reading and life considerations 748
Wattmeters
calibrating apparatus and methods 4851
electrodynamometer power comparator 3454
r.f., bridge instrument design 7505
resistive-film milliwattmeters for microwaves 6100
single and 3ph. power meas. and recording, use of Hall effect 3452
single- and polyphase, calibration 1419
Waveform (See also Harmonics; Oscillations). [1]90
form factor of armature current, rectifier-fed d.c. motor
multidimensional c.r.t. display unit 4844
oscillographic, graphical reprod. 1412
shaping circuit, passive 4929
sinusoidal, from a.c. sync. generator 3294
pulse
breakdown of uniform-field gaps in air 7
distortion due to skin effect, calc. 3242
Waveform analysis (See also Distortion measurement; Harmonic analysis).
alternator with field-form envelope control 39
amplitude distribution meter 195
c.r.o. gate circuit, r.f. spectroscopy applic. 6676 [7432
distortion and intermodulation, in Hall-effect multiplier
electrical stroboscope with nsec rise-time 7517
electroencephalography, auto- and cross- correlation 2125
fluctuations of elec. noise, photoelectric method 6067
Fourier analysis, without use of integration 2614
harmonic analyser, 0-50 kc/s 7521
integration of varying amplitude and frequency phase 2445
MERIAC-1-F computer apparatus 3212
modulated h.f. voltages, spectrum display 2126
using pulsed bridge rectifier 5522
sampler for use as failure-indication modules 8034
semiconductor diodes in pulse circuits 309
spectrum analysers, using delay-line filter 197
with 450-track paper record 6097
for video frequencies 3444
survey of analyser instruments 7519
transistorized instrument 7520
Waveguide attenuators
attenuation meas., 0.01 to 50dB range 6653
cascaded, mismatch analysis 2925
limiter, L-band parametric 7688
modulator using Ge p-i-n device 6742
Waveguide components (See also Directional couplers; Standing-wave indicators).
apparatus and meas. methods for radar systems 6434
attenuation meas. apparatus 192
bends, design 2909
for TE_{01} mode in circ. guide 1503
block-loaded, as slow-wave structure 7692
cavities, gas-discharge breakdown 1709
channel insertion feed design 293
circulators, Y-junction strip-line 6741, 7682
survey and analysis, X-band 4179
70 and 140 Gc/s 2916

Waveguide components - contd
Y-type, using ferrite 1508
S-band ferrite 4184
low-loss S- and L-band 283
X-band, using ferrite toroids 7681
strip-line L-band 2917
Y-type design and advantages 2258
E-type T 2915
E-type X 2914
coaxial and matched types 2259
couplers, broadband multibranch 2911
short-slot 3 dB, properties 7680
to coaxial lines 7683
hole in wide wall 6176
directional coupler, image-line 282
wideband, using T slot 4959
duplexer, with pre-TR cells, analysis 7685
circular-polarization, radar applic. 4185
electroforming methods 230
ferrites, applns. 3461, 4114
Faraday effect, temp. and freq. dependence 5534
filters, band-pass, design 286
absorptive, for harmonics 2923
ring, for radio links 4961
branching, for circular guide 4962
tunable, using yttrium iron garnet 7686
rejection, using higher-order modes 2922
horn aerial coupling network for three frequencies 979
isolators, S-band, for 1 MW peak 4963 [4960, 6178
ferromag. resonance in ferrites 1513, 4110, 4115, 4860,
unidirectional 3 cm 7694
4 Gc/s 1514
field displacement, transverse electric fields 288
for radio links 285
theory 4188, 6177
9 mm band 4958
for coupling of cascaded klystrons 7993
junctions, symmetrical, asymmetry parameters 2912
asymmetric, equiv. circuit parameters 3528, 5615
slotted-tube hybrid, theory 4957
tetrahedral, and applns. 3529
leaky-wave aerials 3110
limiter, parametric L-band 7688
loads using resistive element strips 1510 [1509
low-loss gyromagnetic coupling using single crystal garnets
magic-T, analysis and characteristics 4181
strip-line, wideband design 4183
magnetron feeding high-Q cavity, isolator stabilization 284
mechanical design and manufacture 2919
microcalorimeter, 7 Gc/s band 6101
mode transducers, design 4176, 7691
meas. of spurious modes 166
rect. TE_{10} to TE_{01} 292
excitation of H_{11} mode in circular guide 7672
modulator using Ge p-i-n device 6742
noise generators, gas-disch. tube, 3-8 Gc/s 4202
non-contacting rotary joint and switch 7679
non-reciprocal, using parametric device 7890
using ferrites, temperature control 289
TEM network as gyrator and isolator 2924
phase-shifter, Reggia-Spencer type 1511
ferrite, bandwidth for beam steering of d.f. aerial 3758
broadband reciprocal ferrite 4964
using variable capac. diodes 5619
polarizators, use of low-loss ferrites 4859
quarter-wave plate using polystyrene 7689
resistive-film milliwattmeter 6100
resonant-ring aerial diplexing system 280
rotating polarization, generation technique 5621
with semiconductor diodes, microwave logic circuits 2294
single-diode parametric convertor 7682
switching, system for radio links 287
Ge diode microwave, theory 4277
microwave tube, arc discharge 7684
absorption, using gyromag. rods 4189
TR tube, self-contained low arc-loss 4186
tape structures, prediction of characteristics 4173
tapers, non-reflecting, theory 7678
minimum length calculation 809
"guaranteed" matching 810
2-section conical, design 269, 294
thin metallic films, props. and applic. 1501

Waveguide components - contd
transformers, stepped, for partially filled lines 4190
design 7690
optimum stepped, general theorem 4191
v.s.w.r. indicator with automatic read-out 193
wideband thermistor mount 4850
window, high-pressure seal and coupling 1507
elliptic, resonant, design 3530
for 4 Gc/s range, review 3527
Waveguides (See also Dielectrics, artificial).
absorption walls, design 4924
annular slot-launchers for single line 275
bending design analysis 799
coax. conductors, current displacement 4171 [4175
coax. spiral line immersed in magneto-dielectric medium
characteristics meas., resonator method 164, 7425
circular, Faraday effect, review 802
identification of modes 266
trans. of TE_{01} waves, 35 Gc/s 267 [4953
attenuation by periodic annular slots and dielectric layers
testing by resonant cavity method 165
overmoded, step transducer design 291
with double lining 4952
H_{01} propagation in loaded guide 268 [7430
two-inch diameter, attenuation meas. at 50 - 90 Gc/s
containing ferrites, e.m. field components and energy-flow density 7687
disk-loaded, dispersion 5617
spaced-disk, attentuation and prop. factor 295
corrugated cylinder surface, resonance-excitation of an aerial 4455
coupling, through medium-sized slots 1506, 5614
of two semi-infinite planar guides 6740
to aerial, freq. dependence 7612 [3526
with cross-wound helix, dispersion meas., 150-800 Mc/s
curved loaded, wave propagation 2921
decreasing attenuation, TM waves, sub-mm region 2904
dielectric rods 7693
power flow and negative wave impedance 804, 5612
propagation study 6739
dielectric slab, meas. of electric-field distributions 4187
dominant mode, method of changing, appln. to bends 290
e.m. waves, physical classification 7667
elliptical, ferrite-filled 803
field pattern of eE_{01} waves 4168
ferrite-loaded, mode limitations 1512
attenuation at 9.3 Gc/s input power 120 kW 1515
focusing of electron beams by r.f. fields 8016
Goubau surface-wave, theory 7611
hybrid transmission modes 4926
harmonics from neon discharge at 10 cm 8022
helix, propagation parameters 7676
curved, H_{01} wave 4169
effect of wire diam. on modes 277
with gyrotropic medium, retarding props. 4954
design and appln. to circ. elect. wave trans. 278
and copper-pipe junction, mode conversion 811
as linear proton accelerator 7956
behaviour as delay line 4174
winding and joining 270
helically slotted, oscillation modes 2906
interaction of waves with electron beam 4956
in anistropic dielectric, slow-wave structure 4170
in mangeto-dielectric medium, spatial resonance 4955
horn aerial, X-band, 11 Gc/s 3754
interaction impedance meas. by propagation-constant perturbation 4792
internal dimensions, meas., capacitance method 7450
introductory review 255
for long-distance communications 256, 259, 261-2, 5750
delay distortion and equalization 258
low-loss, meas. of attenuation 271
manufacturing techniques, for TE_{01} trans. 257
measurement of trans. quantities 4802
mode conversion, TE_{01} excitation 3521
deviations 265
modes, meas. by spinning dipole techniques 188
multimode, information distortion 260 [7695
non-periodic, slow-wave and backward-wave structures
non-resonant slotted, microwave lens feed 3755, 6374
non-uniform, optimum design 1483, 3501
overmoded, optical approach to mode conversion 795

Waveguides - contd
parallel-plate, launching of surface waves 3112
partially ferrite-loaded, gyromagnetic modes 797
phase meas. through tapered junctions 264
printed-circuit types, review 793
props. at microwave freq. 263
pyramidal-tapered, mode conversion 796
quasi-circular waves in quasi-circular guide 4167
rectangular, closely spaced transverse slots 3111
half-round inductive obstacles, calculation 5618
phase modulation and microphony 6737 [4951
ferrite loaded, secular equation and examination of modes
scattering in, equivalent network 3518-19
silvered Plexiglass, applns. 5582
slot arrays, mutual coupling effects 6936
slotted coaxial line, charact. impedance formulae 273
spiral, with anisotropic dielectric, dispersion equation and power flow 5613
step and taper sections, max. field by conformal trans. method 3522
strip lines, using printed circuits 7670
evaluation of radiation 1502, 5611
surface-wave, launching 7671
characteristics 1505
definition 4139
aerial, analysis 1830, 5789
single-wire, attenuation meas. 274
O- and X- guide 807
on corrugated structures, analysis 1504
structures, review 4140
survey, techniques and applications 4165
transients, rise-time and overshoot 7668
in travelling-wave masers 2350, 5658
travelling-wave resonance in waveguide ring 281, 3532
twisted rectang. or elliptic cross-section, field calculation
v.s.w.r., meas. of high values, tangent method 2807 [808
varying cross-section, generalized telegraphists equation
wave propagation close to periodic 7677 [276
windows, resonant modes 4178
wire type, with and without dielectric coating, charact. 6735
theory
boundary-excitation, electromagnetic field calculation 7675
chain of strongly coupled cavity resonators 6722
classification of waveguide modes 3520 [4144
conducting wedges, boundary conditions and ohmic losses
corrugated, surface resistance and attenuation 2907
coupled local normal modes 5616
ferrite-filled, surface e.m. waves 794 [238
filter design, e.m. wave transmission through wire gratings
guided wave, action of progressive disturbance 4950
H_{01} with statistically distributed irregularities, transmission properties 7673
helical waveguides, dispersion meas., 150-800 Mc/s 3525
helix, efficiency, 150 to 800 Mc/s 3524 [798
hollow rectangular, excitation, Laplace transforms applic.
junctions, fundamental mode reflections, formulae 7669
orthogonality relationships with inhomogeneous anistropic media 2920
parallelogram, general characteristics 4166
propagating structures, periodic coupling 2257
rectangular guides, impedance 6738
with inductive obstacle, impedance standard 5618
inhomogeneous transversely magnetized, wave propagation 2905
semi-infinite dielectric rod, terminal admittance 805
small symmetrical apertures and obstacles, equivalent circuits 4177
split coaxial line, characteristic impedance 272
twisted square guide, rotation of plane of polarization 7674
variable cross-section, propagation 800-1, 3523
Wavemeters
microwave high-accuracy 3450
Q-band, high-Q design 6098
Welding [617
cold pressure, influence on device design and manufacture
Cu to Al busbar joints, effects of high temp. 3336
electron beam systems 776, 1970
nuclear fuel elements 8535
radiographic inspection techniques 611
Simatic contactless control system 5937
spot welding, automatic control equipment 3816
ultrasonic testing 612, 1965

Welding - contd
arc
arc characteristics, chemico-metallurgical reactions 3237
arc temperature meas., spectrophotometer method 7466
beryllium, fusion method with tungsten arc 7060
electro-slag process 616
applications 5939
gas absorption from arc atmospheres 3238
heat transfer from arc 3240
inert-gas shielded, metal-transfer studies 3239, 3913, 8536
self-regulation of arc 1969
argon, in vacuum-tube techniques 5089
physical studies of arc, introductory survey 3236
projection system, advantages, applns. 5938
resistance
effects on supply volts. 3915
h.f., Thermatool process 3914
influence of Peltier effect 3916
pulse system with thyratron-controlled ignitrons 8537
self-adjusting control system 5941
Welding equipment
d.c. generators, suitability tests 2010
electron-beam apparatus 5936
with fine wires, semi-automatic 5940
high-speed process for thermoplastics 7059
meas. of effects of resis.-welding on supply volts. 3915
numerical control of spot-welder positioning 1915
resistance-welding instrumentation 1964
synchronous timer, 1 to 7 cycles 1968
for thermocouples 1967
use of transductors 5935
ultrasonic, for thin sheets 615
Winches
No entries this year
Wind power (See Power resources; Power stations).
Wind turbines (See Power stations, wind; Turbines).
Winders
a.c. automatic, control systems 4775
coal transported direct to power station from pit 6569
mine, d.c. drives 2095
winding ropes, electromagnetic testing methods 2611
Windings (See also Transformer windings).
a.c. generators, premagnetizing, for hysteresis correction
large, internal cooling 7175 [3292
a.c. machines, stator transposition 1192
correlation of forced and free oscillations 2617 [2014
damping, of sal. pole synchron. motor, s.c. impedance
fractional slot, winding factor and leakage reactance 5974
induction motors, end-winding leakage reactance 656, 1205
spherical, design 55
machine, pulse reflection during impulse testing 2121
maximum size reduction, in electronic equipment 8037
motor armatures, pulse method of fault location 7415
small universal machines, impulse testing with null detection 2802
stator end windings, supporting and securing 3289 [1198
synchr. generator, second field winding to increase stability
3 ph., with consequent-pole connection, differential leakage [1193
Wires (See also Conductors).
diameter meas., continuous method 3409
electrolytic polishing for fine wires and tapes 4135
ultrasonic inspection 5930
insulated
p.v.c., advances in heat resisting compounds 2110
Wiring (See also Conduits; Printed circuits).
computer panels, automation 8454
Wood (See also Insulating materials).
creosoting practice, for wood poles 101
glue curing, induction heating 6704
moisture content meas., probe electrode design 4814

X-ray apparatus
comparison of resonant transformer and V. de Graaf gen.
diffraction app., stabilized h.t. supply 3360 [2432
exposure times, electronic control 6315
image intensifier devices, non-destructive testing 5107
for cinefluorography 3052
applications 3053-4
standards for brightness meas. 3056
medical equipment 400, 8011

X-ray apparatus - contd
ionographic method of image production 1707
proportional counter, crystallography applic. 6762
television system as X-ray image amplifier 533
visualization and analysis using spectral information 6314
X-rays produced in low-press. gas discharge 3700

X-ray tubes (See also Betatrons; Radiography).
computer for exposure control and tube protection 398
distant-focus, with rod anode 397 [5106
elect. breakdown in vacua, theory and appln. to X-ray tubes using field-emission cathode 4312
flash-tube set, low inductance type 6864

SUBJECT INDEX HEADINGS

The headings used in the Alphabetical Subject Index are listed below, grouped into sections by subject on a similar basis to the arrangement of the abstracts in the monthly issues of Electrical Engineering Abstracts. Many of the headings are listed in several places, so that each section lists all the headings which concern its subject. Those headings which it is desired to consult can be found in the main index in their respective alphabetical positions.

AN INTRODUCTION TO THE SUBJECT INDEX WILL BE FOUND ON PAGE 969.

GENERAL

Electrical engineering applications
Electrical engineering equipment

SCIENCE ABSTRACTS: SECTION B AUTHOR INDEX NUMBER

ELECTRICAL ENGINEERING ABSTRACTS

Published by The Institution of Electrical Engineers

AUTHOR INDEX 1960

AUTHOR INDEX

For the sake of simplicity and uniformity, all names beginning with articles or prepositions are listed as if written as single words, regardless of nationality (e.g. Van Vleck is listed as if written Vanvleck). Cross-references are included in appropriate places. Compound names are generally listed under the last component, unless hyphenated; exceptions to this rule are appropriately cross-referenced.

All names are reproduced in the abstracts and the index with the same spelling as in the original articles; in the case of articles printed in Cyrillic characters, a letter-by-letter transliteration is given, in accordance with the scheme given at the beginning of this volume of "Science Abstracts". Russian authors' names may appear in Latin-alphabet publications in various forms, due to the use of different transliteration schemes; these names are reproduced as printed in the articles abstracted.

In anticipation of reprinting the entries in future cumulative indexes, the Abstract Number given with each entry below incorporates the final digit of the year of publication in "Science Abstracts". The headline at the top of each page supplies the remaining digits to complete the year (1960), and indicates the section (Electrical Engineering Abstracts). Thus "0=1234" in this index means "Abstract 1234 in the 1960 volume of Electrical Engineering Abstracts".

Abbott, E. See Westersten, A., 0=8062
Abbott, H.H. A new small crossbar telephone system for private branch exchanges, 0=929
